Appendix A – Claim Status Explained 60

1 iDAS CHOX Credit Hire Organisation and Insurer Responsibilities

This section details the roles and responsibilities for all parties regarding the use of iDAS CHOX regarding the credit hire and/or credit repair process.

1.1 Claim and Invoice Data

It is the Credit Hire Organisation's responsibility to upload claim and invoice data into iDAS CHOX. This will either be from a direct feed from internal systems via a Web Service or via an XML upload feed into the iDAS CHOX web browser front end.

It is the Credit Hire Organisation's responsibility to ensure that the data being uploaded into iDAS CHOX is of an accurate, complete and consistent nature.

1.2 Claim Acknowledgement

It is the Insurer's responsibility to review all incoming first notifications and assess against details held on internal systems. The Insurer must then decide to acknowledge or reject a claim. A Credit Hire Organisation, cannot upload invoice details against a claim which has been rejected or yet to be acknowledged.

1.3 Monitoring of Hire

It is the Credit Hire Organisation's duty to monitor the progress of a hire/repair. Information obtained from the hire/repair monitoring process is to be entered into iDAS CHOX against the claim in question.

1.4 Invoice Approval

It is the responsibility of the Insurer to review all invoices that have either passed the business rules held in iDAS CHOX or invoices that have failed fundamental business rules and therefore require review. The Insurer will be required to make a decision on whether to clear the invoice for payment or reject the invoice in question given the information supplied.

1.5 Invoice/Claim Amendment

It is the Credit Hire Organisation's responsibility to make modifications to a claim/invoice with fundamental data errors. The Credit Hire Organisation is also required to supply additional information to a claim via the means of iDAS CHOX upon request by the Insurer.

1.6 Invoice Payment

It is the responsibility of the Insurer to monitor payments required for hire invoices using iDAS CHOX once a claim has been cleared for payment. The payment will be logged on the Insurer's internal payments system but a requirement to update iDAS CHOX of this payment is in order.

The Credit Hire Organisation is required to monitor iDAS CHOX for all claims where an Insurer has logged a payment for the invoice and update the claim in iDAS CHOX as a notification that the payment has been received.

2 Getting Started

2.1 System Requirements

IDAS CHOX can be accessed online and is supported by the following web browsers only:

- Internet Explorer 6 or higher
- Mozilla Firefox 3 or higher
- Safari 3 or higher

2.2 Logging on

- Before you can begin using iDAS CHOX, you will need at hand your registered username and password as supplied by the iDAS CHOX support team. You will have been sent an e-mail detailing your username and password.
- Using your preferred web browser from the list above, enter the following URL into your browser's address bar: **https://www.idaschox.com**
- Enter your case sensitive username and password into the relevant fields as shown on figure 1 below.

[Terms of Service](#)

This is a Sherwood Compliance Services Ltd proprietary system. No use is allowed without appropriate authorisation. Unauthorised use of this system will constitute a breach of Sherwood Compliance Services Ltd policy and prosecution under pertinent legislation will apply.

Figure 1

2.3 User Roles

There are seven user roles for an Insurer within iDAS CHOX; each role is specific with appropriate read/write and access privileges. These roles are detailed below with a brief description of each role:

- **FNOL Handler** – The FNOL Handler is responsible for registering claims on internal systems which have not previously been registered, generating a unique Insurer claim number.
- **Claims Router** – Responsible for routing claims to their relevant business area/workgroup.
- **Claim Ownership Manager** – A user with this role is responsible for assigning a claim owner to each claim and ensuring the claim has been assigned to the correct business area/workgroup.
- **Claims Handler** – Responsible for reviewing first notifications and making decisions on whether to accept or reject claims. The Claims Handler is also required to monitor hire updates, review Credit Hire Organisation invoices and decide whether to reject or approve and make payments for said invoices.
- **Specialist Claims Reviewer** – (Motor Engineer). Responsible for reviewing invoices post Business Rules Engine processing and deciding whether to approve or reject invoices. Additional responsibility to review claims at the first notification stage when the claim has been referred for specialist advice by a Claims Handler.

- **Payments Clerk** – Responsible for making payments on Insurer’s internal system for claims that have been approved for payment in iDAS CHOX.
- **Insurer Manager** – Access to the same screens/functionality as the above roles. In addition the Insurer Manager role will have access to the administrative function within iDAS CHOX, offering the ability to create users, assign roles to users and for Claims Handlers and Claim Ownership Managers, assign workgroups. The Insurer Manager role also offers access to iDAS CHOX’s reporting module and the iDAS CHOX Business Rules Engine management/control function.

3 Basics

3.1 iDAS CHOX at a Glance

On logging into iDAS CHOX you will be presented with the following screen layout (the tabs displayed e.g. Reports will vary depending on your user role):

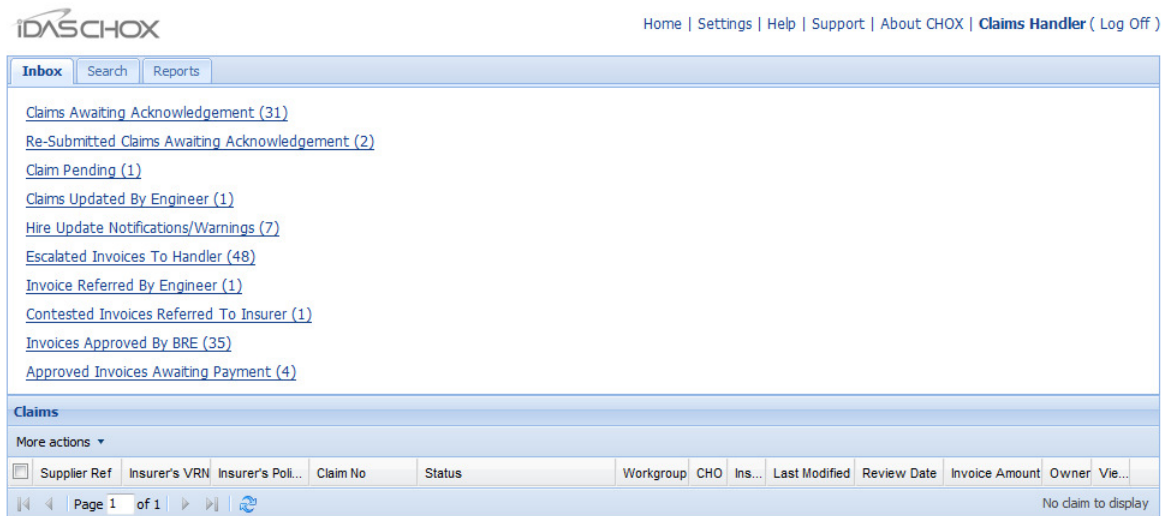

Figure 2

3.2 Navigation

iDAS CHOX can be navigated using a mouse to click on menu items and arrows.

3.2.1 Control Toolbar

The 'Control Toolbar' is located in the top right-hand side of the iDAS CHOX screen as shown by the red box displayed in figure 3 below.

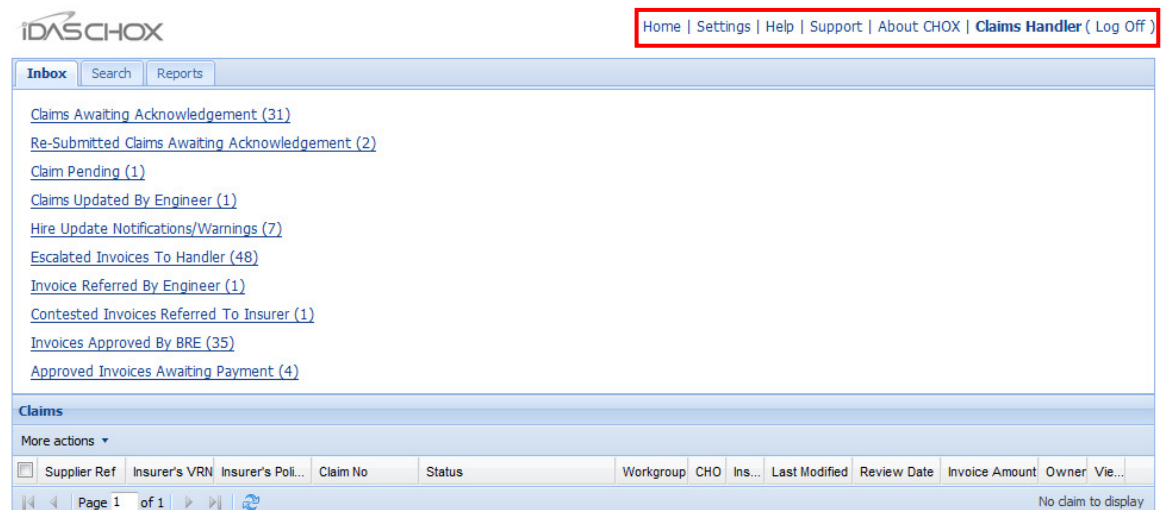

Figure 3

The 'Control Toolbar' allows a user access to the following controls:

3.2.1.1 Home

When the 'Home' shortcut link is clicked the user will be taken to the home screen within iDAS CHOX, your default home screen will vary dependent on your role.

3.2.1.2 Settings

The settings link allows the user to view their registered information and change their password.

3.2.1.3 Help

When the 'Help' shortcut link is clicked a new browser session will open which will contain the iDAS CHOX Insurer user guide.

3.2.1.4 Support

When the 'Support' shortcut link is clicked a drop down list will appear enabling the user to submit an online support request through the 'Online Support Form' option or select 'Support Procedure' to open the iDAS CHOX support procedure in a separate internet browser tab.

3.2.1.5 About CHOX

When the 'About CHOX' shortcut link is clicked a pop-up window will appear which will contain details relating to the iDAS CHOX product including versioning and ownership.

3.2.1.6 Log Off

When the 'Log Off' shortcut link is clicked you will be logged off from your current activity and returned to the iDAS CHOX log on screen as shown in figure 1.

3.2.2 Dashboard

Some user roles will be able to see the 'Dashboard' screen as shown in figure 4 below. This Dashboard displays a snapshot of claims in the system to date across a weekly, monthly and cumulative period. Results can be viewed for an individual CHO or across the entire CHO book.

Figure 4

3.2.3 Inbox

The 'Inbox' tab allows a user to see work queues that are relevant to them. The work queues allow a user to see how many items are outstanding in a particular queue at any given moment and therefore require action.

As shown in figure 5 below the work queues are displayed as internet style hypertext links. In order to access a particular work queue, click on the name of the work queue you wish to view.

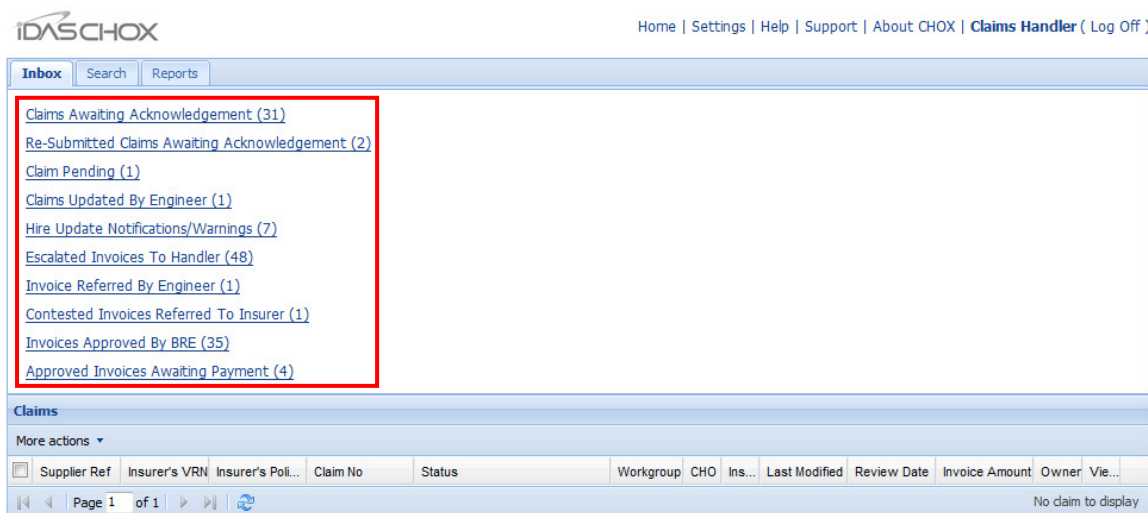

Figure 5

3.2.4 Claims Overview Grid

Located below the work queue items as shown in figure 6 below (indicated by the red box), is a small grid made up of a number of columns referred to as the 'Claims Overview Grid'. On logging into iDAS CHOX the default 'Claims Overview Grid' view is blank and thus no claims are displayed in the 'Claims Overview Grid'.

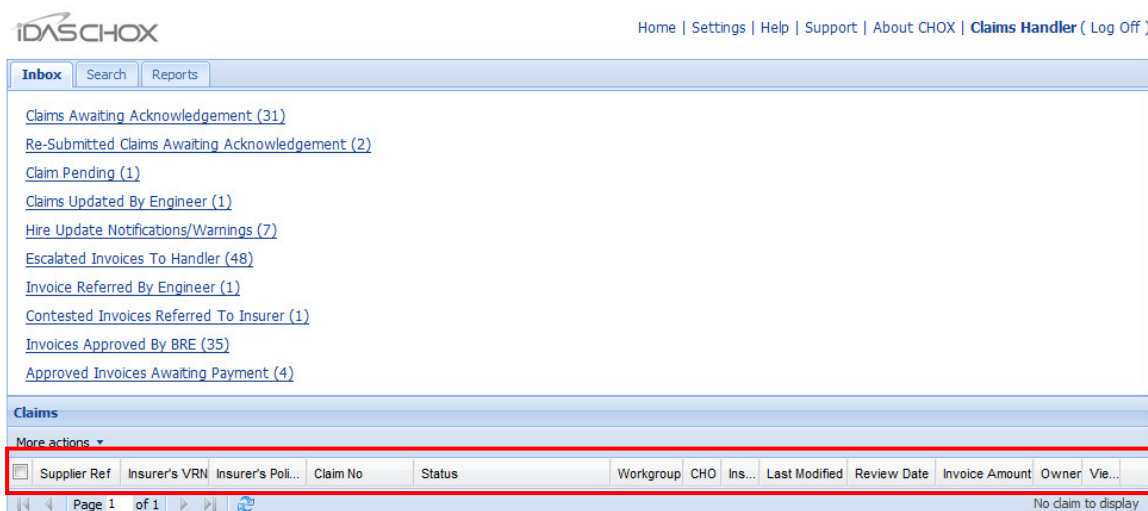

Figure 6

The 'Claims Overview Grid' displays all claims that relate to the work queue that is currently selected and therefore all items in the grid are of the same status. The 'Claims Overview Grid' displays a handpicked selection of columns that will allow you to uniquely identify a claim. In order to view the details of a particular claim click on the 'Supplier Reference' field (underlined with blue text, appearing as an internet style hypertext link) for the particular claim.

3.2.5 Search

To access the search facility, click on the 'Search' tab which is located next to the 'Inbox' tab as shown by the red box in figure 7 below:

Figure 7

Figure 7 above represents the extensive search functionality that is available in iDAS CHOX. A search can range from a search on a single field to a search across multiple fields.

- To widen search results, search using only one field.
- To minimise search results, search using multiple fields.

Detailed below is a list of the searchable fields with a brief explanation on the results that would be returned if a search was conducted on each:

- **Supplier Reference** - Unique reference for the Credit Hire Organisation (as stored on internal systems) in order to identify a claim. Will display only one result in the 'Claim Overview Grid'.
- **Claim Number** - Unique reference for the Insurer (as stored on internal systems) in order to identify a claim. Will display only one result in the 'Claim Overview Grid'.
- **Invoice Number** – This number refers to the Credit Hire Organisation's internal invoicing number. This search could return a specific claim relating to an invoice payment for a credit hire and/or credit repair or return a specific claim relating to a Claims Handling invoice in the case of Credit Hire Organisations under the Delegated Authority scheme.
- **Show Open Claims Only** – When this box is checked, the search will exclude all claims that have been closed or have been resolved.
- **Supplier VRN** – This search is for the customer/supplier/non-fault party's vehicle registration number. It is possible for more than one claim to exist against a single VRN.
- **Insurer VRN** – This search is for the third party/at-fault party/insurer's vehicle registration number. It is possible for more than one claim to exist against a single VRN.

- **Claim Upload Date From & To** – Date range to include all claims between selected dates where the claim was uploaded into iDAS CHOX for the first notification stage of the claim lifecycle.
- **Invoice Upload Date From & To** - Date range to include all claims between selected dates where the invoice was uploaded into iDAS CHOX.
- **Hire Date From & To** – Date range to include all claims between selected dates where the hire start of the replacement vehicle commenced.
- **Supplier Name** – Search will return all claims (regardless of their status in the system) for a particular Credit Hire Organisation/Supplier.
- **Status** – Search will return results for all claims in iDAS CHOX of the specified status. At the top of this list is a status labelled 'ACTIONS FOR HANDLERS', this is not a claim status, selecting this search parameter would produce a list of claims that are classed as outstanding actions for claims handlers and will have either of the following statuses; ClaimUnacknowledgedRouted, ClaimRejectionContested, ClaimPending, ClaimUpdatedByEngineer, InvoiceReferredToClaimsHandler, InvoiceEscalatedToHandler, ContestedInvoiceReferredToInsurer, InvoiceApprovedByBRE, AwaitingInvoicePayment, AwaitingLiabilityResolution.
- **Workgroup** – The search will return results for all claims in iDAS CHOX for the specified Workgroup.
- **Claim Owner** – The search will return results for all claims in iDAS CHOX for the specified Claim Owner. At the top of this list is a claim owner labelled 'NOT ASSIGNED', this is not a claim owner, selecting this search parameter would produce a list of claims where a claim owner has yet to be assigned.
- **Liability Status** – The search will return results for all claims in iDAS CHOX for the liability status specified.

To use the iDAS CHOX search facility select the relevant search criteria in the form of the supplied drop down menus, date calendar pop-ups or by typing search strings into the relevant field(s). For text entry searches, the inclusion of a '%' symbol anywhere in the entry will act as a wild card character (representing any group of characters or numbers). For example a search on the 'Claim Number' field with '%08%' would return all claims which have '08' in the 'Claim number' and any group of characters either side of the '08'. An example search entry is shown in figure 8 below:

The screenshot shows the iDAS CHOX search interface. At the top, there is a navigation bar with links: Home | Settings | Help | Support | About CHOX | Claims Handler, ABC Insurer (Log Off). Below this is a search form with tabs for 'Inbox', 'Search', and 'Reports'. The 'Search' tab is active. The form contains several input fields and dropdown menus for search criteria:

- Supplier Reference: CHOX%
- Invoice Number: (empty)
- Supplier VRN: (empty)
- Claim Upload Date From: (empty)
- Invoice Upload Date From: (empty)
- Hire Date From: (empty)
- Supplier Name: --- ALL ---
- Workgroup: --- ALL ---
- Liability Status: (empty)
- Claim Number: (empty)
- Show Open Claims Only: ☒
- Insurer VRN: (empty)
- Claim Upload Date To: (empty)
- Invoice Upload Date To: (empty)
- Hire Date To: (empty)
- Status: ClaimPending
- Claim Owner: --- ALL ---

Below the search form are 'Search' and 'Reset' buttons. Underneath is a section titled 'Claims' with a 'Batch Update' dropdown. Below this is a table with the following columns: Supplier Ref, Insurer's VRN, Insurer's Policy, Claim No, Status, Workgroup, CHO, Insur, Last Modified, Review Date, Invoice Amount, Owner, View. The table shows 'Page 1 of 2' and a message 'No claim to display'.

Figure 8

Once the search criteria has been entered click on the 'Search' button. Results from the above search criteria are shown in figure 9 below:

Inbox Search Reports

Displaying claims 1 - 1 of 1

Figure 9

3.2.6 Tabs

Upon selecting to view the claim details for a particular claim by clicking on the 'Supplier Reference' number in the 'Claim Overview Grid', the tab view as shown and indicated by the red box in figure 10 below is displayed:

Claim Details Hire Monitoring Invoice Details Attachments History Claim Cycle Notes

Customer Details	Claim Details
Injury	Incident Details
Injury Solicitor	Third-Party Details
Vehicle Damage	Witness Details

©2009 Sherwood Compliance Services Ltd | Copyright | Privacy Policy | Terms of Service

Figure 10

Tabs allow a user to browse through segmented sections of a claims underlying detail allowing more efficient and effective navigation through the extensive set of data held against a claim in iDAS CHOX.

3.2.6.1 Expanding/Collapsing Tab Details

By default the information displayed within a tab is collapsed in that the tab section header is shown without the underlying detail as shown in figure 11 below. In order to view detail under each of the tab section headers you should click on the tab section header in question. The red box in figure 11 below represents the 'Customer Details' section header.

Figure 11

When you have clicked on a tab section header all underlying details will expand under the tab section header as shown by the red box in figure 12 below. Clicking on the tab section header section again will collapse the underlying details returning the user to view as shown in figure 11.

Figure 12

3.2.6.2 Data Read/Write Views and Saving Data

Depending on the status of the claim the details contained within a tab will either be in a read only format or in an editable format. Read only tab details will be displayed as shown in figure 13 below, with data for a particular field being displayed next to the field label with no option to modify.

Figure 13

Editable tab details on the other hand will have pre-populated fields in an editable field format as shown in figure 14 below.

Figure 14

The editing of fields will require you to make the changes permanent within the system by clicking on the relevant button that is displayed in and around the editable fields. This button will be either 'Save Changes' or some form of action button i.e. 'Refer to Engineer'. The 'Save Changes' button is shown in figure 15 below.

Figure 15

3.2.6.3 Tab Availability

iDAS CHOX offers access to tabs depending on the status of the claim and therefore what can and cannot be viewed. If a tab has blue writing as the tab name then the tab can be navigated to, however if the tab has grey writing as the tab name then the tab cannot be navigated. Based on figure 16 below, 'Claim Details' tab, 'Hire Monitoring' tab, 'Claim Cycle' tab, 'Attachments' tab and 'Notes' tab can all be navigated to, but the 'Invoice Details' and 'History' tabs cannot be navigated to.

Figure 16

3.2.6.4 Tabs Explained

An explanation on the content displayed on each tab is offered below.

3.2.6.4.1 Claim Details Tab

The 'Claim Details' tab contains information relating to the general claim details, non-fault party's details, at-fault party's details, witness details, vehicle damage details, incident details, injury details, injury solicitor details and engineer report details.

3.2.6.4.2 Hire Monitoring Tab

The 'Hire Monitoring' tab contains information relating to the monitoring of the hire/repair. During the length of time the customer has the vehicle on hire, it is the Credit Hire Organisation's duty to monitor the progress of the repair/hire, any update/modification that is deemed important/vital/required by the Insurer is noted on this tab as and when the update occurs. The Credit Hire Organisation has the ability to ensure that the update is reviewed/seen by the Insurer if required.

3.2.6.4.3 Invoice Details Tab

The 'Invoice Details' tab contains a breakdown of the items that make up the total invoice cost including details regarding the vehicle on hire, the length of hire, extras added to the vehicle for the hire, engineer report details, repair costs and any other additional costs that have been incorporated as part of the hire.

3.2.6.4.4 Attachments Tab

The 'Attachments' tab allows a user to attach files to a claim in various file formats such as PDF documents, Microsoft Word documents and common image file formats. Photos, associated documents and payment packs can be attached to a claim using the 'Attachments' tab.

To upload a file attachment, follow the below steps:

- Navigate to the 'Attachments' tab as shown in figure 17 below:

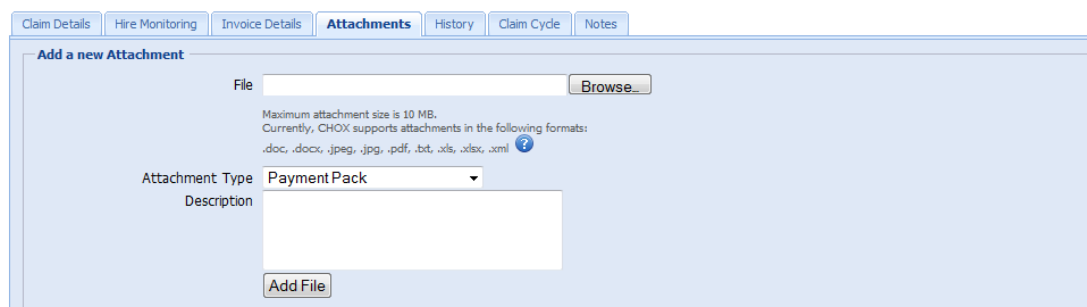

Figure 17

- Click on the 'Browse....' button.
- Navigate to the location of where the file is stored and click 'Open'.
- Select the relevant category of file upload using the drop down menu for the 'Attachment Type' field.
- Enter a description in the 'Description' field, offering a brief description of the file being uploaded
- Click on the 'Add File' button to attach the file.

3.2.6.4.5 History Tab

The 'History' tab contains details regarding the results of the Business Rules Engine validation when an invoice has been uploaded into iDAS CHOX and any messages as a result of this process are stored. The items detailed on the 'History' tab are displayed in chronological order with the oldest history items being displayed first as shown in figure 18 below:

Claim Details	Hire Monitoring	Invoice Details	Attachments	History	Claim Cycle	Notes
Created On	Created By	Message Text				
04/11/2009 13:00:51	Operative CHO	BRE Rule Failed – The Repair Net billed £1101.00 exceeds the Repair Net ceiling of £1100.00.				
04/11/2009 13:00:51	Operative CHO	BRE Rule Failed – The Hire Net billed £1101.00 exceeds the Hire Net ceiling of £1100.00:RuleFailed				
04/11/2009 13:00:51	Operative CHO	BRE Rule Failed – The Repair Net billed £1101.00 exceeds the Repair Net ceiling of £1100.00 for vehicle class P1.				
04/11/2009 13:00:51	Operative CHO	BRE Rule Failed – Number of hire days billed by the CHO exceeds the allowable days threshold (non total loss), taking into account the ECD(s)				
04/11/2009 13:00:51	Operative CHO	BRE Rule Failed – Number of hire days billed by the CHO exceeds the CHO's hire days ceiling.				
04/11/2009 13:00:51	Operative CHO	BRE Rule Failed – The Hire Net billed £1101.00 exceeds the Hire Net ceiling of £1100.00 for vehicle class P1.				
04/11/2009 13:00:51	Operative CHO	BRE Rule Failed – Vehicle class allocated for hire is not a like for like match on the customer's vehicle class.				

Figure 18

3.2.6.4.6 Claim Cycle

The 'Claim Cycle' tab contains details of the status changes of a particular claim. A new entry is added to the list every time the status is changed, including who changed the status of the claim, the new status of the claim and the date/time the status changed. The list is automatically displayed in chronological order with the newest/current status appearing at the bottom as shown in figure 19 below.

Claim Details Hire Monitoring Invoice Details Attachments History Claim Cycle Notes		
Modified Date	Modified By	Status
04/11/2009 12:59:29	Operative CHO	ClaimUnacknowledgedUnrouted
04/11/2009 12:59:45	Claim Router	ClaimUnacknowledgedRouted
04/11/2009 12:59:46	Claim Router	ClaimUnacknowledgedUnassigned
04/11/2009 13:00:04	Claim Ownership Manager	ClaimUnacknowledgedRouted
04/11/2009 13:00:22	Claims Handler	AwaitingCarHireInfo
04/11/2009 13:00:41	Operative CHO	AwaitingInvoiceData
04/11/2009 13:00:51	Operative CHO	InvoiceEscalated

Figure 19

3.2.6.4.7 Notes Tab

The 'Notes' tab is an empty data field which can be used to add queries and comments by both Insurers and Credit Hire Organisations. This opens up invaluable dialogue in resolving claims and disputes swiftly and efficiently. All notes can be viewed at any stage of the iDAS CHOX process by navigating to the 'Notes' tab within a claim. Notes can either be of a private nature and therefore only seen by internal Insurer users or of a public nature and therefore seen by all users who can access the claim, including the Credit Hire Organisation who submitted the claim.

To add either a public or private note, the user must follow these steps:

- View the claim details of the claim in question and navigate to the 'Notes' tab, a screen shot of the 'Notes' tab is shown below in figure 20.

Claim Details
Hire Monitoring
Invoice Details
Attachments
History
Claim Cycle
Notes

Add a new note

☒ Public Note (Visible By CHO)
☐ Private Note (Only Visible Internally)

Add Note

Private notes are highlighted in blue

Created	Created By	Message
26/11/2009 11:03:58	Insurer	Public Note visible to the CHO and Insurer
26/11/2009 11:04:16	Insurer	Private Note visible to the Insurer only

Figure 20

- Click in the text box labelled 'Add a new note' and write the statement or question.
- Decide whether you wish for the message to be public (visible to the CHO) or private (visible internally only) by selecting the relevant radio button beneath the text box.
- Click on the 'Add Note' button.
- If a public note has been added, it will be displayed in the list with a white background. If a private note has been added, it will be displayed with a blue background.

- All notes that have been entered against a claim by either the Insurer or Credit Hire Organisation will appear on the 'Notes' tab and all notes for each claim are archived by date and are not amendable once saved.

3.2.6.5 *Claim Summary Pane*

When viewing the claim details of a particular claim, you will be presented with the 'Claim Summary' pane as shown in figure 21. The 'Claim Summary' pane contains information that is regarded as essential to a user and therefore is displayed at all times regardless of the tab you navigate to.

Claim Summary		
Third Party Insurer ABC Insurer	Credit Hire Organisation ABC CHO	Created By Claims Handler (ABC CHO)
Supplier Reference CHOX1018	Insurer Claim Number 201100000065	Created On 29 Mar 2010 11:48
Customer Mr James Jackson	Current Status InvoiceEscalatedToHandler	Policy Holder Contact Date 01 Jan 2010 00:00
Claim Owner Claims Handler	Workgroup Workgroup 1	Indemnity Value £0.00
Liability Status Full Liability Accepted	Percentage Liability Agreed (Insurer) 100.00%	Percentage Liability Agreed (CHO) 0%
Liability Agreed Date 29/03/2010		

[« Back to Search Results](#)
-- More Actions --
[Export Claim To Excel](#)

Figure 21

3.2.6.6 *Action Pane*

For certain statuses, an action window pane will be displayed which will require certain action in order to move the claim to the next status/lifecycle step. The action pane will be located beneath the 'Claim Summary' pane when viewing the claim detail as discussed above. The action pane in order to reject an invoice or clear an invoice for payment is shown below in figure 22 as an example.

BRE Approved Claim - Action Required

This claim and it's related invoice have been cleared by the CHOX approval system. Please review the invoice and claim information supplied, and choose whether to clear the invoice for payment, reject the invoice or refer the invoice to an Engineer.

Reason for Rejection N/A

Please specify how you wish to proceed

Reject Invoice
Clear for payment
Refer To Engineer

Figure 22

4 Inbox

As discussed previously, your inbox will display all work queues that are relevant to your role in the system. What follows is a list of the work queues as well as a description of which each contains as well as the action required to remove the claims from the queues by way of action. In brackets against each work queue is the role(s) that will have access to the relevant work queue.

4.1 New Claims to be Routed (Claims Router, Insurer Admin)

The 'New Claims to be routed' work queue contains a list of new first notifications that have been uploaded by the Credit Hire Organisation. The new claims need to be routed to the relevant business areas/claims handling teams within the Insurer.

CHOX has an auto-routing function, which looks at the data submitted by the Credit Hire Organisation and attempts to route the claim to the correct workgroup within the Insurer automatically. If the claim cannot be automatically routed, the claim will need to be manually routed to the correct workgroup by following these steps:

- Select each claim in turn from the queue and view the claim details.
- Review the claim details held on iDAS CHOX against details stored on internal systems to work out which workgroup the claim needs to be routed to.
- Using the 'Workgroup' drop down menu located on the 'Claim Routing – Action Required' window pane, select a 'Workgroup' to route the claim to.
- Click on the button labelled 'Assign Workgroup' to route the claim.
- If the claim is to be rejected back to the Credit Hire Organisation, select a rejection reason using the 'Reason for Rejection' drop down menu and click on the button labelled 'Reject Claim'.

Claims can also be routed via a bulk update by following the below method:

- Select the 'New Claims to be Routed' work queue.
- The claims will all be displayed in the 'Claims Overview Grid'.
- Select the claims that you wish to route by checking the tick box next to each claim as shown in figure 23 below or alternatively select all claims by checking the tick box that appears along the top row.

Displaying claims 1 - 6 of 6

Figure 23

- Click on the 'Batch Update' button.
- Select 'Route Claim(s)' as shown in figure 24 below.

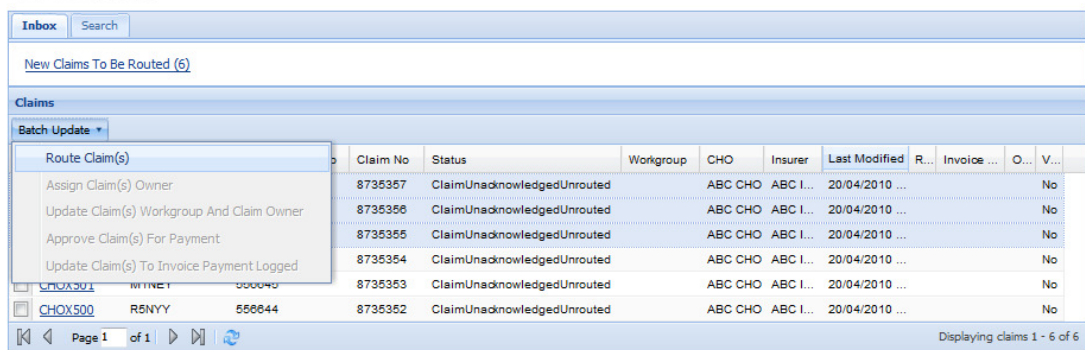

Figure 24

- Select the relevant workgroup from the 'Workgroup' drop down list to route the claim(s) as shown in figure 25 below.

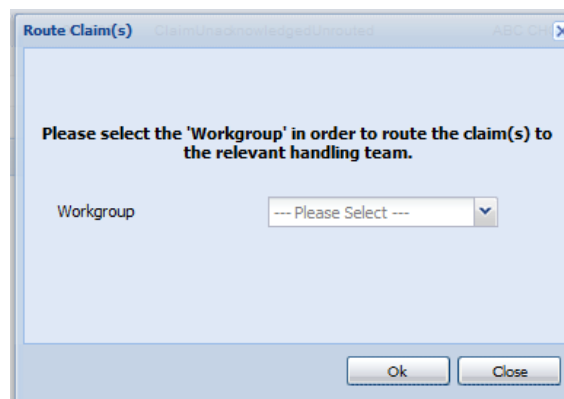

Figure 25

- Once the correct workgroup has been selected, click on the 'Ok' button
- The claim status will now be 'ClaimUnacknowledgedUnassigned'.

4.2 New Claims to be Assigned (Claim Ownership Manager, Insurer Admin)

The 'New Claims to be Assigned' work queue contains all claims that have been routed through to the correct workgroup and are awaiting to be assigned a claim owner. Claims in this queue need to be reviewed and a decision made on which claim owner will manage the claim during its lifetime in the system.

- Select each claim in turn from the queue and view the claim details.
- Review the details held on the internal system if needed to decide which handler should be assigned the claim.
- Select the workgroup that the handler is assigned to using the 'Workgroup' drop down menu; once selected using the 'Claim Owner' drop down menu select the handler you wish to assign the claim to.
- Once the correct handler has been selected, click on the 'Assign Owner' button.
- The claim status will change from 'ClaimUnacknowledgedUnassigned' to 'ClaimUnacknowledgedRouted'.
- If the claim has not been registered on internal systems, then the 'Refer to FNOL' button should be used in order to route the claim to the FNOL team who will register the claim and add the claim number to iDAS CHOX, passing the claim back into the 'New Claims to be Assigned' work queue, where the above steps should be followed. Please note that the FNOL team that receives the claim for registration will be dependent on the workgroup that has

been selected, if the workgroup selected is incorrect, select the relevant workgroup before clicking on the 'Refer to FNOL' button.

- If the claim is to be rejected back to the Credit Hire Organisation, select a rejection reason using the 'Reason for Rejection' drop down menu and click on the button labelled 'Reject Claim'.

Additionally claims can be assigned an owner via a bulk update following the below method:

- Select the 'New Claims to be Assigned' work queue.
- The claims will all be displayed in the 'Claims Overview Grid'.
- Select the claims that you wish to route by checking the tick box next to each claim or alternatively select all claims by checking the tick box that appears along the top row.
- Click on the 'Batch Update' button.
- Select 'Assign Claim(s) Owner'. The following pop-up window will appear:

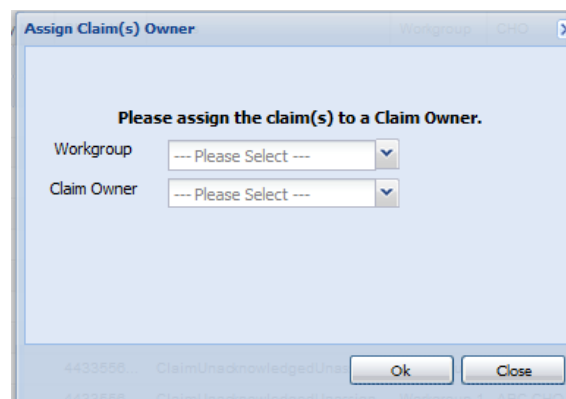

Figure 26

- Select the workgroup that the handler is assigned to using the 'Workgroup' drop down menu; once selected using the 'Claim Owner' drop down menu select the handler you wish to assign the claim to.
- Once the correct handler has been selected, click on the 'Ok' button.
- The claim status will now be 'ClaimUnacknowledgedRouted'.

4.3 Claims to be Registered (FNOL Handler, Insurer Admin)

The 'New Claims to be Registered' work queue contains all claims that have yet to be registered on the Insurer's internal system. This is required so that the correct claim number can be put onto the claim within iDAS CHOX for tracking/referencing purposes.

- Select each claim in turn from the queue and view the claim details.
- Review the details held on the internal system by looking the claim up using the data available in iDAS CHOX – Third Party VRN and/or Third Party Policy Number should be sufficient in order to locate the policyholder on internal systems.
- If the claim is not yet registered on internal systems, register the claim using the data available in iDAS CHOX and if applicable contact the policyholder. Once the claim has been registered, add the uniquely generated claim number using the 'Claim Number' field within iDAS CHOX.
- If the claim is already registered, then add the claim number using the 'Claim Number' field within iDAS CHOX.
- Add any supporting notes in the 'FNOL Review Note (If applicable)' field if required. If the claim cannot be registered please indicate this in the 'FNOL Review Note (if applicable)' field.
- Click on the 'Return Claim' button in order to pass the claim back to the relevant team/individual.

4.4 Claims Awaiting Acknowledgement (Claims Handler, Insurer Admin)

The 'Claims Awaiting Acknowledgement' work queue contains a list of new claims that need to be reviewed and a decision made on whether to acknowledge or reject the new claims.

- Select each claim in turn from the queue and view the claim details.
- Review the claim details held on iDAS CHOX against details stored on internal systems.
- A decision needs to be made at this stage on whether to acknowledge the claim, refer the claim to an Engineer, refer the claim to FNOL, make the decision later by pending the claim or reject the new claim back to the Credit Hire Organisation.
- Before making the appropriate decision enter any additional notes that are applicable and likely to benefit the Credit Hire Organisation or act as a general case note by way of the 'Notes' tab. Please note that notes can be of a private (seen only by internal staff) or public nature (seen by all users of the Credit Hire Organisation and internal staff).
- Whichever decision is reached, a 'Liability Status' must be selected before processing the claim and clicking on one of the buttons.
- If you are rejecting the claim, select a rejection reason using the 'Reason for Rejection' drop down menu and click on the 'Reject' button.
- If you are acknowledging the claim, click on the 'Acknowledge' button (this is not declaration that you are accepting the final hire amount submitted at the invoicing stage by the Credit Hire Organisation).
- If you want to make the decision later, click on the 'Claim Pending' button.
- If you cannot find details of the claim on the internal system, you may wish to send the claim to FNOL for registering. To do so, click on the 'Refer to FNOL' button.
- If you are referring the claim for specialist review, click on the 'Refer To Engineer' button.

4.5 Re-Submitted Claims Awaiting Acknowledgement (Claims Handler, Insurer Admin)

The 'Re-Submitted Claims Awaiting Acknowledgement' work queue contains a list of claims that have previously been rejected to the Credit Hire Organisation by the Insurer. The Credit Hire Organisation has reviewed the claim rejection and has made the decision to contest the claim rejection, with supporting notes accompanied.

- Select each claim in turn from the queue and view the claim details.
- Review the Credit Hire Organisation's notes as to why they are contesting the claim rejection, this may detail that amendments have been made to the claim detail.
- If applicable based on the Credit Hire Organisation's notes, review the claim details held on iDAS CHOX against details stored on internal systems.
- Once again, a decision needs to be made at this stage on whether to acknowledge the claim, refer the claim to an Engineer, refer the claim to FNOL, set the claim to claim pending, or reject the claim.
- Before making the appropriate decision enter any additional notes that are applicable and likely to benefit the Credit Hire Organisation or act as a general case note by way of the 'Notes' tab. Please note that notes can be of a private (seen only by internal staff) or public nature (seen by all users of the Credit Hire Organisation and internal staff).
- If you are rejecting the claim again, select a rejection reason using the 'Reason for Rejection' drop down menu and click on the 'Reject' button.
- If you are acknowledging the claim, click on the 'Acknowledge' button (this is not declaration that you are accepting the final hire amount submitted at the invoicing stage by the Credit Hire Organisation).
- If you want to make the decision later, click on the 'Claim Pending' button.
- If you cannot find details of the claim on the internal system, you may wish to send the claim to FNOL for registering. To do so, click on the 'Refer to FNOL' button.
- If you are referring the claim for specialist review, click on the 'Refer To Engineer' button.

4.6 Claim Pending (Claims Handler, Insurer Admin)

The 'Claim Pending' queue contains all claims where the claim has been marked as pending in order to wait before making a decision on whether to acknowledge the claim or not. The status of claims in this queue is 'ClaimPending'. The Insurer may wish to mark the claim as pending as the claim has been reviewed, with further information expected so the claim wants to be separated from the 'Claim Awaiting Acknowledgement' queue so that there is no duplication of claim reviews.

- Select each claim in turn from the queue and view the claim details.
- Review the claim details held on iDAS CHOX against details stored on internal systems.
- A decision needs to be made at this stage on whether to acknowledge the claim, refer the claim to an Engineer or reject the claim.
- Before making the appropriate decision, check the 'Notes' tab for information added from previous reviews and review the 'Attachments' tab for any supporting documentation that may have been provided.
- Enter any additional notes that are applicable and likely to benefit the Credit Hire Organisation or act as a general case note by way of the 'Notes' tab. Please note that notes can be of a private (seen only by internal staff) or public nature (seen by all users of the Credit Hire Organisation and internal staff).
- If you are rejecting the claim again, select a rejection reason using the 'Reason for Rejection' drop down menu and click on the 'Reject' button.
- If you are acknowledging the claim, click on the 'Acknowledge' button (this is not declaration that you are accepting the final hire amount submitted at the invoicing stage by the Credit Hire Organisation).
- If you are referring the claim for specialist review, click on the 'Refer To Engineer' button.

4.7 Claim Referred To Engineer (Specialist Claims Reviewer, Insurer Admin)

The 'Claims Referred To Engineer' work queue contains a list of claims that have been uploaded by the Credit Hire Organisation, reviewed by a handler and flagged for specialist review.

- Select each claim in turn from the queue and view the claim details.
- Navigate to the 'Notes' tab and review notes as to why the claim has been referred.
- Review the claim details and make notes in the 'Claim Review Notes' field that you wish to keep private from the Credit Hire Organisation.
- If applicable, navigate to the 'Notes' tab and add public notes for the benefit of the Credit Hire Organisation.
- Once you have completed the review process, click on the 'Acknowledge' button to progress the claim without updating the handler/team, or use the 'Update Claims Handler' button to notify a handler/team of the note/action made.

4.8 Claim Updated by Engineer (Claims Handler, Insurer Admin)

Once a claim has been updated by an Engineer, it will appear in the handler's 'Claims Updated by Engineer' queue. The handler will then need to review the notes added by the Engineer and decide at this point whether to reject, acknowledge, refer or await a decision on the claim.

- Select each claim in turn from the queue and view the claim details.
- Navigate to the 'Notes' tab to see what notes have been made by the Engineer.
- A decision needs to be made at this stage on whether to acknowledge the claim, refer the claim back to an Engineer, make the decision later by pending the claim or reject the claim.
- Before making the appropriate decision enter any additional notes that are applicable and likely to benefit the Credit Hire Organisation or act as a general case note by way of the 'Notes' tab. Please note that notes can be of a private (seen only by internal staff) or public nature (seen by all users of the Credit Hire Organisation and internal staff).
- If you are rejecting the claim again, select a rejection reason using the 'Reason for Rejection' drop down menu and click on the 'Reject' button.
- If you are acknowledging the claim, click on the 'Acknowledge' button (this is not declaration that you are accepting the final hire amount submitted at the invoicing stage by the Credit Hire Organisation).
- If you are referring the claim for specialist review again, click on the 'Refer To Engineer' button.
- If you want to make the decision later, click on the 'Claim Pending' button.

4.9 Hire Update Notifications/Warnings (Claims Handler, Insurer Admin)

The 'Hire Update Notifications/Warnings' work queue contains a list of all claims that have had 'fundamental' changes regarding the monitoring of the repair/hire and/or estimated date of completion regarding the vehicle repair. These claims come through into a user's queue as soon as the update is made by the Credit Hire Organisation.

The claims will sit in this queue until one of two things happen. Either, the handler reviews the claim and removes all of the update notifications or the claim is progressed by the Credit Hire Organisation to the status 'AwaitingInvoiceData'.

- Select each claim in turn from the queue and view the claim details.
- The yellow warning box contained within the 'Hire Update/Warning Notification' action panel as shown below in figure 27 displays what type of hire update has occurred against the claim in question.

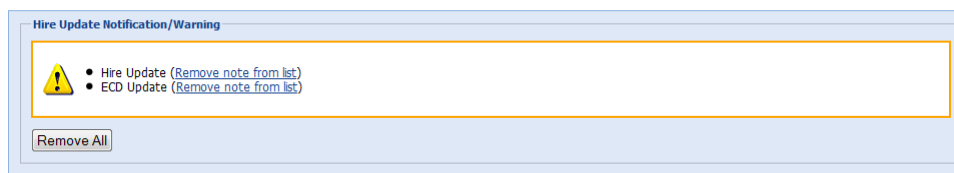

Figure 27

- Navigate to the 'Hire Monitoring' tab and review the changes made and if applicable the reason why this update has occurred.
- A decision needs to be made as to whether to follow the update up with the Credit Hire Organisation or the repairer. This action is conducted outside of the iDAS CHOX system but the Insurer should include any relevant notes to the claim in question using the 'Notes' tab for review purposes at the invoicing stage, these notes should be of a private nature.
- The lifecycle of the claim continues as normal regardless of the Insurer's action, but will enable swift investigation/action to take place.

4.10 Escalated Invoices (Specialist Claims Reviewer, Insurer Admin)

The 'Escalated Invoices' work queue contains a list of invoices that have been uploaded by the Credit Hire Organisation and have subsequently failed one or more of the Engineer type rules/tests as applied by the Business Rules Engine. The Engineer will need to review the 'History' tab for details on why the claim has failed the business rules and decide on whether to progress the claim for payment, refer the claim to a handler or reject the claim back to the Credit Hire Organisation.

- Select each claim in turn from the queue and view the claim details.
- Navigate to the 'History' tab and review which of the business rules have failed.
- Based on the reason(s) for the invoice failure from the Business Rules Engine as detailed on the 'History' tab review the claim and invoice details and any supporting notes detailed on the 'Notes' tab, as well as reviewing any relevant attachments that the Credit Hire Organisation may have supplied.
- A decision needs to be made to reject the invoice, refer the invoice to a handler or clear the invoice for payment.
- To reject the invoice follow the below steps:
 - Navigate to the 'Notes' tab and add any additional notes as required. If you require sight of the payment pack then you should include this request on the notes tab.
 - On the 'Escalated Invoice - Action Required' window pane, select the reason for the invoice rejection using the pre-populated 'Reason for Rejection' drop down menu and then click on the 'Reject Invoice' button.
- To accept the invoice follow the below steps:
 - Navigate to the 'Notes' tab and add any notes that may prove useful when making the payment for the claim.
 - On the 'Escalated Invoice - Action Required' window pane, click on the 'Clear For Payment' button to clear the invoice for payment.
- To refer the invoice to a handler follow the below steps:
 - Navigate to the 'Notes' tab and add any notes you may have for the handler.
 - On the 'Escalated Invoice - Action Required' window pane, click on the 'Refer To Claims Handler' button.

4.11 Escalated Invoices to Handler (Claims Handler, Insurer Admin)

The 'Escalated Invoices to Handler' work queue contains a list of invoices that have been uploaded by the Credit Hire Organisation and have subsequently failed one or more of the handler type rules/tests as applied in the Business Rules Engine. The handler will need to review the 'History' tab for details on why the claim has failed the business rules and decide on whether to progress the claim for payment, refer the claim to an Engineer or reject the claim back to the Credit Hire Organisation.

- Select each claim in turn from the queue and view the claim details.
- Navigate to the 'History' tab and review which of the business rules have failed.
- Based on the reason(s) for the invoice failure from the Business Rules Engine as detailed on the 'History' tab review the claim and invoice details and any supporting notes detailed on the 'Notes' tab, as well as reviewing any relevant attachments that the Credit Hire Organisation may have supplied.
- A decision needs to be made to reject the invoice, clear the invoice for payment or refer the claim to an Engineer.
- To reject the invoice follow the below steps:
 - Navigate to the 'Notes' tab and add any additional notes as required. If you require sight of the payment pack then you should include this request on the notes tab.

- On the 'Invoice Escalated To Claim Handler - Action Required' window pane, select the reason for the invoice rejection using the pre-populated 'Reason for Rejection' drop down menu and then click on the 'Reject Invoice' button.
- To accept the invoice follow the below steps:
 - Navigate to the 'Notes' tab and add any notes that may prove useful when making the payment for the claim.
 - On the 'Invoice Escalated To Claims Handler - Action Required' window pane, click on the 'Clear For Payment' button to clear the invoice for payment.
- To refer the invoice to an Engineer, follow the below steps:
 - Navigate to the 'Notes' tab and add any notes for the Engineer to support the referral.
 - On the 'Invoice Escalated To Claims Handler- Action Required' window pane, click on the 'Refer To Engineer' button.

4.12 Invoice Referred by Claims Handler (Specialist Claims Reviewer, Insurer Admin)

When an Invoice has been referred by a handler to an Engineer, it will appear in the 'Invoice Referred by Claims Handler' work queue, with the status 'InvoiceReferredToEngineer'. The Engineer will need to review the 'History' and 'Notes' tabs for details on why the invoice has been referred to them and decide on whether to progress the invoice for payment, refer the invoice back to the handler or reject the invoice back to the Credit Hire Organisation.

- Select each claim in turn from the queue and view the claim details.
- Navigate to the 'History' tab and check to see whether any of the applied business rules have failed.
- Navigate to the 'Notes' tab and check to see what information has been added by the handler to support the referral.
- A decision needs to be made to reject the invoice, clear the invoice for payment or send the invoice back to the handler.
- To reject the invoice follow the below steps:
 - Navigate to the 'Notes' tab and add any additional notes as required. If you require sight of the payment pack then you should include this request on the notes tab.
 - On the 'Referred Invoice - Action Required' window pane, select the reason for the invoice rejection using the pre-populated 'Reason for Rejection' drop down menu and then click on the 'Reject Invoice' button.
- To accept the invoice follow the below steps:
 - Navigate to the 'Notes' tab and add any notes that may prove useful when making the payment for the claim.
 - On the 'Referred Invoice - Action Required' window pane, click on the 'Clear For Payment' button to clear the invoice for payment.
- To refer the invoice back to a handler, follow the below steps:
 - Navigate to the 'Notes' tab and add any notes for handler as appropriate.
 - On the 'Referred Invoice - Action Required' window pane, click on the 'Refer To Claims Handler' button to send the claim back to a handler.

4.13 Invoice Referred by Engineer (Claims Handler, Insurer Admin)

Once an Engineer has reviewed an invoice and sent it to a handler for review, the status will be 'InvoiceReferredToClaimsHandler' and will appear in the handler's 'Invoices Referred By Engineer' work queue. The handler needs to decide on whether to progress the invoice for payment, refer the invoice back to the Engineer or reject the invoice back to the Credit Hire Organisation.

- Select each claim in turn from the queue and view the claim details.
- Navigate to the 'History' tab and check to see whether any of the applied business rules have failed.
- Navigate to the 'Notes' tab and review any notes added by the Engineer regarding this claim/invoice.
- A decision needs to be made to reject the invoice, clear the invoice for payment or refer the invoice back to an Engineer.
- To reject the invoice follow the below steps:
 - Navigate to the 'Notes' tab and add any additional notes as required. If you require sight of the payment pack then you should include this request on the notes tab.
 - On the 'Invoice Referred By Engineer- Action Required' window pane, select the reason for the invoice rejection using the pre-populated 'Reason for Rejection' drop down menu and then click on the 'Reject Invoice' button.
- To accept the invoice follow the below steps:
 - Navigate to the 'Notes' tab and add any notes that may prove useful when making the payment for the claim.
 - On the 'Invoice Referred By Engineer- Action Required' window pane, click on the 'Clear for payment' button to clear the invoice for payment.
- To refer the invoice back to an Engineer, follow the below steps:
 - Navigate to the 'Notes' tab and add any notes for the Engineer as appropriate.
 - On the 'Invoice Referred By Engineer- Action Required' window pane, click on the 'Refer To Engineer' button to send the claim/invoice back to an Engineer for further review.

4.14 Contested Invoices Referred To Insurer (Claims Handler, Insurer Admin)

The 'Contested Invoices Referred To Insurer' work queue contains a list of claims that have previously been rejected back to the Credit Hire Organisation by the Insurer. The Credit Hire Organisation has contested the claim/invoice rejection, the claim/invoice may have been amended, a payments pack may have been attached or notes added to the claim.

- Select each claim in turn from the queue and view the claim details.
- Navigate to the 'History' tab and check to see whether any of the applied business rules have failed.
- Navigate to the 'Notes' tab and review notes as to why the Credit Hire Organisation is contesting the claim/invoice rejection.
- Based on the reason(s) for the claim/invoice failure from the Business Rules Engine (if applicable) as detailed on the 'History' tab and the notes supplied by the Credit Hire Organisation, review the claim and invoice details held in iDAS CHOX. Review any relevant attachments that the Credit Hire Organisation may have supplied.
- A decision needs to be made to reject the invoice, clear the invoice for payment or refer the invoice to an Engineer.
- To reject the invoice follow the below steps:
 - Navigate to the 'Notes' tab and add any additional notes as required. If you require sight of the payment pack then you should include this request on the notes tab.

- On the 'Contested Invoice - Action Required' window pane, select the reason for the invoice rejection using the pre-populated 'Reason for Rejection' drop down menu and then click on the 'Reject Invoice' button.
- To accept the invoice follow the below steps:
 - Navigate to the 'Notes' tab and add any notes that may prove useful when making the payment for the claim.
 - On the 'Contested Invoice - Action Required' window pane, click on the 'Clear for payment' button to clear the invoice for payment.
- To refer the invoice to an Engineer, follow the below steps:
 - Navigate to the 'Notes' tab and add any notes for the Engineer as appropriate.
 - On the 'Contested Invoice - Action Required' window pane, click on the 'Refer To Engineer' button to send the claim/invoice to an Engineer for review.

4.15 Invoices Approved By BRE (Claims Handler, Insurer Admin)

The 'Invoices Approved By BRE' work queue contains a list of claims/invoices that have been uploaded by the Credit Hire Organisation and have subsequently passed all of the tests applied in the Business Rules Engine.

- Select each claim in turn from the queue and view the claim details.
- Navigate to the 'Notes' tab and review to see if there are any significant notes logged against the claim since its origin in iDAS CHOX.
- A decision needs to be made to reject the invoice, clear the invoice for payment or refer the invoice for review by an Engineer.
- To reject the invoice follow the below steps:
 - Navigate to the 'Notes' tab and add any additional notes as required. If you require sight of the payment pack then you should include this request on the notes tab.
 - On the 'BRE Approved Claim - Action Required' window pane, select the reason for the invoice rejection using the pre-populated 'Reason for Rejection' drop down menu and then click on the 'Reject Invoice' button.
- To clear the invoice for payment follow the below steps:
 - Navigate to the 'Notes' tab and add any notes that may prove useful when making the payment for the claim.
 - On the 'BRE Approved Claim - Action Required' window pane, click on the 'Clear for payment' button to clear the invoice for payment.
- To refer the invoice to an Engineer, follow the below steps:
 - Navigate to the 'Notes' tab and add any notes for the Engineer as appropriate.
 - On the 'BRE Approved Claim - Action Required' window pane, click on the 'Refer To Engineer' button to send the claim/invoice to an Engineer for review.

Additionally claims can be processed via a bulk update following the below method:

- Click on the hyperlink/queue for 'Invoices Approved By BRE' (1).
- Tick the box to the left of the 'Supplier Ref' column for all of the claims you want to update (2) (this will turn the selected row(s) blue).
- Click on the 'Batch Update' drop down menu (3).
- Select 'Approve Claim(s) For Payment' (4).

Figure 29

- Once selected, a pop-up message will be displayed (shown in figure 30). To continue, click on the 'OK' button and to cancel, click on the 'Cancel' button.
- This will move all the selected claims to the status 'AwaitingInvoicePayment'.

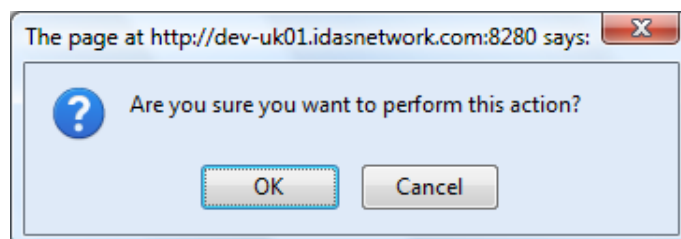

Figure 30

4.16 Approved Invoices Awaiting Payment (Payments Clerk, Claims Handler, Insurer Admin)

The 'Approved Invoices Awaiting Payment' work queue contains a list of claims/invoices that have been reviewed and approved for payment and therefore require payment on the Insurer's internal payment system. The Insurer is required to update iDAS CHOX when the payment has been logged on the internal payment system.

- There are two ways to make payments for claims held in iDAS CHOX.
- The claim by claim method is as follows:
 - Select each claim in turn from the 'Approved Invoices Awaiting Payment' work queue and view the claim details.
 - Navigate to the 'Notes' tab and review any relevant payment notes that may have been added during the life of the claim in the system.
 - Open your internal payments system and perform a search against the Claim Number in question.
 - Log the payment for the claim in question using the data held on the 'Invoice Details' tab within iDAS CHOX.
 - Once the payment has been made on the internal payment system, switch back to iDAS CHOX and click on the 'Invoice Payment Logged' button that is located on the 'Invoice ready for payment - Action Required' window pane when viewing the claim detail for the claim in question.
 - Add any supporting notes regarding the payment using the 'Notes' tab.

Additionally claims can be processed via a bulk update following the below method:

- Click on the hyperlink/queue for 'Approved Invoices Awaiting Payment' (1).
- Tick the box to the left of the 'Supplier Ref' column for all of the claims you want to update (2) (this will turn the selected row(s) blue).
- Click on the 'Batch Update' drop down menu (3).
- Select 'Update Claim(s) To Invoice Payment Logged' (4).

Figure 32

- Once selected, a pop-up message will be displayed (shown in figure 33). To continue, click on the 'OK' button and to cancel, click on the 'Cancel' button.
- This will move all the selected claims to the status 'InvoicePaymentLogged'.

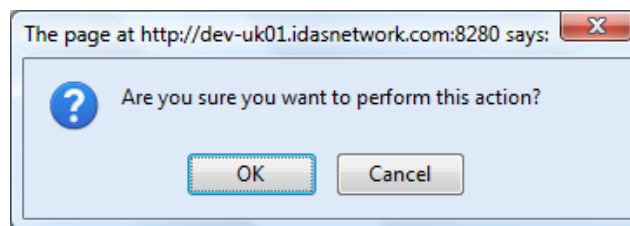

Figure 33

4.17 Approved Invoices Awaiting Liability Resolution (Claims Handler, Insurer Admin)

The 'Approved Invoices Awaiting Liability Resolution' work queue contains a list of claims/invoices that have been cleared for payment, however liability has not yet been agreed between the Insurer and the Credit Hire Organisation. Claims will remain in this queue until an agreed stance on liability has been reached. To progress a claim at this status, you must follow these steps:

- Open the claim you want to look at in more detail by clicking on the 'Supplier Ref' hyperlink from the claim overview grid.
- This will open the claim and will present you with all the information required in order to progress the claim.
- Open your internal claims system and check the details on file against this claim. Using the 'Liability Status' drop down box, select the appropriate liability status.
 - If liability is now accepted in full, select 'Full Liability Accepted'. This will automatically set the 'Liability Percentage Agreed' to 100% on the Insurer side.
 - If you do not have enough information to make a decision, then select 'Liability Unknown' and the claim will remain in this queue.
 - If liability is disputed, then select 'Liability Disputed' and add a note to the claim, the claim will remain in this queue.
 - If liability is repudiated, select 'Liability Repudiated', the claim will remain in this queue.
 - If liability is split, select 'Liability Split'. This will automatically set the 'Liability Percentage Agreed' to 50% on the Insurer side and 50% on the CHO side. This can be modified accordingly.
 - If indemnity is not granted but a decision has been made to make a payment anyway then select 'Proceed Without Prejudice', entering the relevant split values if applicable

5 More Actions

Depending on the role of the user and the status of a claim, a 'More Actions' drop down menu will be available to a user in order to allow them certain functionality that is relevant to them. The 'More Actions' drop down menu is located below the 'Claim Summary' pane as shown in figure 34 below.

The screenshot shows a 'Claim Summary' pane with the following details:

Third Party Insurer	ABC Insurer	Credit Hire Organisation	ABC CHO	Created By	Claims Handler (ABC CHO)
Supplier Reference	CHOX1018	Insurer Claim Number	20110000065	Created On	29 Mar 2010 11:48
Customer	Mr James Jackson	Current Status	InvoiceEscalatedToHandler	Policy Holder Contact Date	01 Jan 2010 00:00
Claim Owner	Claims Handler	Workgroup	Workgroup 1	Indemnity Value	£0.00
Liability Status	Full Liability Accepted	Percentage Liability Agreed (Insurer)	100.00%	Percentage Liability Agreed (CHO)	0%
Liability Agreed Date	29/03/2010				

At the bottom of the pane, there is a link 'Back to Search Results', a dropdown menu labeled '-- More Actions --' (highlighted with a red box), and a link 'Export Claim To Excel'.

Figure 34

There are several different actions that can be performed within the 'More Actions' drop down menu, as stated above this is dependent on the role of the user and the status of the claim.

5.1 Update Workgroup/Claim Owner (Insurer Admin, Claim Ownership Manager)

Updating the claim ownership allows the Claim Ownership Manager to remove the current owner and re-assign the claim to another handler, even if the handler is assigned to a different workgroup. This can be achieved by using the screen as shown in figure 35 below.

The screenshot shows a screen titled 'Update Workgroup/Claim Owner - Action Required'. It contains an information icon and the following text: 'Update the Workgroup or Claim Owner by using the drop down menus provided below, selecting a Workgroup will determine which Claims Handlers are displayed in the Claim Owner drop down menu.'

Below this text, there are two dropdown menus:

- Workgroup: Workgroup 1
- Claim Owner: Handler Claims

At the bottom left, there is an 'Update' button.

Figure 35

5.2 Re-Assign Workgroup (Insurer Admin, Claim Ownership Manager)

iDAS CHOX uses an automatic routing system (assigning the claim to a workgroup) for when a claim is uploaded by a Credit Hire Organisation as described in section 4.1. It is possible that a claim could be assigned to the incorrect workgroup through this automatic routing or indeed a user could manually assign a claim to a workgroup incorrectly. If it is discovered that a claim should have gone to a different workgroup, a Claim Ownership Manager will be able to use the 'More Actions' drop down menu and select 'Re-Assign Workgroup'. Once this option has been selected from the drop down menu the following screen will appear and the Claim Ownership Manager will then be able to re-assign the claim to the correct workgroup from the list of available workgroups.

The screenshot shows a screen titled 'Re-assign Workgroup - Action Required'. It contains an information icon and the following text: 'If the claim has been incorrectly assigned to this workgroup, please select the correct Workgroup from the selection list below.'

Below this text, there is a dropdown menu labeled 'Workgroup : --- Please Select ---'.

At the bottom, there is a 'Re-assign Workgroup' button.

Figure 36

5.3 Update Insurer Claim Number (Insurer Admin, Claims Handler)

If a claim has been assigned an incorrect claim number, iDAS CHOX allows for a Claims Handler to update the claim number within iDAS CHOX.

To update the claim number, click on the 'More Actions' drop down menu and select 'Update Insurer Claim Number'. The screen as shown in figure 37 below will be displayed.

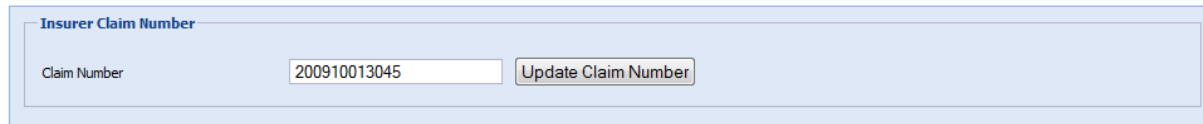

Figure 37

The user can then edit the claim number from within the 'Claim Number' field and save the changes by clicking on 'Update Claim Number' button.

5.4 Update Liability (Insurer Admin, Claims Handler)

By clicking on the 'Update Liability' option from the 'More Actions' drop down menu, an action panel will appear below, allowing you to update liability for the claim in question.

- Select the new liability status from the 'Liability Status' drop down menu (1).
- Change the 'Liability Percentage Agreed' fields if required (the sum of both fields must not exceed 100%) (2).
- Add any relevant notes in the 'Claim Review Notes' text box (3).
- Click on the 'Update Liability' button to save the new liability status (4).

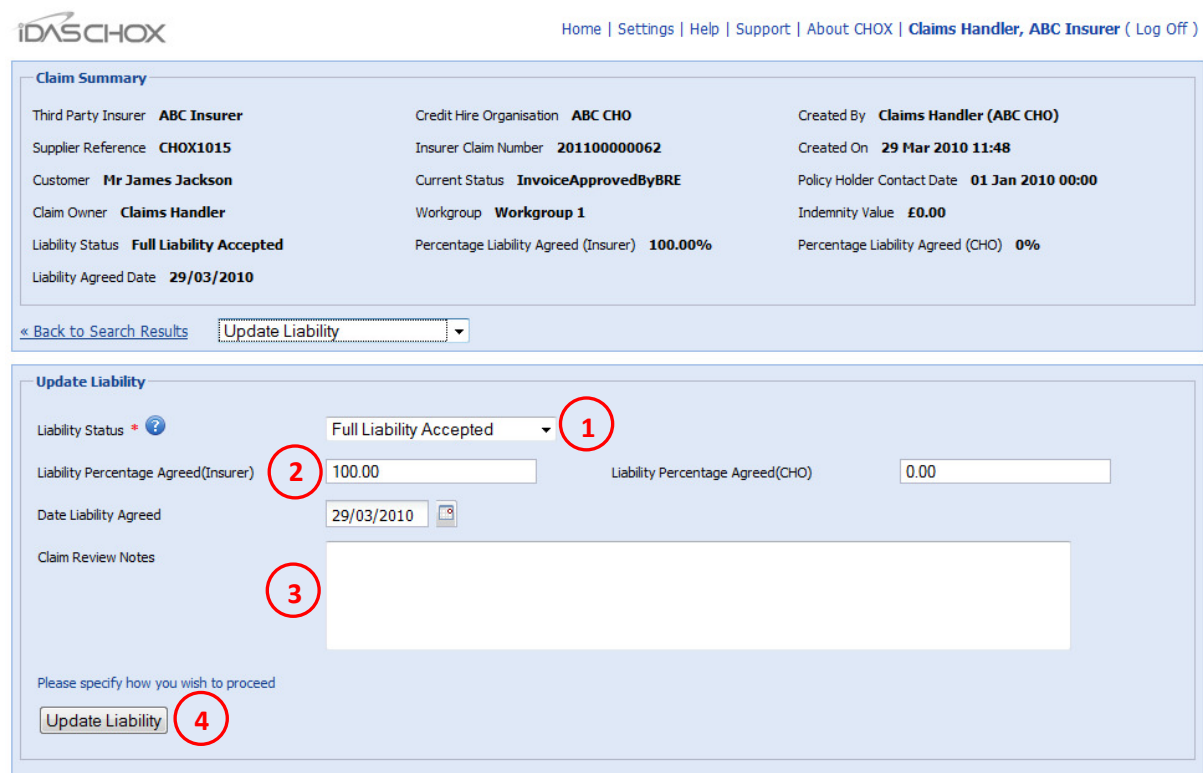

Figure 38

6 Miscellaneous Features

6.1 Revert Status Button

When the claim is of a certain status, a button labelled 'Revert Status' will become available located on the 'Claim Summary' pane as shown in figure 39 below.

The screenshot shows the 'iDAS CHOX' interface. At the top right, there is a navigation bar with links: Home | Settings | Help | Support | About CHOX | **Claims Handler, ABC Insurer** (Log Off). The main content area is titled 'Claim Summary' and contains a table of claim details:

Third Party Insurer	ABC Insurer	Credit Hire Organisation	ABC CHO	Created By	Claims Handler (ABC CHO)
Supplier Reference	CHOX1022	Insurer Claim Number	201100001022	Created On	29 Mar 2010 18:17
Customer	Mr James Jackson	Current Status	InvoicePaymentLogged	Policy Holder Contact Date	01 Jan 2010 00:00
Claim Owner	Claims Handler	Workgroup	Workgroup 1	Indemnity Value	£0.00
Liability Status	Full Liability Accepted	Percentage Liability Agreed (Insurer)	100.00%	Percentage Liability Agreed (CHO)	0%
Liability Agreed Date	29/03/2010				

At the bottom right of the table is a button labeled 'Revert Status'. Below the table, there is a navigation bar with a link '« Back To Search Results', a dropdown menu 'More Actions --', and a link 'Export Claim To Excel'.

Figure 39

When this button is clicked, the status of the claim will change back to the previous status, if we were to take the example above for figure 39, the current status of the claim is 'InvoicePaymentLogged', clicking on the 'Revert Status' button will take the claim back to the previous status 'AwaitingInvoicePayment'.

6.2 Export Claim To Excel Hyperlink

When you open the details of a claim, you will see that there is a hyperlink labelled 'Export Claim To Excel', when this hyperlink is clicked, all of the details of the claim you currently have open will be exported into a Microsoft Excel file, to open the Microsoft Excel report click on the 'Open' button and to save the Microsoft Excel report click on the 'Save' button and choose a location of where to save the report and click on the 'Save' button.

6.3 Back To Search Results Hyperlink

When you open the details of a claim, you will see that there is a hyperlink labelled 'Back To Search Results', when this hyperlink is clicked you will be taken back to the screen/menu you were on before you opened the claim. For example, if you performed a search and opened a claim from the list of search results, clicking on the 'Back To Search Results' hyperlink would take you back to the search results on the 'Search' screen.

7 Business Rules Engine Tests and Messages

As discussed throughout this user guide, iDAS CHOX has a purpose built Business Rules Engine which performs a series of rules on the claim and invoice data that a Credit Hire Organisation submits. Each claim is processed through the Business Rules Engine and the result can be one of four, with the result directly affecting the status of the claim and thus which work queue the claim is routed to.

The four results from the Business Rules Engine are as follows:

Invoice Data Calculation Incorrect – When rules 1-14 fail. The Credit Hire Organisation has an action to amend the invoice detail at which the calculated error is occurring, when the modifications have been made, the claim/invoice will be re-submitted into the Business Rules Engine where all of the below tests will be evaluated again.

Invoice Escalated To Handler – When rules 15-33 fail. The Insurer's handler(s) has an action to review the reason for failure as displayed on the 'History' tab and review the claim/invoice detail and make a decision to clear the invoice for payment, reject the invoice back to the Credit Hire Organisation or refer the invoice to an Engineer.

Invoice Escalated – When rules 34-40 fail. The Insurer's Specialist Claims Reviewer (Engineer) has an action to review the reason for failure as displayed on the 'History' tab and review the claim/invoice detail and make a decision to clear the invoice for payment, reject the invoice back to the Credit Hire Organisation or refer the invoice to a handler.

Invoice Approved By BRE – When rules 1-40 pass. The Insurer is required to review the claim/invoice detail and make a decision on whether to clear the invoice for payment, refer the invoice to a Specialist Claims Reviewer (Engineer) or reject the invoice back to the Credit Hire Organisation.

The following rules are performed on the submitted data, with a brief description on each:

Rule Number: 1

Rule: This rule is used to check that the amount paid by RSA upfront for the Claims Handling fee matches the amount discounted off the hire invoice. This ensures that the Insurer are not paying the Claims Handling fee twice or paying more than required.

Rule Failure Message: "The sum of Claims Handling Invoice Amount and Less Claims Handling Fee does not equate to 0"

Rule Failure Status: Invoice Data Calculation Incorrect

Rule Number: 2

Rule: This rule is used to check that Credit Hire Organisations that are participating in the Delegated Authority scheme are not offering an additional discount off the 'Total Gross'.

Rule Failure Message: "CHO is on DA scheme. Discount should be 0."

Rule Failure Status: Invoice Data Calculation Incorrect

Rule Number: 3

Rule: This rule checks that the Credit Hire Organisation has applied the correct discount off the 'Total Gross' field. The discount should equate to the VAT of the agreed Claims Handling amount.

Rule Failure Message: "Discount calculation is incorrect."

Rule Failure Status: Invoice Data Calculation Incorrect

Rule Number: 4

Rule: This rule is used to ensure that the Credit Hire Organisation has calculated the 'Hire Gross' field correctly and simple mathematics has been applied appropriately.

Rule Failure Message: "Hire Gross calculation is incorrect."

Rule Failure Status: Invoice Data Calculation Incorrect

Rule Number: 5

Rule: This rule is used to ensure that the Credit Hire Organisation has calculated the 'Hire VAT' field correctly and simple mathematics has been applied appropriately.

Rule Failure Message: "Hire VAT calculation is incorrect."

Rule Failure Status: Invoice Data Calculation Incorrect

Rule Number: 6

Rule: This rule is used to ensure that the Credit Hire Organisation has calculated the 'Repair VAT' field correctly and simple mathematics has been applied appropriately.

Rule Failure Message: "Repair VAT calculation is incorrect."

Rule Failure Status: Invoice Data Calculation Incorrect

Rule Number: 7

Rule: This rule is used to ensure that the Credit Hire Organisation has calculated the 'Repair Gross' field correctly and simple mathematics has been applied appropriately.

Rule Failure Message: "Repair Gross calculation is incorrect."

Rule Failure Status: Invoice Data Calculation Incorrect

Rule Number: 8

Rule: This rule is used to ensure that the Credit Hire Organisation has calculated the 'Total Net' field correctly and simple mathematics has been applied appropriately.

Rule Failure Message: "Total Net calculation is incorrect."

Rule Failure Status: Invoice Data Calculation Incorrect

Rule Number: 9

Rule: This rule is used to ensure that the Credit Hire Organisation has calculated the 'Total VAT' field correctly and simple mathematics has been applied appropriately.

Rule Failure Message: "Total VAT calculation is incorrect."

Rule Failure Status: Invoice Data Calculation Incorrect

Rule Number: 10

Rule: This rule is used to ensure that the Credit Hire Organisation has calculated the 'Total Gross' field correctly and simple mathematics has been applied appropriately.

Rule Failure Message: "Total Gross calculation is incorrect."

Rule Failure Status: Invoice Data Calculation Incorrect

Rule Number: 11

Rule: This rule is used to ensure that the Credit Hire Organisation has calculated the 'Total to Pay' field correctly and simple mathematics has been applied appropriately.

Rule Failure Message: "Total to Pay calculation is incorrect."

Rule Failure Status: Invoice Data Calculation Incorrect

Rule Number: 12

Rule: This rule is used to ensure that dates around the hire period are logical and the accuracy of data submitted by the Credit Hire Organisation is to the agreed high standard.

Rule Failure Message: "The number of Hire Days billed does not reconcile with the Hire Start and Hire End dates provided."

Rule Failure Status: Invoice Data Calculation Incorrect

Rule Number: 13

Rule: Test to ensure that the Credit Hire Organisation is charging the correct administration fee based on the services they have provided i.e. credit hire only or credit hire and credit repair administration services.

Rule Failure Message: "The Admin Fee billed is too high"

Rule Failure Status: Invoice Data Calculation Incorrect

Rule Number: 14

Rule: This rule checks that the Credit Hire Organisations that are not participating in the Delegated Authority scheme are not invoicing with entries against fields that relate to the Claims Handling invoice and therefore a possible deduction off the amount to be paid by the Insurer.

Rule Failure Message: "Entries against Claims Handling Invoice Amount and Less Claims Handling Fee are not 0."

Rule Failure Status: Invoice Data Calculation Incorrect

Rule Number: 15

Rule: Check against the vehicle class of the non-fault driver's vehicle against the replacement vehicle class supplied to the non-fault by the Credit Hire organisation, check for a like for like match.

Rule Failure Message: "Vehicle class allocated for hire is not a like for like match on the customer's vehicle class."

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 16

Rule: Check to ensure that the Credit Hire Organisation have billed the correct daily rate for the replacement vehicle class as per the suggested ABI GTA rate.

Rule Failure Message: "Daily rate billed for replacement vehicle class exceeds ABI rate."

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 17

Rule: Test against the 'Hire Net' billed by the Credit Hire Organisation against the 'Hire Net' ceiling value (maximum) held against the Credit Hire Organisation who submitted the invoice.

Rule Failure Message: "Hire Net billed exceeds the CHO's Hire Net ceiling."

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 18

Rule: Test against the 'Number of Hire Days' billed by the Credit Hire Organisation against the 'Number of Hire Days' ceiling amount (maximum) held against the Credit Hire Organisation who submitted the invoice.

Rule Failure Message: "Number of hire days billed by the CHO exceeds the CHO's hire days ceiling."

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 19

Rule: This rule looks at Estimated Completion Date's (ECD's) provided by the Credit Hire Organisation and takes into account an agreed set of constants e.g. weekend buffers to calculate an allowable threshold for number of days hire. Rule compares the calculated allowable threshold against the 'Number of Hire Days' billed by the Credit Hire Organisation. This rule is not applied to Total Loss cases.

Rule Failure Message: "Number Number of hire days billed by the CHO exceeds the allowable days threshold (non total loss), taking into account the ECD(s) provided by the CHO and the additional days allowed through delay variables"

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 20

Rule: This rule looks for multiple claims against one Vehicle Registration Number (VRN). This scenario is valid and can be deemed un-fraudulent but a review is necessary.

Rule Failure Message: "The Customer's Vehicle Registration Number supplied already exists in the system."

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 21

Rule: This rule looks to see if the claim was flagged at the claim notification stage for a manual invoice review regardless as to the results of all the other rules.

Rule Failure Message: "The claim was marked for a manual invoice review at the claim notification stage"

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 22

Rule: This rule looks to see if the Credit Hire Organisation has booked the repair of the non-fault driver's vehicle in on a Friday, Saturday, Sunday or Bank Holiday.

Rule Failure Message: "Repair was booked in on a [As appropriate -Friday/Saturday/Sunday/Bank Holiday]"

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 23

Rule: This rule is used to monitor charges for the 'Automatic Fee'. The rule will fail if the Credit Hire Organisation is making a charge against this extra.

Rule Failure Message: "The CHO is charging an automatic fee for the hire, please review need"

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 24

Rule: This rule is used to monitor charges for the 'Estate Fee'. The rule will fail if the Credit Hire Organisation is making a charge against this extra.

Rule Failure Message: "The CHO is charging an estate fee for the hire, please review need"

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 25

Rule: This rule is used to monitor charges for the 'Non Standard Risk Insurance Premium Fee'. The rule will fail if the Credit Hire Organisation is making a charge against this extra.

Rule Failure Message: "The CHO is charging a non-standard risk insurance premium fee for the hire, please review need"

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 26

Rule: This rule is used to monitor charges for the 'Collision Damage Waiver Fee'. The rule will fail if the Credit Hire Organisation is making a charge against this extra.

Rule Failure Message: "The CHO is charging a collision damage waiver fee for the hire, please review need"

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 27

Rule: This rule is used to monitor charges for the 'Satellite Navigation Fee'. The rule will fail if the Credit Hire Organisation is making a charge against this extra.

Rule Failure Message: "The CHO is charging a satellite navigation fee for the hire, please review need"

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 28

Rule: This rule is used to monitor charges for the 'Baby Seat Fee'. The rule will fail if the Credit Hire Organisation is making a charge against this extra.

Rule Failure Message: "The CHO is charging a baby seat fee for the hire, please review need"

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 29

Rule: This rule is used to monitor charges for the 'Tow Bar Fee'. The rule will fail if the Credit Hire Organisation is making a charge against this extra.

Rule Failure Message: "The CHO is charging a tow bar fee for the hire, please review need"

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 30

Rule: This rule is used to monitor charges for the 'Roof Rack Fee'. The rule will fail if the Credit Hire Organisation is making a charge against this extra.

Rule Failure Message: "The CHO is charging a roof rack fee for the hire, please review need"

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 31

Rule: This rule is used to monitor charges for the 'Vehicle Delivery/Collection Fee'. The rule will fail if the Credit Hire Organisation is making a charge against this extra.

Rule Failure Message: "The CHO is charging a delivery/collection fee for the hire, please review need"

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 32

Rule: This rule is used to monitor charges for the 'Dual Control Fee'. The rule will fail if the Credit Hire Organisation is making a charge against this extra.

Rule Failure Message: "The CHO is charging a dual control fee for the hire, please review need"

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 33

Rule: This rule compares the 'Hire Net' billed by the Credit Hire Organisation against the 'Hire Net' ceiling value (maximum) for the specific vehicle class of the hire vehicle. This rule uses a pre-calculated average 'Hire Net' for each ABI GTA vehicle class as the ceiling check.

Rule Failure Message: "The Hire Net billed £[Billed Amount] exceeds the Hire Net ceiling of £[Value Set] for vehicle class [Class]"

Rule Failure Status: Invoice Escalated To Handler

Rule Number: 34

Rule: This rule looks at the estimated days under repair as indicated by the Engineer, takes into account an agreed set of constants e.g. weekend buffer to calculate an allowable threshold for number of days hire. This rule compares the allowable threshold against the 'Number of Hire Days' billed by the Credit Hire Organisation. This rule is not applied to Total Loss cases.

Rule Failure Message: "Number of hire days billed exceeds the allowable threshold (non total loss) with the inclusion of the Engineer's Estimated Days Under Repair".

Rule Failure Status: Invoice Escalated

Rule Number: 35

Rule: This rule compares the 'Number of Hire Days' billed by the Credit Hire Organisation against the agreed set of variables that make up the total allowable hire days threshold for a vehicle that is a Total Loss. This rule only applies to Total Loss cases.

Rule Failure Message: "Hire Days Does Not Exceed Total Loss Inspection Number of hire days billed exceeds the allowable threshold (for total loss hires)."

Rule Failure Status: Invoice Escalated

Rule Number: 36

Rule: Test against the 'Repair Net' billed by the Credit Hire Organisation against the 'Repair Net' ceiling value (maximum) held against the Credit Hire Organisation who submitted the invoice.

Rule Failure Message: "Repair Net billed exceeds the CHO's Repair Net ceiling. "

Rule Failure Status: Invoice Escalated

Rule Number: 37

Rule: This rule looks at the 'Estimated Total Repair Amount' as indicated by the Engineer and compares it to the 'Repair Gross' billed by the Credit Hire Organisation. Rule is failed if the 'Total Gross' amount is more than the engineer's 'Estimated Total Repair Amount'.

Rule Failure Message: "Repair Gross is higher than the Estimated Total Repair Amount."

Rule Failure Status: Invoice Escalated

Rule Number: 38

Rule: This rule looks at the 'Total Labour Cost' of the repair of the non-fault vehicle. Applying RSA specific standards based around labour rates and the productivity of a garage when a vehicle is in repair with the addition of an agreed set of variables, a calculated expected/allowable number of hire days is calculated. This calculated number of hire days is compared against the 'Number of Hire Days' billed by the Credit Hire Organisation.

Rule Failure Message: "The number of hire days billed is not relative to the number of expected hire days based on labour cost information"

Rule Failure Status: Invoice Escalated

Rule Number: 39

Rule: This rule looks at the 'Labour Hours' of the repair of the non-fault vehicle. Applying RSA specific standards based around labour rates and the productivity of a garage when a vehicle is in repair with the addition of an agreed set of variables, a calculated expected/allowable number of hire days is calculated. This calculated number of hire days is compared against the 'Number of Hire Days' billed by the Credit Hire Organisation.

Rule Failure Message: "The number of hire days billed by the CHO is not relative to the number of expected hire days based on the labour information provided"

Rule Failure Status: Invoice Escalated

Rule Number: 40

Rule: This rule compares the 'Repair Net' billed by the Credit Hire Organisation against the 'Repair Net' ceiling value (maximum) for the specific vehicle class of the hire vehicle. This rule uses a pre-calculated average 'Repair Net' for each ABI GTA vehicle class as the ceiling check.

Rule Failure Message: "The Repair Net billed £[Billed Amount] exceeds the Repair Net ceiling of £[Value Set] for vehicle class [Class]"

Rule Failure Status: Invoice Escalated

8 Report Extracts

There are a number of opportunities for information to be exported out of iDAS CHOX and into a Microsoft Excel spreadsheet.

8.1 Inbox Report Extracts

It is possible to export details of all the claims that appear in the 'Claims Overview Grid' for your inbox. To run this export, you must:

- Navigate to the work queue that you wish to run a Microsoft Excel report extract for.
- Click on the 'Export To Excel' button located at the bottom right hand corner of the 'Claims Overview Grid' as shown by the red box in figure 40 below.

Figure 40

- A pop-up screen will appear asking you whether you would like to save or open the file.
- To open the Microsoft Excel report click on the 'Open' button.
- To save the Microsoft Excel report follow these steps:
 - Click on the 'Save' button.
 - Choose a location of where to save the report and click on the 'Save' button.

8.2 Search Screen Extracts

If you need to export a more meaningful list of claims from the system, then the use of the 'Search' function is required:

- As discussed in section 3.2.5 perform the search criteria you desire.
- A list of claims that meet the search criteria will be displayed in the 'Claims Overview Grid'.
- The list of claims can then be exported by clicking on the 'Export To Excel' button located in the bottom right-hand corner of the 'Claims Overview Grid'.
- Perform the necessary steps to open or save the Microsoft Excel spreadsheet as detailed in section 6.1 above.

9 Reports

iDAS CHOX has an in built reporting module that allows a user to review performance against a specific Credit Hire Organisation, group of Credit Hire Organisation's, across specific dates and other parameters that are of interest. The reporting module can be accessed via the 'Reports' tab, a selection of 'out of the box' reports are provided as shown in figure 41 below, the list of reports displayed will vary according to the role of the user.

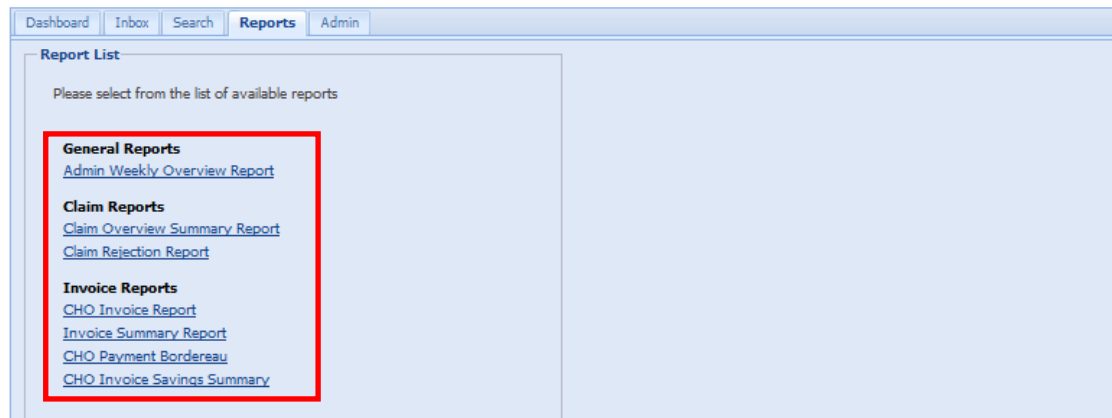

Figure 41

To access a report, click on the report name that you wish to run. Clicking on each report will display a brief summary of what the report is set out to achieve in the right hand window pane of the 'Reports' tab as shown in figure 42 below. Below this brief summary are the report parameters which allow the report in question to meet your specific requirements. Clicking on the 'Generate Report' button will run the report.

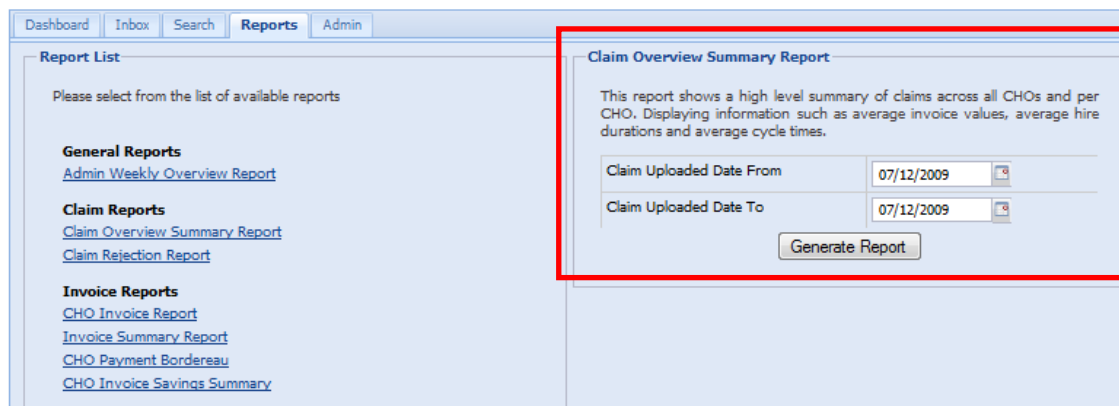

Figure 42

The report output is generated using Microsoft Excel; choose either to open the file directly in Microsoft Excel, or save the file to your PC/network, where it can then be accessed at a later date.

10 Help and Support

10.1 Help Link

Your home page includes a link to this user guide in the top right-hand corner of the screen labelled 'Help' as shown in figure 43 below.

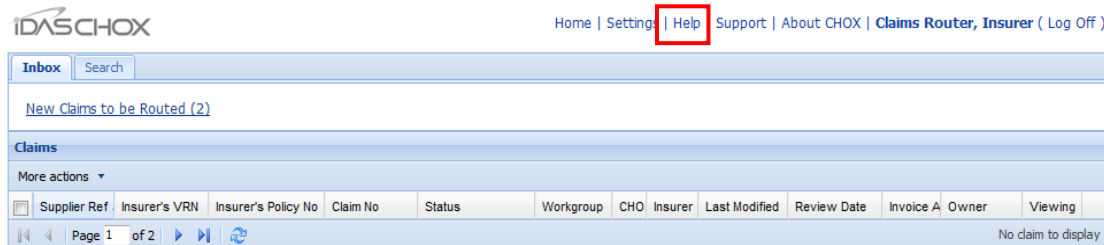

Figure 43

10.2 Support Link

Your home page includes a link to the iDAS CHOX Support Procedure, including hours of operation, contact details and the support protocol and the iDAS CHOX Online Support Form. Hovering the mouse cursor over the 'Support' link as shown in figure 44 below will enable both of these options.

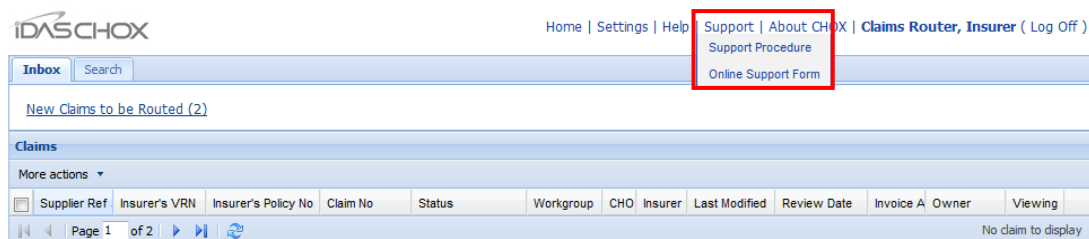

Figure 44

Clicking on the 'Online Support Form' option will launch the Online Support Form in a separate window as shown in figure 45 below. There are three fields which require an entry:

- **Supplier Reference** – This is the Credit Hire Organisation's claim reference number and the Supplier Reference as held in the system that the support request relates to.
- **Subject** – A short description of the support request.
- **Message** – A detailed message regarding the support request so that the iDAS CHOX support team can follow up the request in the most efficient and effective manner. Contact details should be included as part of this message.

The screenshot shows the 'Online Support Form' in a separate window. It has a light blue background and a white border. There are three input fields: 'Supplier Reference' (a single-line text box), 'Subject' (a single-line text box with a red asterisk indicating it is required), and 'Message' (a multi-line text area with a red asterisk indicating it is required). Below the input fields is a 'Submit' button.

Figure 45

10.3 Additional Help

For further support on the use of iDAS CHOX, please contact iDAS CHOX Support via the e-mail below:

choxsupport@sherwoodcompliance.co.uk

11 Administration

The administration function is only available to users who have the right privileges and are registered in the system as Insurer Managers/Supervisors type roles. This role based security allows only those users that require administrative rights access to password information, control users within the Organisation and their respective privileges as well as management of the business rules held within iDAS CHOX.

The iDAS CHOX administration function can be accessed by clicking on the 'Admin' tab. Clicking on the 'Admin' tab will display the 'Admin Panel' as shown in Figure 46 below.

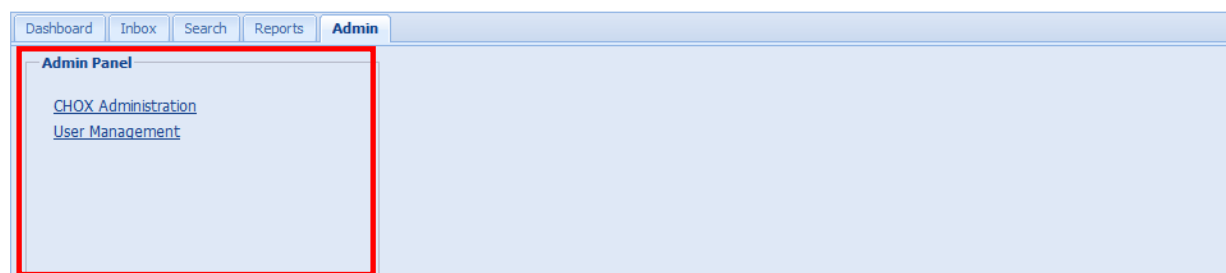

Figure 46

The Insurer Manager is presented with two menu options, 'CHOX Administration' or 'User Management'.

The 'CHOX Administration' section allows the Insurer Manager to add Workgroups, manage the business rules and the mapping of these to Credit Hire Organisations and also the control of Hire Net and Repair Net ceilings for specific vehicle classes. The 'User Management' section allows the Insurer Manager to add new users, assign roles to users, modify user details and assign users to Workgroups. Both the 'CHOX Administration' and 'User Management' sections of the 'Admin Panel' are described in more detail below.

11.1 Administration: CHOX Administration Section

Clicking on the 'CHOX Administration' hyperlink, will display a number of further tab options in the right hand window pane as shown in figure 47 below.

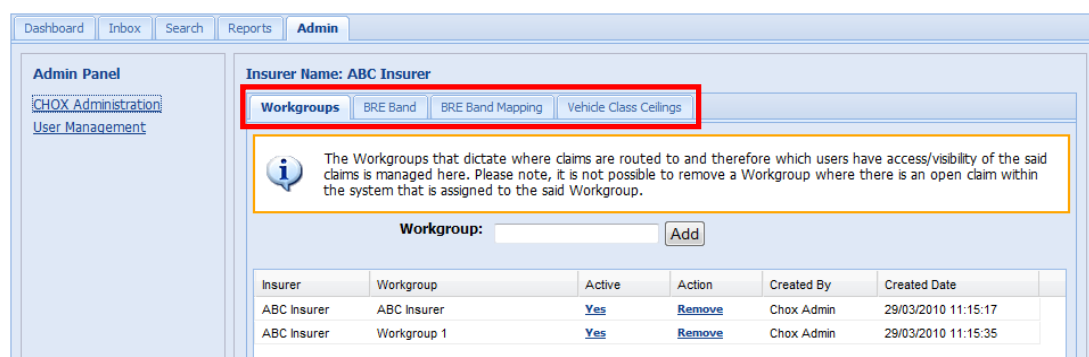

Figure 47

11.1.1 Workgroups Tab

The 'Workgroups' tab is the first tab within the 'CHOX Administration' section. Workgroups are used to separate claims out to different parts of the business, this separation could be driven by geographical sites, business areas/lines or simply different teams within the Organisation. Workgroups are designed to ensure that claims go to the correct handlers as quickly as possible. Workgroups that are added will appear in the list of available Workgroups in order to route claims as described in section 4.1.

11.1.1.1 Adding a new Workgroup

To add a new Workgroup, follow these steps:

- Click in the 'Workgroup' text box and give the new Workgroup a name.
- Click on the 'Add' button.
- This will add the Workgroup to the current list of existing Workgroups as shown in figure 48 below.

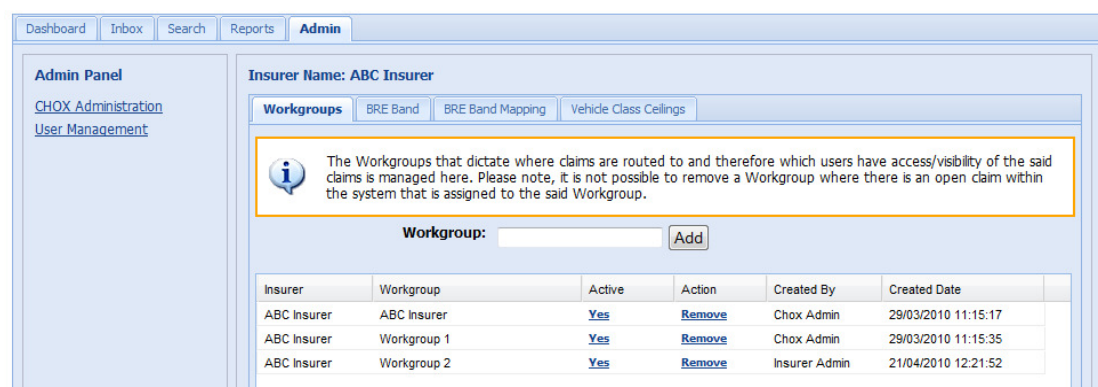

Figure 48

11.1.1.2 Edit an existing Workgroup

The user has the ability to make a Workgroup active or inactive and also remove the Workgroup completely from the system.

To make a Workgroup active/inactive:

- Click on the Yes/No hyperlink located in the 'Active' column which corresponds to Workgroup that you would like to make active/inactive.
- If you wish to make the Workgroup active, click on the 'No' hyperlink and this will automatically change the hyperlink to be 'Yes'.
- If you wish to make the Workgroup inactive, click on the 'Yes' hyperlink and this will automatically change the hyperlink to be 'No'.

Removing a Workgroup from the system completely is an available option. Please note, if there is an open claim assigned to the Workgroup you are trying to remove, you will not be able to remove the Workgroup.

To remove the workgroup:

- Click on the 'Remove' hyperlink from the 'Action' column for the Workgroup you wish to remove.
- The system will remove the Workgroup and will notify the user that the Workgroup has been deleted successfully.

11.1.2 BRE Band Tab

The Business Rules Engine is a set of predefined rules that are automatically applied when an invoice is submitted into the system by a Credit Hire Organisation, the validation of the invoice will generate one of four results as described in section 7, which will in turn affect where the claim/invoice is routed to.

Tolerances against the majority of the rules are available which allow an Insurer to more effectively manage the Credit Hire Organisations who are submitted invoices into the system. The rules and tolerances are fully customisable per Credit Hire Organisation or a set of bands can be created where the Insurer can assign Credit Hire Organisation's to a band.

The 'BRE Band' tab is the second tab in the 'CHOX Administration' section and will display the current BRE Bands set up (if any) in a table as shown in figure 49.

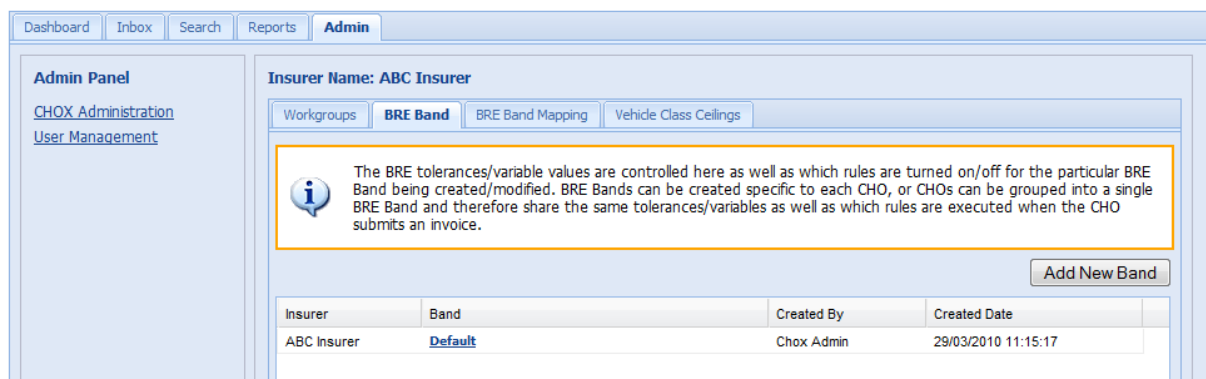

Figure 49

The user has the ability to add a new BRE Band by clicking on the 'Add New Band' button or edit an existing BRE Band by clicking on the hyperlink in the 'Band' column of the table.

11.1.2.1 Adding a new BRE Band

To get started on adding a new BRE Band, the user must click on the 'Add New Band' button as located in right hand corner of the 'BRE Band' tab.

This will bring up the following form, which must be completed by the Insurer Manager. This form contains the name of the BRE Band, the tolerance values for the business rules and the ability to switch on/off each of the rules available in iDAS CHOX.

Dashboard | Inbox | Search | Reports | **Admin**

Admin Panel
[CHOX Administration](#)
[User Management](#)

Insurer Name: ABC Insurer

Workgroups | **BRE Band** | BRE Band Mapping | Vehicle Class Ceilings

Name * Save Cancel

Total Loss Duration Rule

Receipt of Final Settlement Cheque Variable (Days) *

Ttl. Loss Settlement Offer Process Variable (Days) *

Ttl. Loss Engineer Inspection Delay Variable (Days) *

Ttl. Loss Allowable Total Duration (Days)

Labour Cost/hours

Labour Cost Calculation:
 (((Labour Cost/Current Average Labour Rate Per Hour)/Productive Labour Hours in Garage Per Hire Day) + Take Mobile Vehicle To Garage Variable or Take Non-Mobile Vehicle to Garage Variable (Depending on Mobile/Non-Mobile Vehicle) + Engineer Inspection Delay Variable + Collection of Vehicle from Garage Variable + Weekend Buffer (Automatically Calculated for Expected Number of Weekends))

Labour Hours Calculation:
 ((Labour Hours/Productive Labour Hours in Garage Per Hire Day) + Take Mobile Vehicle to Garage or Take Non-Mobile Vehicle to Garage (Depending on Mobile/Non Mobile Vehicle) + Engineer Inspection Delay Variable + Collection of Vehicle from Garage Variable + Weekend Buffer (Automatically Calculated for Expected Number of Weekends))

Take Mobile Vehicle To Garage Variable (Days) *

Take Non-Mobile Vehicle To Garage Variable (Days) *

Engineer Inspection Delay Variable (Days) *

Collection of Vehicle from Garage Variable (Days) *

Figure 50

Mandatory fields

The BRE Band tab needs to be completed in full in order to save the new BRE Band. Entries are required against each of the fields indicated by a red asterisk (*) next to the text label of the relevant field.

Grey text boxes are non-editable and are populated automatically using values entered against the corresponding white editable field. The editable field for the tolerance in question will be displayed above any of the non-editable corresponding fields. For example the editable field of 'Take Mobile Vehicle To Garage Variable (Days)' as shown in figure 51 below will be displayed above any other field labelled in the same way and these fields that follow will be greyed out as shown in figure 52 below.

Take Mobile Vehicle To Garage Variable (Days) *

Figure 51

Take Mobile Vehicle To Garage Variable (Days)

Figure 52

Some fields are non-editable and are greyed out because they represent the total tolerance allowed for a specific rule based on the addition of the all the tolerances that contribute to the business rule in question.

Additional Invoice Validations Section

Located at the bottom of the 'BRE Band' tab is the 'Additional Invoice Validations' section, this section displays all of the business rules performed as part of the validation exercise when a Credit Hire Organisation uploads an invoice, along with a tick box against each rule in order to control whether the rule is on or off. Each rule has a description underneath of what validation check is performed and should only be selected (tick box checked) if it is desired that this check is carried out when an invoice is uploaded.

Saving Changes

Once all of the boxes have been populated, the user can save the new BRE Band by clicking on the 'Save Changes' button located at both the top and bottom of the screen. The user can also choose to discard any changes by clicking on the 'Cancel' button at any time.

When saving changes, a pop-up window will be displayed as shown in figure 53 below, click on the 'OK' button to confirm saved changes, or click 'Cancel' to go back to the BRE Band creation page.

Figure 53

11.1.3 BRE Band Mapping Tab

Once a BRE Band has been created, a Credit Hire Organisation needs to be assigned to the newly created BRE Band through the interface shown in figure 54 below, please note that more than one Credit Hire Organisation can be assigned to one BRE Band.

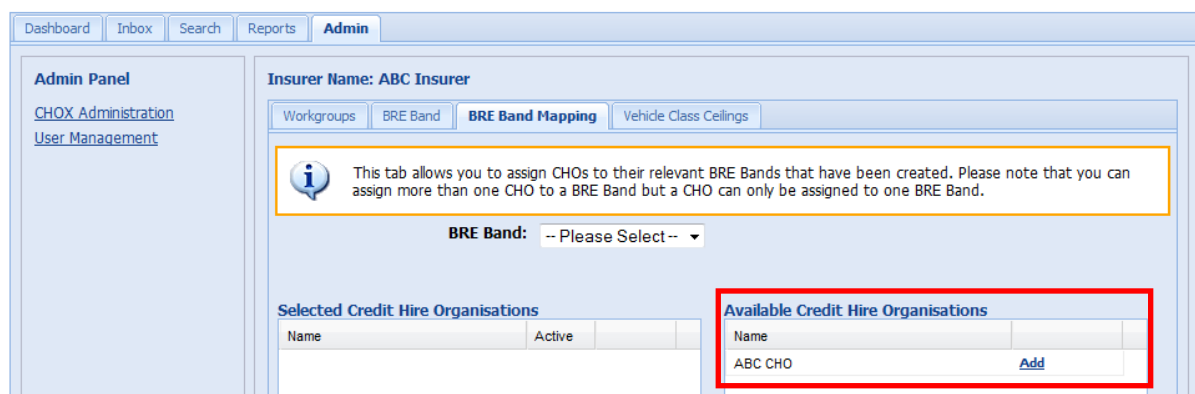

Figure 54

The 'BRE Band Mapping' tab has three main sections:

'BRE Band' drop down menu – This drop down menu contains a list of all of the BRE Bands that have been set up in the system. The user must select the BRE Band which they would like to assign to the relevant Credit Hire Organisation as shown in figure 55 below.

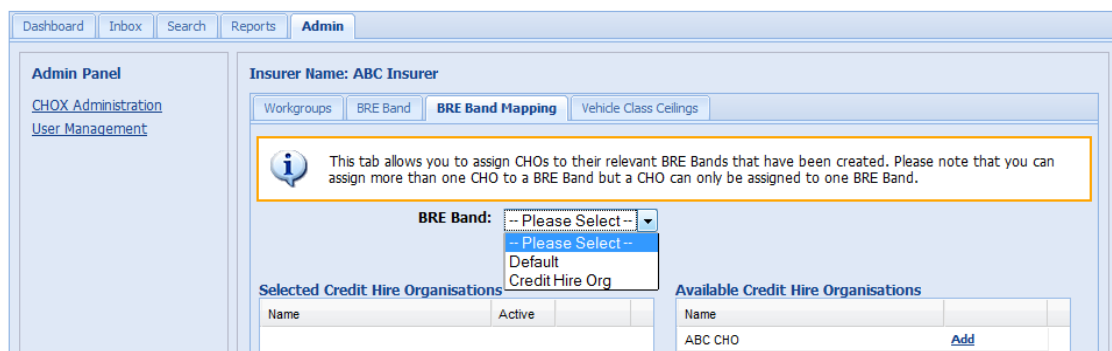

Figure 55

Available Credit Hire Organisations – This is a list of all the Credit Hire Organisations that do not have a BRE Band assigned against them, without an assignment, a Credit Hire Organisation will not be able to upload a claim/invoice into the system. A Credit Hire Organisation cannot belong to more than one BRE Band and will not be available in this list if already allocated a BRE Band.

If the BRE Band selected is the correct one for the Credit Hire Organisation in question, click on the 'Add' hyperlink located next to the relevant Credit Hire Organisation name as indicated by the red box in figure 56 below to assign the Credit Hire Organisation to the selected BRE Band.

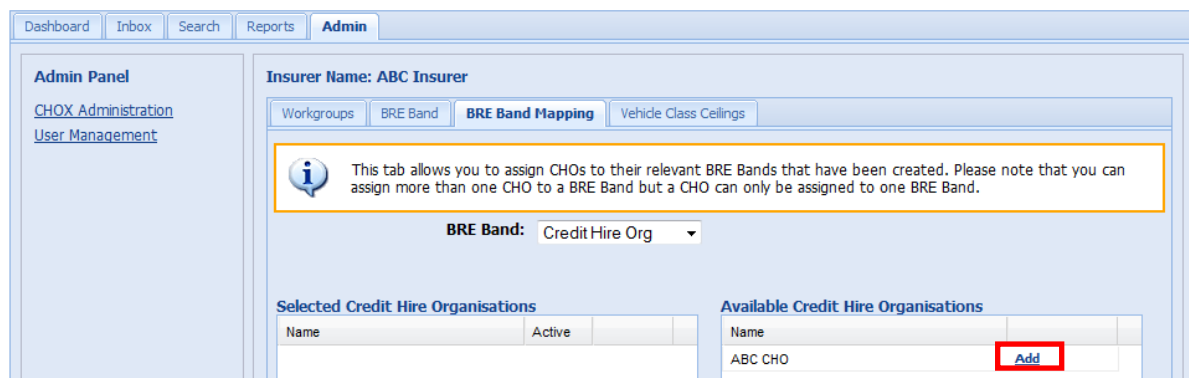

Figure 56

The Credit Hire Organisation is moved from the 'Available Credit Hire Organisations' table to the 'Selected Credit Hire Organisations' table as shown in figure 57 below.

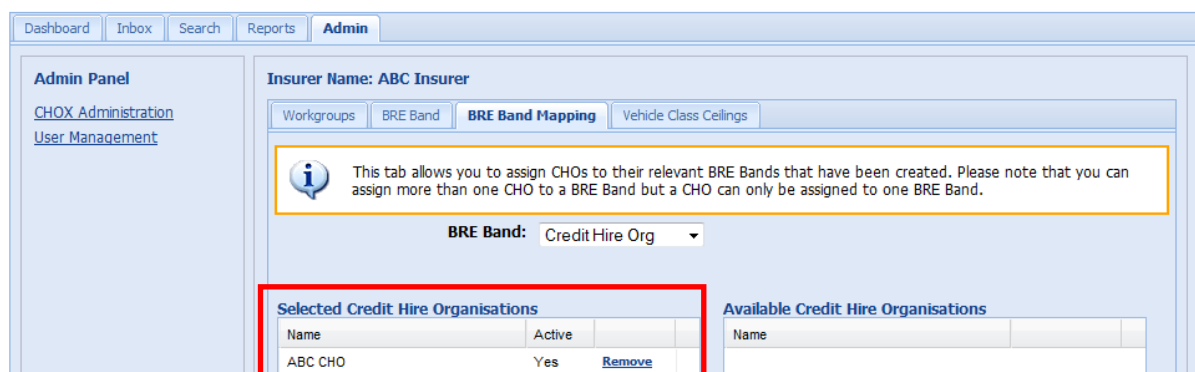

Figure 57

Selected Credit Hire Organisations - This table shows a list of all the Credit Hire Organisations that have already been assigned to the BRE Band that appears in the 'BRE Band' drop down menu. The assignment of the Credit Hire Organisation to this BRE Band can be removed by clicking on the 'Remove' hyperlink, moving the Credit Hire Organisation name back into the 'Available Credit Hire Organisations' table as shown in figure 58 below.

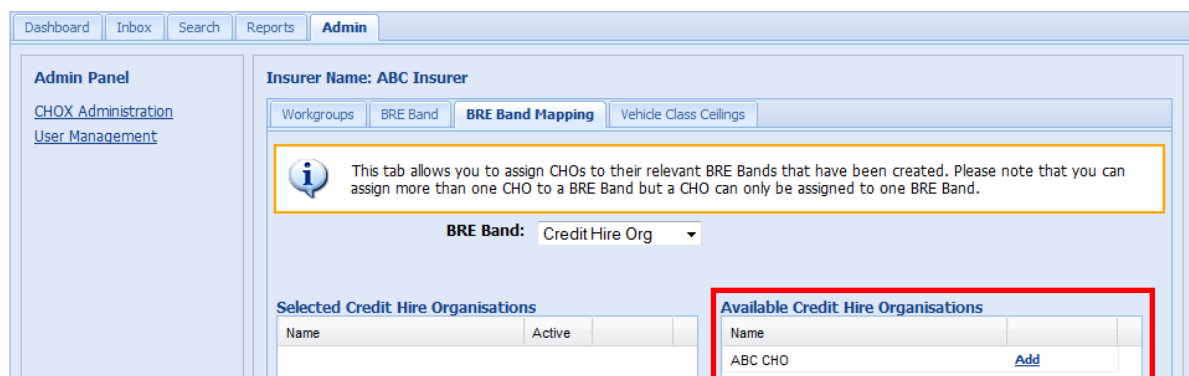

Figure 58

11.1.4 Vehicle Class Ceilings Tab

The 'Vehicle Class Ceilings' tab allows an Insurer to assign and control ceiling values against both the Hire and Repair fields for each of the different vehicle classes. The 'Vehicle Class Ceilings' tab is displayed below in figure 59.

Dashboard | Inbox | Search | Reports | Admin

Admin Panel
[CHOX Administration](#)
[User Management](#)

Insurer Name: ABC Insurer

Workgroups | BRE Band | BRE Band Mapping | **Vehicle Class Ceilings**

Vehicle Class Ceiling

The maximum ceiling limits for both the Hire Net and Repair Net for the specific vehicle classes is managed here. If a CHO submits an invoice where the Hire Net or Repair Net value(s) exceed the values held in the below table for the specific vehicle class in question, (non-fault vehicle's vehicle class) then the rule will fail.

Vehicle Class: -- Please Select --
Hire Net Ceiling: 0.00
Repair Net Ceiling: 0.00

Add New Vehicle Class

Vehicle Class	Hire Net Ceiling	Repair Net Ceiling
---------------	------------------	--------------------

Figure 59

The required vehicle class information needs to be inputted in the fields as indicated by the red box in figure 59 above. Below is a brief description on each of these fields:

Vehicle Class – This is a list of all the vehicle classes available within iDAS CHOX. Selecting a vehicle class from the list will mean that the 'Hire Net Ceiling' and 'Repair Net Ceiling' values entered will be attributed to the selected vehicle class.

Hire Net Ceiling – The maximum Hire Net value allowed for an invoice with the selected vehicle class (vehicle class of non-fault party).

Repair Net Ceiling – The maximum Repair Net allowed for an invoice with the selected vehicle class (vehicle class of non-fault party).

Once these fields have been populated, click on the 'Add New Vehicle Class' button. The vehicle class entry along with the values entered will be displayed in the 'Vehicle Class Ceiling' table as shown in figure 60 below.

Dashboard | Inbox | Search | Reports | Admin

Admin Panel

Vehicle Class Ceiling

The maximum ceiling limits for both the Hire Net and Repair Net for the specific vehicle classes is managed here. If a CHO submits an invoice where the Hire Net or Repair Net value(s) exceed the values held in the below table for the specific vehicle class in question, (non-fault vehicle's vehicle class) then the rule will fail.

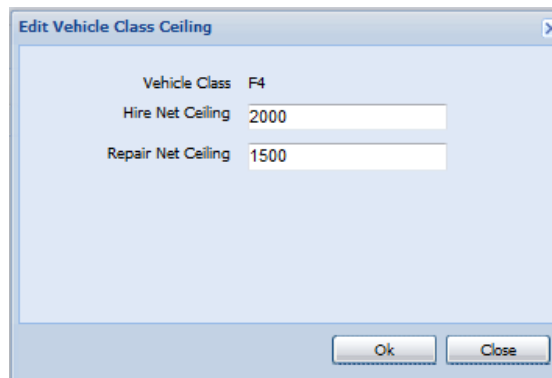

Vehicle Class: -- Please Select --
Hire Net Ceiling: 0.00
Repair Net Ceiling: 0.00

Add New Vehicle Class

Vehicle Class	Hire Net Ceiling	Repair Net Ceiling	
F1	1000	1200	Remove

Figure 60

Vehicle class values can be edited by clicking on the vehicle class name hyperlink located under the 'Vehicle Class' column, the following pop-up window will appear:

A screenshot of a software dialog box titled "Edit Vehicle Class Ceiling". The dialog box has a light blue background and a standard Windows-style title bar with a close button (X) in the top right corner. Inside the dialog, there are three labels with corresponding input fields: "Vehicle Class" with the value "F4", "Hire Net Ceiling" with the value "2000", and "Repair Net Ceiling" with the value "1500". At the bottom of the dialog, there are two buttons: "Ok" and "Close".

Vehicle Class	F4
Hire Net Ceiling	2000
Repair Net Ceiling	1500

Figure 61

Edit the current values, clicking on the 'Ok' button to save the changes and clicking on the 'Cancel' button to discard changes made.

A vehicle class ceiling can be removed by clicking on the 'Remove' hyperlink next to the relevant vehicle class that is to be removed.

11.2 Administration: User Management Section

Clicking on 'User Management' hyperlink from the 'Admin Panel' section, will display a list of all registered iDAS CHOX users within your Organisation as displayed below in Figure 62.

User Name	Name	Email	Organisation	Active	Role	Has Password
admin@abcinsurer.com	Admin Insurer	admin@abcinsurer	ABC Insurer	Yes	Insurer Manager	No
ch@abcinsurer.com	Claims Handler	ch@abcinsurer.co	ABC Insurer	Yes	Insurer Claim Handler	No
com@abcinsurer.com	Claim Ownership Manager	com@abcinsurer.c	ABC Insurer	Yes	Insurer Claim Ownership	No
cr@abcinsurer.com	Claims Router	cr@abcinsurer.cor	ABC Insurer	Yes	Insurer Claim Router	No
fnol@abcinsurer.com	FNOL Insurer	fnol@abcinsurer.c	ABC Insurer	Yes	Insurer FNOL Handler	No
pc@abcinsurer.com	Payments Clerk	pc@abcinsurer.co	ABC Insurer	Yes	Insurer Payments Clerk	Yes
scr@abcinsurer.com	Specialist Claims Reviewer	scr@abcinsurer.ct	ABC Insurer	Yes	Insurer Special Claim Re	No

Figure 62

This 'User Management' table allows you to view details about each of the registered users, with the ability to modify these settings or include additional details. Below details what each of the columns represent and other functions available on this screen:

- **User Name** – This is the user's Username and is to be used when logging into iDAS CHOX. The User Name also acts as a hyperlink that will take you to the specific user's details screen.
- **Name** – The full name of the user (first and last names).
- **Email** – This is the user's email address and is used when sending out any communications by the iDAS CHOX Support Team.
- **Organisation** – This is automatically pre-populated to be the name of the Organisation to which the user is registered against.
- **Active** – This is an active status setting, which can be modified on a per user basis. If you do not want a particular user to have the ability to log into iDAS CHOX, you can click on the 'Yes' hyperlink highlighted in blue on the user's corresponding line, changing the hyperlink to 'No', in effect making the user inactive on the iDAS CHOX system. Clicking on the 'No' hyperlink will reverse the process and make the user active on the system. Each time you click on this hyperlink, a warning box will be displayed, requiring you to accept or cancel the request as shown in figure 63 below.

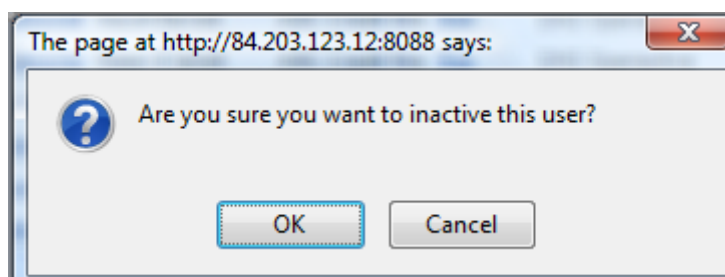

Figure 63

- **Role** – Displays which role(s) the user has been assigned. The role assigned will affect which work queues are visible, which tabs are visible as well as dictating the read/write access the user has throughout the claim lifecycle.

- **Has Password Expired?** – The Insurer Manager role has the ability to force a user to change their password when they next log in to the system. Clicking on the 'No' hyperlink in the 'Has Password Expired?' column will change the hyperlink to 'Yes', next time the user logs into the system they will be forced to change their password. Before the password can be set to expired, the system asks you to confirm that you wish to perform this action. This can be seen below in Figure 64.

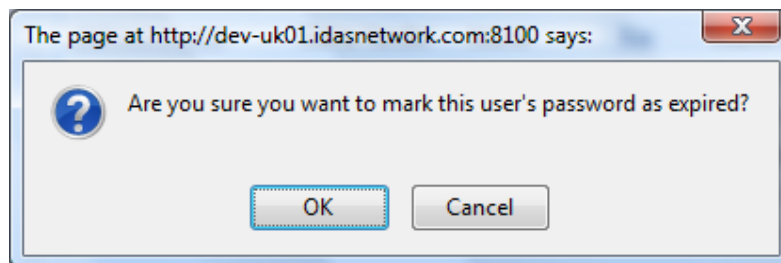

Figure 64

Clicking on the 'Yes' hyperlink will reverse the process and set the value of the hyperlink to 'No'.

- **User Roles (Drop Down Box)** – By clicking on the downward arrow in the drop down box, the Insurer Manager can filter the list of registered users by their role, with the default view being all roles.
- **Add New User (Button)** – The 'Add New User' button should be used when there is a requirement to add a new user, more details on this can be found in section 11.2.1 Adding a New User.

11.2.1 Adding a New User

To add a new user, click on the 'Add New user' button, the 'User Detail' tab will appear as shown in figure 65 below.

Figure 65

11.2.1.1 User Management: User Detail Tab

In order to set up new users, the Insurer Manager is required to fill in the above form with information about the individual being registered. Any field that has a red asterisk (*) next to it indicates a mandatory field and therefore cannot be left blank. Below is a brief explanation of each field that appears on this form:

- **Organisation Type** – This will always be pre-defined as Insurer Organisation Users.
- **Username** - This will be the username that the user will use for logging into the iDAS CHOX.
- **Email** – This is the user's email address.
- **First Name** – The first name of the user that is being registered.
- **Last Name** – The surname of the user that is being registered.
- **Password** – This is the password the user will use to log onto iDAS CHOX. Passwords are case sensitive, must be at least 6 characters, must contain at least one lower case letter, one upper case letter, and one number. If the password does not meet this criteria, you will be prompted to re-enter the password.
- **Re-enter password** – This must be the same password that is entered into the Password box above. This is a security check to ensure that the password chosen is the desired one.
- **Active (Tick Box)** – The 'Active' tick box can be either checked or left unchecked. By checking the box, you make this user's account live enabling the user instant access to the iDAS CHOX system. If the 'Active' tick box is left unchecked then the user will not be able to log in to the system using these credentials.
- **Save Changes (Button)** – The 'Save Changes' button should be clicked once all of the mandatory fields have been completed. If the user setup is successful you will be notified of such. If for any reason there has been an error, a useful error message will be displayed indicating what changes need to be made in order to create the user.
- **Cancel (Button)** – The cancel button will abandon any changes made and will take you back to the 'User Management' overview screen.

11.2.1.2 User Management: Change Password Tab

Once a new user has been added and the 'Save Changes' button has been pressed (see 11.2.1 Adding a New User for more information) the user tabs will be active, as shown in Figure 66 below:

The screenshot shows the iDAS CHOX Admin Panel. The 'Admin' tab is selected in the top navigation bar. On the left, the 'Admin Panel' sidebar contains links for 'CHOX Administration' and 'User Management'. The main content area displays the 'User Detail' tab for user 'ch312 (Claims Handler3)'. The 'User Detail' tab is highlighted with a red box. Below the tab, the form shows the following details: Organisation Type: Insurer Organisation Users; Company Name: ABC Insurer; User Name: ch312; Email: ch3@abcinsurer.com; First Name: Claims; Last Name: Handler3; Active: ☒. At the bottom of the form are 'Save Changes' and 'Cancel' buttons.

Figure 66

Clicking on the 'Change Password' tab will bring up the following screen, as shown below in figure 67:

The screenshot shows the 'Admin Panel' with a navigation bar at the top containing 'Dashboard', 'Inbox', 'Search', 'Reports', and 'Admin'. On the left, there are links for 'CHOX Administration' and 'User Management'. The main content area is titled 'User Name: ch312 (Claims Handler3)' and has tabs for 'User Detail', 'Change Password' (which is active), 'User Roles', and 'Workgroups'. A yellow warning box states: 'N.B. Passwords are case sensitive. Must be at least 6 characters. Must contain at least one lower case letter, one upper case letter, and one number.' Below this, there are two input fields: 'Password *' and 'Re-enter Password *'. A 'Save Password' button is located at the bottom right of the form.

Figure 67

- **Password** – This is the password the user will use to log onto iDAS CHOX. Passwords are case sensitive, must be at least 6 characters, must contain at least one lower case letter, one upper case letter, and one number. If the password does not meet this criteria, you will be prompted to re-enter the password.
- **Re-enter password** – This must be the same password that is entered into the Password box above. This is a security check to ensure that the password chosen is the desired one.

11.2.1.3 User Management: User Roles Tab

Clicking on the 'User Roles' tab will bring up the following screen, as shown below in figure 68.

Figure 68

Below is a brief explanation of the 'User Role' tab:

- **Add New Role Drop Down Menu** – This has a list of the roles available for this user.
- **Add New Role (Button)** – Once the role has been chosen from the drop down menu, the Insurer Manager must click on the 'Add New Role' button to add the User to that role group. This will then be seen in the table underneath, as shown in figure 69 below.

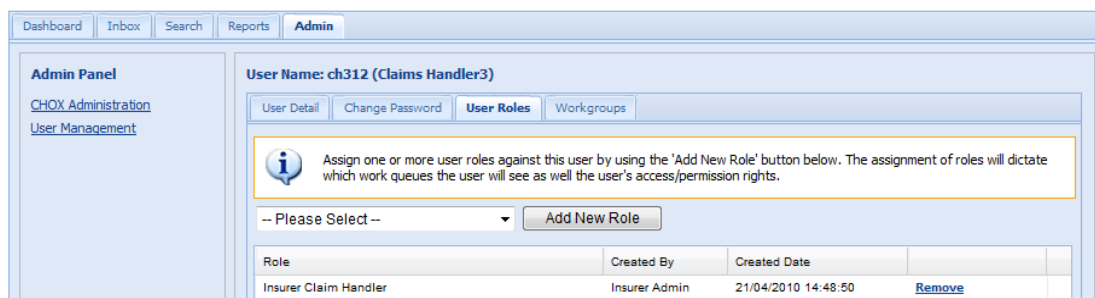

Figure 69

Assigning the 'Insurer Claims Handler' and 'Insurer Claims Ownership Manager' roles will display the following pop-up window which is a notification message to add one or more Workgroups to this user as shown in figure 70 below.

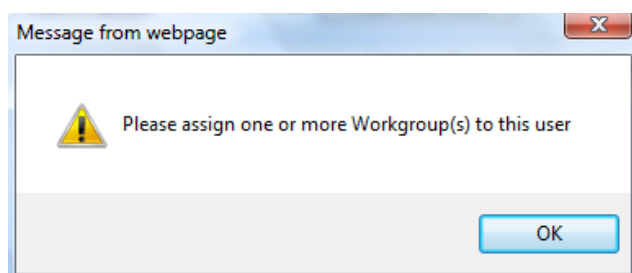

Figure 70

User Roles table/grid descriptions:

- **Role** – The 'Role' column shows what roles are assigned to the user.
- **Created By** – This is the Insurer Manager who has assigned the role to the user.
- **Created Date** – The time and date that this role was assigned to the user.
- **Remove** – The 'Remove' text is a hyperlink that enables the Insurer Manager the ability to remove a role that has been assigned to a user. When this hyperlink is clicked, you will be asked to confirm whether you wish to remove the role assignment for the user in question as shown in figure 71 below.

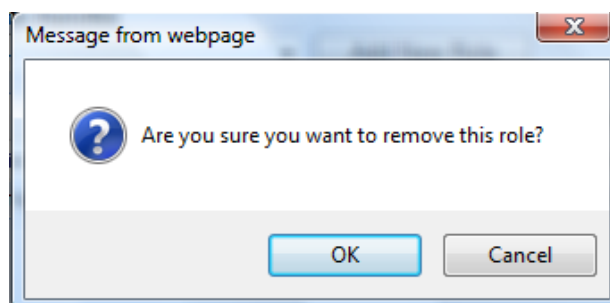

Figure 71

11.2.1.4 User Management: Workgroups Tab

The 'Workgroups' tab is only enabled when a user has been assigned the role Claims Handler and/or Claims Ownership Manager. The 'Workgroups' tab allows the Insurer Manager to assign users to Workgroups within which they work. Clicking on the 'Workgroups' tab will display the screen as shown in figure 72 below.

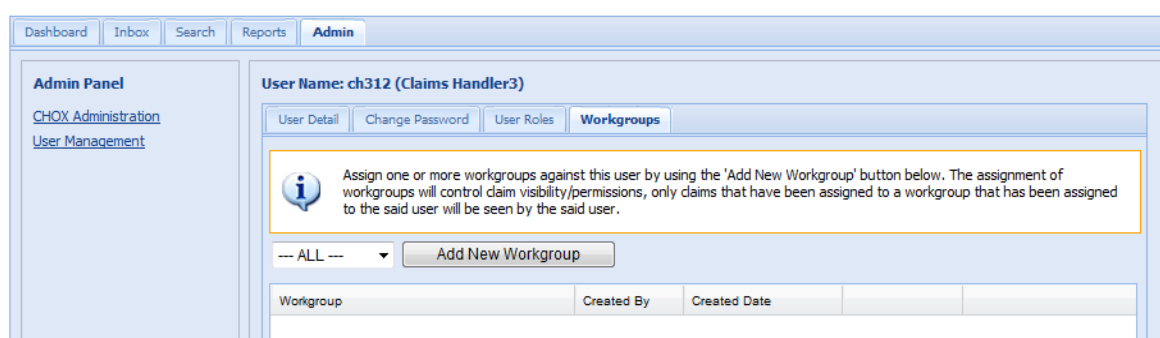

Figure 72

- **Add New Workgroup Drop Down Menu** – This has a list of the Workgroups available, this list will be based on the Workgroups that have been setup using the 'Workgroups' tab as described in section 11.1.1.1.
- **Add New Workgroup (Button)** – Once the Workgroup has been chosen from the drop down menu, the Insurer Manager must click on the 'Add New Workgroup' button to add the User to that Workgroup. This will then be seen in the table underneath, as shown in figure 73 below.

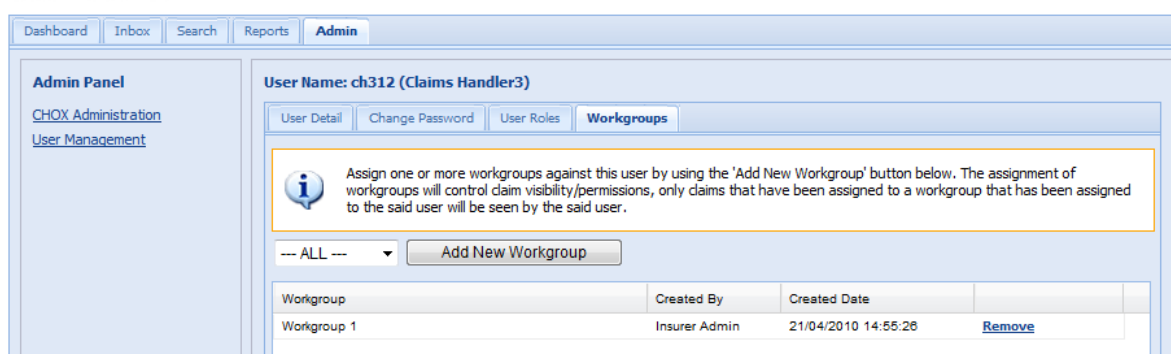

Figure 73

Workgroups table/grid descriptions:

- **Workgroup** – Name of the Workgroup assigned to the user.
- **Created By** – This is the Insurer Manager who has assigned the Workgroup to the user.
- **Created Date** – The time and date that this Workgroup was assigned to the user.
- **Remove** – The 'Remove' text is a hyperlink that enables the Insurer Manager the ability to remove a Workgroup that has been assigned to a user. When this hyperlink is clicked, you

will be asked to confirm whether you wish to remove the Workgroup assignment for the user in question as shown by figure 74 below.

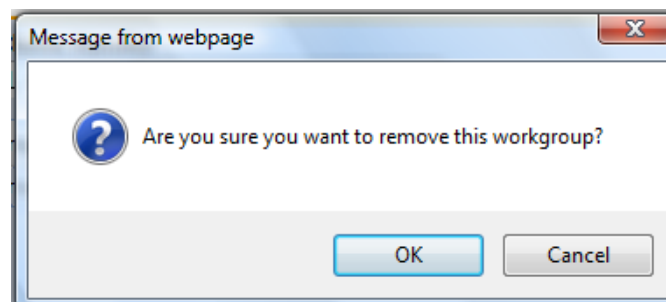

Figure 74

11.2.1.5 User Management: Editing an Existing User

Once a user has been created, you can click on the user's email hyperlink underneath the column headed 'Email' on the 'User Management' overview screen (figure 75 below) and change certain details relating to the individual user as described in the section 11.2.1.1.

Appendix A – Claim Status Explained

A claim will always have a specific status throughout its life in iDAS CHOX. The behaviour of the claim and thus the behaviour of the user experience are directly affected by the status of the claim.

There are two areas in the system that allows you to see the status of a claim at any given point in time. The first is on the 'Claims Overview Grid' as shown by the red box in figure 76 below.

Claims

Figure 77

There are a number of statuses for a claim, below is a list of all possible statuses with a brief description of each.

- **AwaitingCarHireInfo** – It is the Credit Hire Organisation's duty when the status is 'AwaitingCarHireInfo' to update the required fields on the 'Hire Monitoring' tab throughout the duration of the hire. Invoice details cannot be uploaded against a claim until the required fields have entries against them.
- **AwaitingInvoiceData** – This status indicates that the Credit Hire Organisation has entered the required fields on the 'Hire Monitoring' tab and thus the Credit Hire Organisation can upload invoice details against the claim, indicating that the hire vehicle has been off-hired.
- **AwaitingInvoicePayment** – This status indicates that the Insurer has made the decision to approve the claim/invoice for payment. The Insurer has an action to make a payment against the claim using the Insurer's internal payment system; once this payment has been made the Insurer is required to update the status in iDAS CHOX. The Insurer should enter notes against the claim for the Credit Hire Organisation's benefit regarding any important payment information.
- **AwaitingLiabilityResolution** – This status indicates that the Insurer has cleared the claim for payment and approved the claim on a quantum basis, however liability is yet to be agreed, the claim will sit in the status, effectively acting as a holding queue until the point liability is agreed/resolved/repudiated between the Credit Hire Organisation and Insurer.
- **ClaimClosed** – This status indicates that the Credit Hire Organisation has removed the claim from iDAS CHOX; this is the end of the claim's life in the system.

- **ClaimPending** – This status indicates that the Insurer is awaiting further information in order to make a decision on whether to acknowledge or reject the claim, in most instances the Insurer is awaiting further information from their policyholder, the at-fault driver.
- **ClaimReferredToEngineer** – This status indicates that the claim has been sent to the Insurer's motor engineers to review the claim/invoice details and make appropriate recommendations/actions. The motor engineer will make any notes on the 'Notes' tab for the purposes of the Credit Hire Organisation and/or the claims handler or for when the Insurer is reviewing the claim at the invoicing stage of the claim lifecycle.
- **ClaimReferredToFNOL** – If the at-fault driver has not registered the claim with their Insurer, the claim is referred to the first notification of loss (FNOL) team to register the claim. Once the claim has been registered the claim is sent to the relevant claims handling team/claims handler for review.
- **ClaimRejected** – This status requires action by the Credit Hire Organisation as to the Insurer's decision to reject the claim in question. The Credit Hire Organisation will need to either accept the Insurer's decision to reject the claim or contest the Insurer's decision to reject the claim. Supporting notes should be added regardless of the decision reached. The Credit Hire Organisation has the ability to amend the details held on the 'Claim Details' tab before contesting the Insurer's decision, notes should be added to the claim to inform the Insurer of any changes made.
- **ClaimRejectionAccepted** – This status indicates the end of the life of the claim in question as the Credit Hire Organisation has accepted the Insurer's decision to reject the claim, no further action is required by either the Insurer or the Credit Hire Organisation, and relevant notes should be added by the Credit Hire Organisation.
- **ClaimRejectionContested** – This status indicates that the Credit Hire Organisation has contested the Insurer's decision to reject the claim. The Insurer will have an action to review the contested claim and any supporting notes that may have been added and make a decision again on whether to acknowledge or reject the claim providing supporting notes/comments where applicable.
- **ClaimUnacknowledgedUnassigned** – This status only applies to those Insurers that are using claim ownership. Once a claim has been routed to the correct workgroup, it needs to be assigned to a claims handler. The Insurer will allocate a claim to the relevant claim owner, changing the status to ClaimUnacknowledgedRouted.
- **ClaimUnacknowledgedUnrouted** – This status refers to all new claims that have been uploaded into iDAS CHOX at the first notification stage and are yet to be routed to the relevant claims handling team within the Insurer.
- **ClaimUnacknowledgedRouted** – This status refers to claims that have been routed to the relevant claims handling team/claims handler within the Insurer. The Insurer has an action at this stage to review the claim details against details registered on internal systems and make a decision on whether to acknowledge or reject the claim, adding any notes as required and/or details regarding the claim acceptance/rejection, specifically details regarding liability and indemnity.
- **ClaimUpdatedByEngineer** – This status indicates that an Insurer's motor engineer has reviewed the claim details, added any relevant notes and sent the claim to the relevant claims handler(s) to follow up/action the claim.
- **ContestedInvoiceReferredToCHO** – This status indicates that the Insurer has escalated the claim to the Credit Hire Organisation with supporting notes on why this decision has been made. The Credit Hire Organisation is required to review any Insurer notes, and make a decision on whether to accept the claim/invoice rejection or contest the claim/invoice rejection. If the Credit Hire Organisation makes the decision to accept the claim/invoice rejection then supporting notes should be made. If the Credit Hire Organisation makes the decision to contest the claim/invoice rejection then the Credit Hire Organisation needs to make any necessary changes to the claim/invoice details and/or attach a payment pack/file if required and/or add a note to the claim and then re-submit the claim into the Business Rules Engine.
- **ContestedInvoiceReferredToInsurer** – This status indicates that the Credit Hire Organisation has received a claim previously in the state of 'ContestedInvoiceReferredToCHO' made any necessary amendments and re-submitted the claim into the Business Rules Engine and now it is back with

the Insurer for review. The Insurer will review any new notes from the Business Rules Engine as well as the historic notes from previous Business Rule Engine tests, and if applicable Credit Hire Organisation's notes and/or the attached payment pack/file will be reviewed. The Insurer is required to make a decision on whether to approve the invoice or escalate the claim/invoice back to the Credit Hire Organisation.

- **InvoiceApprovedByBRE** – This indicates that all of the details regarding the invoice and the claim pass through the Business Rules Engine **and** there are no flags on the claim prompting the Insurer to manually review the claim. The Insurer is still required to approve the invoice for payment or to reject the claim/invoice back to the Credit Hire Organisation.
- **InvoiceDataCalculationIncorrect** - This status indicates that the Credit Hire Organisation has made fundamental calculation errors in the invoice data uploaded. The Credit Hire Organisation will be presented with details via the 'Remark' column on the XML upload screen and on the 'History' tab. The Credit Hire Organisation will need to make the necessary amendments to the 'Invoice Details' tab and re-submit the claim.
- **InvoiceEscalated** – This status indicates that there are certain details within the submitted claim/invoice that the Insurer's motor engineers would like to review before making a decision on whether to approve or reject the claim/invoice for payment. The Credit Hire Organisation is not required and cannot make any changes to the claim during this status.
- **InvoiceEscalatedToHandler** - This status indicates that there are certain details within the submitted claim/invoice that the Insurer's claims handlers would like to review before making a decision on whether to approve or reject the claim/invoice for payment. The Credit Hire Organisation is not required and cannot make any changes to the claim during this status.
- **InvoicePaymentLogged** – This status indicates that the Insurer has made a payment against the claim on the Insurer's internal payments system. The Credit Hire Organisation should review any notes against the claim for any relevant payment information. The Credit Hire Organisation is required to raise physical invoices for claims of this status for the amounts held on iDAS CHOX.
- **InvoiceRejectionAccepted** - This status indicates the end of the life of the claim in question as the Credit Hire Organisation has accepted the Insurer's decision to reject the claim/invoice, no further action is required by either the Insurer or the Credit Hire Organisation, and relevant notes should be added by the Credit Hire Organisation.
- **InvoiceReferredToClaimsHandler** – This status indicates that an Insurer's motor engineer has reviewed the claim/invoice details, added any relevant notes and sent the claim to the relevant claims handler(s) to follow up/action the claim/invoice.
- **InvoiceReferredToEngineer** – This status indicates that the claim has been sent to the Insurer's motor engineers by an Insurer's claims handler to review the claim/invoice details and make appropriate recommendations/actions.
- **PaymentReceived** – Once the payment has been received by the Credit Hire Organisation from the Insurer, there is a requirement for the status of the claim in question in iDAS CHOX to be updated to reflect this. This allows both the Insurer and the Credit Hire Organisation to see that the claim does not have an outstanding payment and the case is settled, indicating the end of the life of the claim in question; no further action is required within iDAS CHOX by either the Insurer or the Credit Hire Organisation.
