1 iDAS CHOX Credit Hire Organisation and Insurer Responsibilities

This section details the roles and responsibilities for all parties regarding the use of iDAS CHOX regarding the credit hire and/or credit repair process.

1.1 Claim and Invoice Data

It is the Credit Hire Organisation's responsibility to upload claim and invoice data into iDAS CHOX. This will either be from a direct feed from internal systems or via an XML upload feed into the iDAS CHOX web browser front end.

It is the Credit Hire Organisation's responsibility to ensure that the data being uploaded into iDAS CHOX is of an accurate, complete and consistent nature.

1.2 Claim Acknowledgement

It is the Insurer's responsibility to review all incoming '1st claim notifications' and assess against details held on internal systems as to whether to acknowledge or reject a claim. A Credit Hire Organisation, cannot upload invoice details against a claim which has been rejected or yet to be acknowledged.

1.3 Claims Handling Payment (Delegated Authority (DA) Scheme)

Claims Handling fee payments only apply to Credit Hire Organisations that have subscribed to the Delegated Authority VAT savings scheme and thus a contract has been drawn and signed between Credit Hire Organisation and Insurer.

It is the responsibility of the Credit Hire Organisation to raise a separate invoice internally specifically for the Claims Handling fee. The Credit Hire Organisation is able to raise a Claims Handling invoice when and only when the claim has been accepted by the Insurer within iDAS CHOX.

It is the responsibility of the Insurer to make the required payments for the Claims Handling fee.

1.4 Monitoring of Hire

It is the Credit Hire Organisation's duty to monitor the progress of a hire/repair. Useful/vital information obtained from such a monitoring process is required to be entered onto iDAS CHOX against the claim in question.

1.5 Invoice/Claim Approval

It is the responsibility of the Insurer to review all claims that have either passed all business rules held in the 'Business Rules Engine' or claims that have failed fundamental business rules and therefore require review. The Insurer will be required to make a decision on whether to clear for payment or reject the claim in question given the information supplied.

1.6 Invoice/Claim Amendment

It is the Credit Hire Organisation's responsibility to make modifications to a claim/invoice given fundamental data errors. The Credit Hire Organisation is also required to supply additional information to a claim via the means of iDAS CHOX upon request by the Insurer.

1.7 Invoice Payment

It is the responsibility of the Insurer to monitor payments required for hire invoices using iDAS CHOX once a claim has been cleared for payment. The payment will be logged on the Insurer's internal payments system but a requirement to update iDAS CHOX of this payment is in order.

The Credit Hire Organisation is required to monitor iDAS CHOX for all claims where an Insurer has logged a payment for the invoice, all such claims will require a manual invoice to be raised on the Credit Hire Organisation's internal invoicing system and then sent to the Insurer.

2 Getting Started

2.1 System Requirements

iDAS CHOX can be accessed online and is supported by the following web browsers only:

- Internet Explorer 7
- Mozilla Firefox
- Safari 3

2.2 Logging On

- Before you can begin using iDAS CHOX, you will need to hand your registered username and password as supplied by iDAS CHOX support. You will have been sent an e-mail detailing your username and password.
- Using your preferred web browser from the list above, enter the following URL into your browser's address bar: **www.idaschox.com**
- Enter your case sensitive username and password into the relevant fields as shown on figure 1 below.

Figure 1

2.3 User Roles

There are two user roles for a Credit Hire Organisation within iDAS CHOX; each role is specific with appropriate read/write and access privileges. These roles are detailed below with a brief description of each role:

- **CHO Operative** – Access to all work queues and everyday day Credit Hire Organisation functionality.
- **CHO Admin** – Access to all of the CHO Operative's queues and functionality. In addition the CHO Admin role will have access to the administrative function within iDAS CHOX, offering the ability to create users and assign users to roles. The CHO Admin role also offers access to iDAS CHOX's reporting functionality.

3 Basics

3.1 iDAS CHOX at a Glance

On logging into iDAS CHOX you will be presented with the following screen layout:

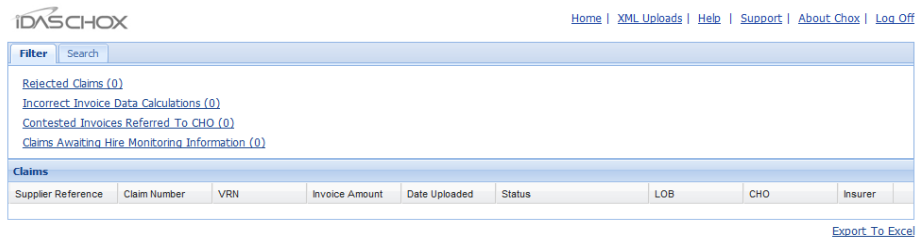

Figure 2

3.2 Navigation

iDAS CHOX can be navigated using a mouse to click on menu items and arrows.

1.2.1 Control Toolbar

The 'Control Toolbar' is located in the top right-hand side of the iDAS CHOX screen as shown by the red box displayed in figure 3 below.

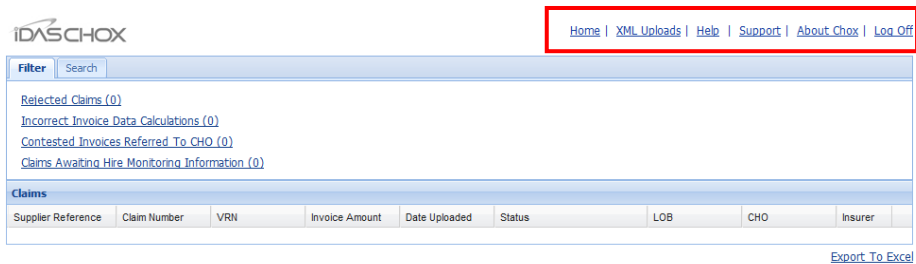

Figure 3

The 'Control Toolbar' allows a user access to the following controls:

1.2.1.1 Home

When the 'Home' shortcut link is clicked the user will be taken to the home screen within iDAS CHOX as shown in figure 3 above.

1.2.1.2 XML Uploads

When the 'XML Uploads' shortcut link is clicked the user will be taken to the XML upload screen where claim and invoice details can be uploaded into iDAS CHOX.

1.2.1.3 Help

When the 'Help' shortcut link is clicked a pop-up window will appear which will contain the iDAS CHOX Credit Hire Organisation user guide.

1.2.1.4 Support

When the 'Support' shortcut link is clicked a pop-up window will appear which will contain iDAS CHOX support details.

1.2.1.5 About CHOX

When the 'About CHOX' shortcut link is clicked a pop-up window will appear which will contain details relating to the iDAS CHOX product including versioning and ownership.

1.2.1.6 Log Off

When the 'Log Off' shortcut link is clicked you will be logged off from your current activity and returned to the iDAS CHOX log on screen as shown in figure 1.

1.2.2 Inbox

The 'Inbox' tab which is the default view when you log into iDAS CHOX, allows a user to see work queues that are relevant to them. The work queues allow a user to see how many items are outstanding in a particular queue at any given moment and therefore require action.

As shown in figure 4 below the work queues are displayed as internet style hypertext links. In order to access a particular work queue, click on the name of the work queue you wish to view.

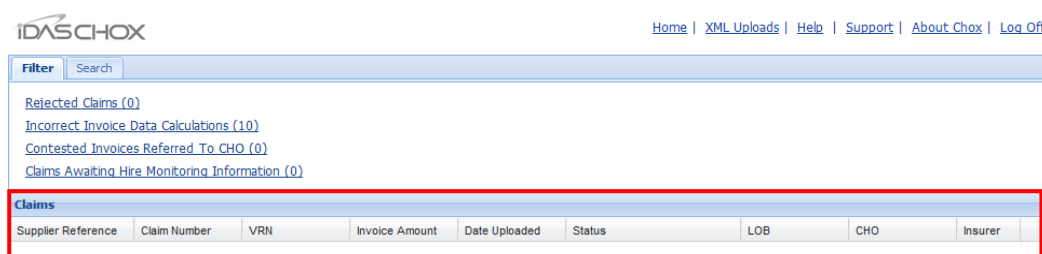

Figure 4

1.2.3 Claims Overview Grid

Located below the work queue items as shown in figure 4 (indicated by the red box), is a small grid made up of a number of columns referred to as the 'Claims Overview Grid'. The 'Claims Overview Grid' displays all claims that relate to the work queue that is currently selected and therefore all items in the grid are of the same status. The 'Claims Overview Grid' displays a handpicked selection of columns that will allow you to uniquely identify a claim. In order to view the details of a particular claim click on the 'Supplier Reference' field (underlined with blue text, appearing as an internet style hypertext links) for the particular claim and the tab navigation screen as discussed below will appear.

On logging into iDAS CHOX the default 'Claims Overview Grid' view is blank and thus no claims are displayed in the 'Claims Overview Grid'.

1.2.4 Search

To access the search facility, click on the 'Search' tab which is located next to the 'Inbox' tab as shown by the red box in figure 5 below:

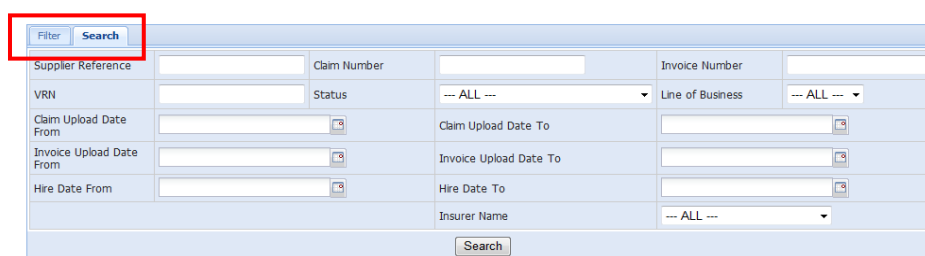

Figure 5

Figure 5 above represents the extensive search functionality that is available in iDAS CHOX. A search can range from a search on a single field to a search across multiple fields.

- To maximise search results, search using only one field.
- To narrow search results, search using multiple fields.

Detailed below is a list of the searchable fields with a brief explanation on the results that would be returned if a search was conducted on each:

- **Supplier Reference** - Unique reference for the Credit Hire Organisation (as stored on internal systems) in order to identify a claim. Will display only one result in the 'Claim Overview Grid'.
- **Insurer Name** – Refers to the Insurer who the at-fault party is insured by and therefore the Insurer who is liable for the invoice payment for the credit hire and/or credit repair. Results will display all claims that relate to the specified Insurer.
- **Claim Number** - Unique reference for the Insurer (as stored on internal systems) in order to identify a claim. Will display only one result in the 'Claim Overview Grid'.
- **VRN** – Vehicle Registration Number. Search will return results of all claims that have been logged against the VRN entered. It is possible for more than one claim to exist against a single VRN.
- **Invoice Number** – This number refers to the Credit Hire Organisation's internal invoicing number. This search could return a specific claim relating to an invoice payment for a credit hire and/or credit repair or return a specific claim relating to a Claims Handling invoice in the case of Credit Hire Organisations under the Delegated Authority scheme.
- **Claim Upload Date From** – Date at which the claim was uploaded into iDAS CHOX via the XML upload for the '1st Claim Notification' stage of the claim lifecycle.
- **Claim Upload Date To** - Date at which the claim was uploaded into iDAS CHOX via the XML upload for the '1st Claim Notification' stage of the claim lifecycle.
- **Invoice Upload Date From** - Date at which the claim was uploaded into iDAS CHOX via the XML upload for the invoicing stage of the claim lifecycle.
- **Invoice Upload Date To** - Date at which the claim was uploaded into iDAS CHOX via the XML upload for the invoicing stage of the claim lifecycle.
- **Hire Date From** – Date at which the hire of the replacement vehicle commenced (hire start).
- **Hire Date To** - Date at which the hire of the replacement vehicle commenced (hire start).
- **Status** – Search will return results for all claims in iDAS CHOX of the specified status.
- **Line of Business** – 'Line of Business' (general classification of business, a subdivision within an Insurance company) is specific to an Insurer and therefore this search should be used in conjunction with the 'Insurer' search parameter. The search will return results for all claims in iDAS CHOX for the specified 'Line of Business' for the specified Insurer.

To use the iDAS CHOX search facility select the relevant search criteria in the form of the supplied drop down menus, date calendar pop-ups or by typing search strings into the relevant field(s). For text entry searches, the inclusion of a '%' symbol anywhere in the entry will act as a wild card character (representing any group of characters or numbers), for example a search on the 'Supplier Reference' field with '%CH%' would return all claims which have 'CH' in the 'Supplier Reference' and any group of characters either side of the 'CH'. An example search entry is shown in figure 6 below:

Filter Search			
Supplier Reference	CHOX0009	Claim Number	
VRN		Status	--- ALL ---
Claim Upload Date From	25/11/2008	Claim Upload Date To	30/11/2008
Invoice Upload Date From		Invoice Upload Date To	
Hire Date From		Hire Date To	
Supplier Name	--- ALL ---	Insurer Name	--- ALL ---
Search			

Figure 6

Once the search criteria has been entered click on the 'Search' button. Results from the above search criteria are shown in figure 7 below:

The search form includes fields for Supplier Reference (CHOX0009), Claim Number, Invoice Number, VRN, Status (--- ALL ---), Line of Business (--- ALL ---), Claim Upload Date From (25/11/2008), Claim Upload Date To (30/11/2008), Invoice Upload Date From, Invoice Upload Date To, Hire Date From, Hire Date To, Supplier Name (--- ALL ---), and Insurer Name (--- ALL ---). A Search button is located below the form.

The results table is as follows:

Supplier Reference	Claim Number	VRN	Invoice Amount	Date Uploaded	Status	LOB	CHO	Insurer
CHOX0009		Y675876		29/11/2008	ClaimUnacknowledgedUnrouted		Credit Hire Org	Insurer

An [Export To Excel](#) link is located at the bottom right of the table.

Figure 7

1.2.5 Tabs

Upon selecting to view the claim details for a particular claim by clicking on the 'Supplier Reference' number in the 'Claim Overview Grid', the tab view as shown and indicated by the red box in figure 8 below is displayed:

The interface shows a tabbed view with the following tabs: Claim Details, Hire Monitoring, Invoice Details, Attachments, History, and Notes. The Claim Details tab is selected and highlighted with a red box. Below the tabs, there are sections for Customer Details, Incident Details, Injury, Third-Party Details, Injury Solicitor, and Witness Details.

Figure 8

Tabs allow a user to browse through segmented sections of a claims underlying detail allowing more efficient and effective navigation through the extensive set of data held against a claim in iDAS CHOX.

1.2.5.1 Expanding/Collapsing Tab Details

By default the information displayed within a tab is collapsed in that the tab section header is shown without the underlying detail as shown in figure 9 below. In order to view detail under each of the tab section headers you should click on the tab section header in question. The red box in figure 9 below represents the 'Customer Details' section header.

The interface is similar to Figure 8, but the 'Customer Details' section header is highlighted with a red box, indicating it is the active section. The underlying details for Customer Details are expanded.

Figure 9

When you have clicked on a tab section header all underlying details will expand under the tab section header as shown by the red box in figure 10 below. Clicking on the tab section header section again will collapse the underlying details returning the user to view as shown in figure 9.

Figure 10

1.2.5.2 Data Read/Write Views and Saving Data

Depending on the status of the claim the details contained within a tab will either be in a read only format or in an editable format. Read only tab details will be displayed as shown in figure 11 below, with data for a particular field being displayed next to the field label with no option to modify.

Figure 11

Editable tab details on the other hand will have pre-populated fields in an editable field format as shown in figure 12 below.

Figure 12

The editing of fields will require you to make the changes permanent within the system by clicking on the relevant button that is displayed in and around the editable fields. This button will be either 'Save Changes' or 'Submit'. The 'Save Changes' button is shown in figure 13 below.

Figure 13

1.2.5.3 Tab Locking

iDAS CHOX offers access to tabs depending on the status of the claim and therefore what can and cannot be viewed. If a tab has blue writing as the tab name then the tab can be navigated to, however if the tab has grey writing as the tab name then the tab cannot be navigated. Based on figure 14 below, 'Claim Details' tab, 'Hire Monitoring' tab, 'Invoice Details' tab, 'History' tab and 'Notes' tab can all be navigated to, but the 'Payment Pack' tab cannot be navigated to.

Figure 14

1.2.5.4 Tabs Explained

An explanation on the content displayed on each tab is offered below.

1.2.5.4.1 Claim Details Tab

The 'Claim Details' tab contains information relating to the general claim details, non-fault party's details, at-fault party's details, witness details, vehicle damage details, incident details, injury details, injury solicitor details and engineer report details.

1.2.5.4.2 Hire Monitoring Tab

The 'Hire Monitoring' tab contains information relating to the monitoring of the hire/repair. During the length of time the customer has the vehicle on hire, it is the Credit Hire Organisation's duty to monitor the progress of the repair/hire, any update/modification that is deemed 'important' by the Insurer is noted on this tab as and when the update occurs.

1.2.5.4.3 Invoice Details Tab

The 'Invoice Details' tab contains a breakdown of the items that make up the total invoice cost including details regarding the vehicle on hire, the length of hire, extras added to the vehicle for the hire, repair costs and any other additional costs that have been incorporated as part of the hire.

1.2.5.4.4 Attachments Tab

The 'Attachments' tab allows you to attach files to a claim in various file formats such as PDF documents, Microsoft Word documents and common image file formats. Photos, associated documents and payment packs can be attached to a claim using the 'Attachments' tab.

1.2.5.4.5 History Tab

The 'History' tab contains details of all actions made by both Insurer and Credit Hire Organisation during the lifecycle of a claim, an example action is the upload of a claim and the information relating to that upload such as date, time and by whom. The 'History' tab also contains details regarding the results of the Business Rules Engine when an invoice has been uploaded into iDAS CHOX and any messages as a result of this process are stored. The items detailed on the 'History' tab are displayed in chronological order with the newest history items being displayed first as shown in figure 15 below:

Claim Details	Hire Monitoring	Invoice Details	Attachments	History	Notes
ID	Created On	Created By	Message Text		
369	03/12/2008	system	FAILED : Hire Gross calculation is incorrect.RuleFailed		
373	03/12/2008	system	FAILED : Hire VAT calculation is incorrect.RuleFailed		
376	03/12/2008	system	FAILED : Total Net calculation is incorrect.RuleFailed		
377	03/12/2008	system	FAILED : Total VAT calculation is incorrect.RuleFailed		
378	03/12/2008	system	FAILED : Total Gross calculation is incorrect.RuleFailed		
383	03/12/2008	system	FAILED : Total to Pay calculation is incorrect.RuleFailed		

Figure 15

1.2.5.4.6 Notes Tab

The 'Notes' tab is an empty data field which can be used to add queries and comments by both Insurers and Credit Hire Organisations. This opens up invaluable dialogue in resolving claims and disputes swiftly and efficiently. All notes can be viewed at any stage of the iDAS CHOX process by navigating to the 'Notes' tab within a claim. Follow the below steps in order to add a note to a claim:

- View the claim details of the claim in question and navigate to the 'Notes' tab, a screen shot of the 'Notes' tab is shown below in figure 16.

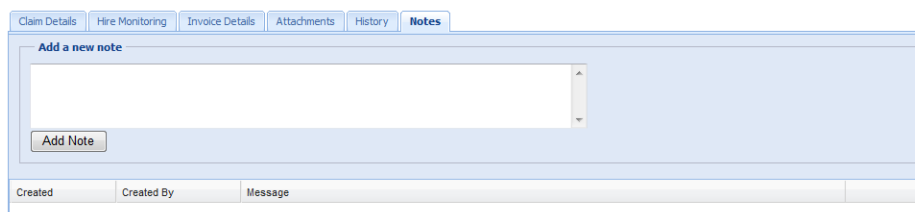

Figure 16

- To write a question or a note, click into the 'Add a new note' field and type the message.
- Click on the 'Add Note' button.
- All notes that have been entered against a claim by either the Credit Hire Organisation or Insurer will appear on the 'Notes' tab, all notes for each claim are archived by date and are not amendable.

1.2.6 Claim Summary Pane

When viewing the claim details of a particular claim, you will be presented with the 'Claim Summary' pane as shown in figure 17. The 'Claim Summary' pane contains information that is regarded as essential to a user and therefore is displayed at all times regardless of the tab you navigate to.

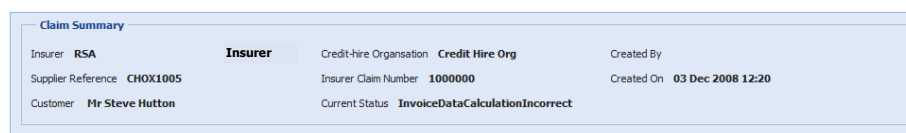

Figure 17

1.2.7 Action Pane

For certain statuses, an action window pane will be displayed which will require certain action in order to move the claim to the next status/lifecycle step. The action pane will be located beneath the 'Claim Summary' pane when viewing the claim detail as discussed above. The action pane in order to accept or reject an Insurer's decision to reject a claim/invoice is shown below in figure 18 as an example.

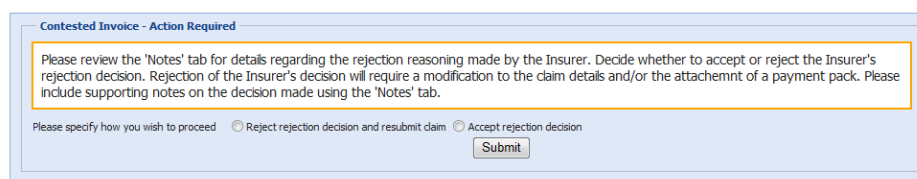

Figure 18

4 Claim Statuses Explained

A claim will always have a specific status throughout its life in iDAS CHOX. The behaviour of the claim and thus the behaviour of the user experience are directly affected by the status of the claim.

There are two areas in the system that allow you to see the status of a claim at any given point in time. The first is on the 'Claims Overview Grid' as shown by the red box in figure 19 below.

Claims								
Supplier Reference	Claim Number	VRN	Invoice Amount	Date Uploaded	Status	LOB	CHO	Insurer
CHOX0001		X567XER	£217.50	29/11/2008	AwaitingInvoiceData		Credit Hire Org	Insurer
CHOX0002		Y675876	£289.75	30/11/2008	InvoiceDataCalculationIncorrect		Credit Hire Org	Insurer

Figure 19

The second area where the claim status can be found is on the 'Claim Summary' pane on the claim details screen as shown by the red box in figure 20 below.

Claim Summary		
Insurer Insurer	Credit-hire Organisation Credit Hire Org	Created By
Supplier Reference CHOX1005	Insurer Claim Number 1000000	Created On 03 Dec 2008 12:20
Customer Mr Steve Hutton	Current Status InvoiceDataCalculationIncorrect	

Figure 20

There are a number of statuses for a claim, below is a list of all possible statuses with a brief description of each.

- **ClaimUnacknowledgedUnrouted** – This status refers to all new claims that have been uploaded into iDAS CHOX at the '1st claim notification' stage and are yet to be routed to the relevant claims handling team within the Insurer.
- **ClaimUnacknowledgedRouted** – This status refers to claims that have been routed to the relevant claims handling team within the Insurer. The Insurer has an action at this stage to review the claim details against details registered on internal systems and make a decision on whether to acknowledge or reject the claim, adding any notes as required and/or details regarding the claim acceptance/rejection, specifically details regarding liability and indemnity.
- **ClaimRejected** – This status requires action by the Credit Hire Organisation as to the Insurer's decision to reject the claim in question. The Credit Hire Organisation will need to either accept the Insurer's decision to reject the claim or contest the Insurer's decision to reject the claim. Supporting notes should be added regardless of the decision reached. The Credit Hire Organisation has the ability to amend the details held on the 'Claim Details' tab before contesting the Insurer's decision, notes should be added to the claim to inform the Insurer of any changes made.
- **ClaimRejectionAccepted** – This status indicates the end of the life of the claim in question as the Credit Hire Organisation has accepted the Insurer's decision to reject the claim, no further action is required by either the Insurer or the Credit Hire Organisation, and relevant notes should be added by the Credit Hire Organisation.
- **ClaimRejectionContested** – This status indicates that the Credit Hire Organisation has contested the Insurer's decision to reject the claim. The Insurer will have an action to review the contested claim and any supporting notes that may have been added and make a decision again on whether to acknowledge or reject the claim providing supporting notes/comments where applicable.
- **AwaitingCarHireInfo** – This status indicates that the Insurer has acknowledged the claim. If the Credit Hire Organisation is participating in the Delegated Authority scheme regarding Claims Handling then the Insurer at this point will be required to make a payment for the Claims Handling fee, once this payment has been made the Insurer is required to update iDAS CHOX. The Credit

Hire Organisation is required to raise a physical invoice on their internal invoicing system and send to the Insurer. It is the Credit Hire Organisation's duty when the status is 'AwaitingCarHireInfo' to complete the required fields on the 'Hire Monitoring' tab throughout the duration of the hire. Invoice details cannot be uploaded against a claim until the required fields have entries against them.

- **AwaitingInvoiceData** – This status indicates that the Credit Hire Organisation has entered the required fields on the 'Hire Monitoring' tab and thus the Credit Hire Organisation can upload invoice details against the claim.
- **InvoiceDataCalculationIncorrect** - This status indicates that the Credit Hire Organisation has made fundamental calculation errors in the invoice data uploaded. The Credit Hire Organisation will be presented with details via the 'Further Information' column on the XML upload screen and on the 'History' tab. The Credit Hire Organisation will need to make the necessary amendments to the 'Invoice Details' tab and re-submit the claim into the Business Rules Engine.
- **InvoiceApprovedByBRE** – This indicates that all of the details regarding the invoice and the claim pass through the Business Rules Engine **and** there are no flags on the claim prompting the Insurer to manually review the claim. The Insurer will then be required to approve the invoice for payment.
- **InvoiceEscalated** – This status indicates that there are certain details within the submitted claim/invoice that the Insurer would like to review before making a decision on whether to approve or reject the claim/invoice for payment. The Credit Hire Organisation is not required and cannot make any changes to the claim during this status.
- **ContestedInvoiceReferredToCHO** – This status indicates that the Insurer has escalated the claim to the Credit Hire Organisation with supporting notes on why this decision has been made. The Credit Hire Organisation is required to review any Insurer notes, and make a decision on whether to accept the claim/invoice rejection or contest the claim/invoice rejection. If the Credit Hire Organisation makes the decision to accept the claim/invoice rejection then supporting notes should be made. If the Credit Hire Organisation makes the decision to contest the claim/invoice rejection then the Credit Hire Organisation needs to make any necessary changes to the claim/invoice details and/or attach a payment pack if required and/or add a note to the claim and then re-submit the claim into the Business Rules Engine.
- **ContestedInvoiceReferredToInsurer** – This status indicates that the Credit Hire Organisation has received a claim previously in the state of 'ContestedInvoiceReferredToCHO' made any necessary amendments and re-submitted the claim into the Business Rules Engine and now it is back with the Insurer for review. The Insurer will review any new notes from the Business Rules Engine as well as the historic notes from previous Business Rule Engine tests, and if applicable Credit Hire Organisation's notes and/or the attached payment pack will be reviewed. The Insurer is required to make a decision on whether to approve the invoice or escalate the claim/invoice back to the Credit Hire Organisation.
- **InvoiceRejectionAccepted** - This status indicates the end of the life of the claim in question as the Credit Hire Organisation has accepted the Insurer's decision to reject the claim/invoice, no further action is required by either the Insurer or the Credit Hire Organisation, and relevant notes should be added by the Credit Hire Organisation.
- **AwaitingInvoicePayment** – This status indicates that the Insurer has made the decision to approve the claim/invoice for payment. The Insurer has an action to make a payment against the claim using the Insurer's internal payment system; once this payment has been made the Insurer is required to update the status in iDAS CHOX. The Insurer should enter notes against the claim for the Credit Hire Organisation's benefit regarding any important payment information.
- **InvoicePaymentLogged** – This status indicates that the Insurer has made a payment against the claim on the Insurer's internal payments system. The Credit Hire Organisation should review any notes against the claim for any relevant payment information. The Credit Hire Organisation is required to raise physical invoices for claims of this status for the amounts held on iDAS CHOX. This status indicates the end of the life of the claim in question; no further action is required within iDAS CHOX by either the Insurer or the Credit Hire Organisation.

5 Data Upload

5.1 iDAS CHOX Microsoft Excel Add-In

If you are using the fully-integrated iDAS CHOX system, the data upload of new hires is automatic.

If you are not using the fully-integrated iDAS CHOX system, you can manually upload data using the 'XML Uploads' option.

iDAS CHOX requires the data upload to be in a specific format. The required format is XML and is created from the Microsoft Excel bordereau via a purpose built Microsoft Excel Add-In.

This section describes the steps necessary to setup the iDAS CHOX Excel Add-In which can be used to create XML in the correct format for Credit Hire Organisations to import in the submission stages of the iDAS CHOX process.

This guide is designed for Microsoft Excel 2003. If you are using Microsoft Excel 2007 the process is slightly different, if this is applicable to you then please refer to Microsoft Excel 2007 online help at <http://office.microsoft.com> or alternatively contact iDAS CHOX support.

3.1.1 Installing the Add-In

To install the Excel Add-In please ensure you have the latest version of the iDAS CHOX XML macro and then follow the steps below:

- Save the 'iDAS_CHOX.xla' file to your PC. The file can be saved in any location desired, but the default location (when using Windows XP) for Microsoft Excel Add-Ins is 'C:\Documents and Settings\[User name]\Application Data\Microsoft\AddIns' so the suggestion is to save it in this location.
- Open Excel and select 'Add-Ins...' from the 'Tools' menu.
- On the opening 'Add-Ins' dialogue window, click the 'Browse...' button.
- Navigate to the location of the iDAS_CHOX.xla file and select it.
- When prompted, click 'Yes' to copy 'iDAS_CHOX.xla to the Add-Ins folder for [User name]?'
- Ensure that 'iDAS CHOX' is listed under 'Add-Ins available' and its checkbox is checked.
- Click 'OK' to close the 'Add-Ins' dialogue window.

3.1.2 To Add A New Toolbar

The best way to use the Add-In is to add a toolbar button that will run the code when clicked. You may either add a button to an existing toolbar or create a new toolbar to hold the button.

- In Excel, right-click anywhere in the toolbar area, and on the pop-up menu left click on the 'Customize...' option.
- On the 'Customize' dialogue screen that opens, make sure the 'Toolbars' tab is selected and click the 'New...' button.
- Give your new toolbar a meaningful name (for example 'Macro Buttons'), click 'Ok' then click 'Close' to close the 'Customize' screen.
- Your new toolbar will appear on the screen. Left click and drag the tool bar to the top and position your new toolbar as desired.

3.1.3 To Add A New Toolbar Button

- In Excel, right-click anywhere in the toolbar area and on the pop-up menu select the 'Customize...' option.
- On the 'Customize' dialogue window that opens, make sure the 'Commands' tab is selected, scroll down the 'Categories:' list and select 'Macros' by left clicking on the word.
- In the 'Commands:' pane left-click and drag 'Custom Button' and drop it where you wish the new button to be created. It is suggested that you add this to your newly created tool bar, however it can be added to any of the existing tool bars if desired.
- With the new button still selected, click the 'Modify Selection' button beneath the 'Categories' list and a new pop-up menu will be displayed.
- Give the button a meaningful name (for example 'iDAS CHOX XML') by typing in the 'Name' box. You may also change the image on the button by using 'Change Button Image'. Alternatively you may change the button to show its name rather than an image by selecting the 'Text Only (Always)' option.
- Finally, to associate the button with the code in the Add-In select 'Assign Macro...' and the 'Assign Macro' window will be displayed.
- Due to the code being held in the Add-In it won't be listed for selection, so type CHOX in the 'Macro Name' box and then click the 'Ok' button, and then 'Close' to close the 'Customize' screen.

5.2 Claim and Invoice Uploads

The upload of claims and invoices is carried out using the same screen as shown in figure 22. There is no requirement to specify whether the XML upload is of a '1st claim notification' or 'invoicing' nature, this is something iDAS CHOX handles automatically.

In order to upload an XML file please follow these steps:

- Click on the 'XML Uploads' link located in the top right side of the screen as shown by the red box in figure 21 below.

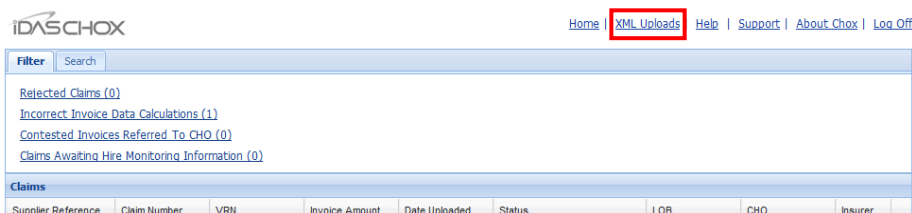

Figure 21

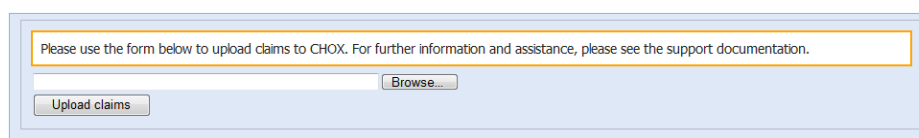

Figure 22

- Click on the 'Browse...' button.
- Navigate to the location of where the XML file is stored on your PC and click 'Open'.
- Click on the 'Upload claims' button to upload the XML file.
- The 'Claim Upload Summary' screen will be displayed once the XML has uploaded successfully (details below).

3.2.1 Claim Upload

Upon uploading '1st claim notifications' into iDAS CHOX, you will be presented with the 'Claim Upload Summary' screen detailing the status of each of the claims attempting to be uploaded as shown in figure 23 below. The status of the upload can be one of three statuses, either 'Claim Upload Successful', 'Claim Upload Failed' or 'Claim Already Exists'.

	Supplier Reference	Upload Status	Claim Status	Further Information
[1]	CHOX1001	Claim Upload Successful	ClaimUnacknowledgedUnrouted	
[2]	CHOX1002	Claim Upload Successful	ClaimUnacknowledgedUnrouted	
[3]	CHOX1003	Claim Upload Failed	-	• Selected Insurer is invalid
[4]	CHOX1004	Claim Upload Successful	ClaimUnacknowledgedUnrouted	
[5]	CHOX1005	Claim Upload Successful	ClaimUnacknowledgedUnrouted	
[6]	CHOX1006	Claim Upload Successful	ClaimUnacknowledgedUnrouted	
[7]	CHOX1007	Claim Upload Successful	ClaimUnacknowledgedUnrouted	
[8]	CHOX1008	Claim Upload Failed	-	• No Managing Repair information supplied for Claim Header. Please re-submit with this information.

Figure 23

Below details the necessary actions to take in order to handle the relevant upload status displayed:

- **Claim Upload Successful** – No action required, the claim status should read 'ClaimUnacknowledgedUnrouted'
- **Claim Already Exists** – A claim with the same Insurer Claim Number and/or Supplier Reference already exists in the iDAS CHOX database. This message may occur if you are trying to upload the invoice details for a particular claim, however this is not possible until the status of the claim is 'AwaitingInvoiceData' and therefore the required fields on the 'Hire Monitoring' tab have been populated.
- **Claim Upload Failed** – The row will be highlighted in red and there are three reasons why the claim details could not be uploaded into iDAS CHOX:
 - Mandatory data field missing
 - Incorrect data type for a particular data field
 - Incorrect data format for a particular data field

Please review the 'Further Information' column for details on why the claim upload has failed. The remark will detail which of the three failure reasons above apply and to which field(s). No records for a claim that has failed the upload will exist on the system. There are three options for the re-submission of a claim (that has failed on upload) at the '1st claim notifications' stage:

- Make a note of the Supplier Reference for all the claims that have failed the upload. Make the necessary amendments as per the upload remarks on the original bordereau file containing all the other claims (mixture of claim upload successful, claim already exists and claim upload failures) and create a new XML file for upload into iDAS CHOX. Upload the new XML file into iDAS CHOX (please note that there is likely to be a series of claims that report back as 'Claim Already Exists', for the claims that were uploaded successfully first time round).
- Make a note of the Supplier Reference for all the claims that have failed the upload. Open the bordereau file on which the XML was based and remove the lines for claims that have failed and paste these onto a fresh bordereau template, create an XML file based on the new bordereau. Upload the new XML file into iDAS CHOX.
- Make a note of the Supplier Reference for all the claims that have failed the upload. Before the next upload of 'new' '1st claim notifications' is done, open the bordereau file on which the XML (with the claim failure(s)) was based and remove the lines for claims that have failed and paste these onto the 'new' '1st claim notification' bordereau. Create an XML file based on the 'new' bordereau and upload the new XML file into iDAS CHOX.

3.2.2 Invoice Upload

Once the hire has been completed, the user will be required to upload an invoice to support the amount requested for payment to the insurer.

To upload an Invoice, you should follow the steps outlined in section 5.2. Once the upload is complete, the 'Claim Upload Summary' screen will be displayed detailing the status of each of the claims/invoices attempting to be uploaded as shown in figure 24 below.

	Supplier Reference	Upload Status	Claim Status	Further Information
[1]	CHOX1001	Invoice Uploaded Successful	InvoiceApprovedByBRE	
[2]	CHOX1002	Invoice Uploaded Successful	InvoiceApprovedByBRE	
[3]	CHOX1003	Claim Upload Failed	-	Selected Insurer is invalid
[4]	CHOX1004	Invoice Uploaded Successful	InvoiceApprovedByBRE	
[5]	CHOX1005	Invoice Uploaded Successful	InvoiceDataCalculationIncorrect	- FAILED : Hire Gross calculation is incorrect. - FAILED : Hire VAT calculation is incorrect. - FAILED : Total Net calculation is incorrect. - FAILED : Total VAT calculation is incorrect. - FAILED : Total Gross calculation is incorrect. - FAILED : Total to Pay calculation is incorrect.
[6]	CHOX1006	Invoice Uploaded Successful	InvoiceEscalated	

Figure 24

There are four possible upload statuses:

- Claim Upload Failed
- Invoice Already Exist
- Unable to Upload Invoice - Incorrect Claim Status
- Upload Successful

What follows is information on what the above statuses mean and any action that maybe required as a result.

- **Claim Upload Failed** – The invoice has not been uploaded to the system. The row will be highlighted in red to indicate that the invoice has not been accepted, the 'Further Information' column will contain details on why the invoice upload has failed. Please review the 'Further Information' column for details on why the invoice upload has failed. No records for a claim that has failed the upload will exist on the system. There are three options for the re-submission of an invoice (that has failed on upload) as described in section 5.2.1 above.
- **Invoice Already Exists** – If the claim has already been inputted onto the system, iDAS CHOX will notify the user that the Invoice already exists. The new invoice will not be uploaded onto the system. iDAS CHOX carries out automatic checks against details held on the claim/invoice such as the Invoice Number and Claim Number in order to make sure no duplicate invoices are added to the system. If this is a new invoice, then you will need to make the necessary changes to the bordereau details for the unique references check, carry out the re-submission process as per one of the three methods previously mentioned.
- **Unable to Upload Invoice - Incorrect Claim Status** – An invoice can only be uploaded once the claim has processed through the required cycle and the status of the claim is 'AwaitingInvoiceData'. The status of 'AwaitingInvoiceData' can only be achieved when the required/mandatory fields on the 'Hire Monitoring' tab have been populated, therefore please check these fields have been populated and if not enter the relevant values, carry out the re-submission process as per one of the three methods previously mentioned.
- **Upload Successful** – The claim/invoice data has been uploaded and saved to the system. The 'Claim Status' field will be one of three statuses when a claim/invoice has been successfully uploaded. Information on these statuses is covered in more detail throughout this document but a brief description is offered below:

- InvoiceEscalated – Line highlighted in orange. No entries in 'Further Information' column, claim will appear in Insurer work queue.
- InvoiceApprovedByBRE – Line highlighted in green. No entries in 'Further Information' column, claim will appear in Insurer work queue.
- InvoiceDataCalculationIncorrect – Line highlighted in orange. Claim will appear in a Credit Hire Organisation's work queue for action, with details on what action is required contained on the 'History' tab.

6 Inbox

As discussed previously, your inbox will display all work queues that are relevant to your role in the system. What follows is a list of the work queues as well as a description of which each contains as well as the action required to remove the claims from the queues by way of action.

6.1 Rejected Claims

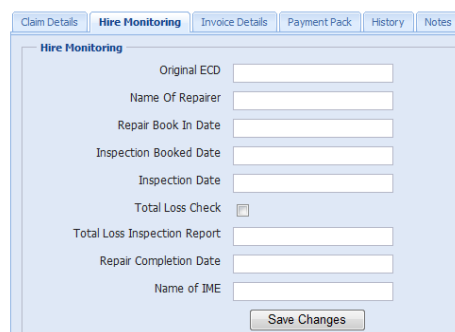

The 'Rejected Claims' work queue contains a list of claims that have been reviewed by the Insurer following the '1st claim notification' upload but rejected as a valid claim from the Insurer's perspective.

- There are two action routes for 'Rejected Claims':
 - Accept Claim Rejection
 - Contest Claim Rejection
- View the claim details of the claim in question and review the 'Notes' tab section to view any notes or queries added by the Insurer.
- If you are contesting the Insurer's decision to reject the claim then follow these steps:
 - Review the claim details as held on the 'Claim Details' and make any necessary amendments taking into consideration the notes of the Insurer, save changes.
 - Include any additional notes as required, if changes have been made to the claim details it would be recommended to include details of these changes for the benefit of the Insurer.
 - Re-submit the claim by clicking on the 'Contest this claim' radio button and then clicking on the 'Submit' button.
- If you are accepting the Insurer's decision to reject the claim then follow these steps, please note that this will end the life of the claim in iDAS CHOX:
 - Make a note as to the reason why you are accepting the claim rejection using the 'Notes' tab.
 - Accept the claim rejection decision by clicking on the 'Accept rejection decision' radio button and then clicking on the 'Submit' button.

6.2 Claims Awaiting Car Hire Information

The 'Claims Awaiting Car Hire Information' queue contains a list of claims that have been accepted/acknowledged by the Insurer and therefore the hire is likely to be in progress or even completed. All claims in this queue will require entries made on the 'Hire Monitoring' tab in order to enable the upload of invoice details against a claim. These entries could be sporadic during the hire duration as certain information/details will arise at differing points in time, the 'Hire Monitoring' tab in effect acts as an online log. In order to update the tab perform the following:

- View the claim details of the claim in question and navigate to the 'Hire Monitoring' tab, a screen shot of this tab is shown below in figure 25:

The screenshot shows the 'Hire Monitoring' tab selected in a navigation bar. The form contains the following fields and controls:

- Original ECD: Text input field
- Name Of Repairer: Text input field
- Repair Book In Date: Text input field
- Inspection Booked Date: Text input field
- Inspection Date: Text input field
- Total Loss Check: Checkbox
- Total Loss Inspection Report: Text input field
- Repair Completion Date: Text input field
- Name of JME: Text input field
- Save Changes: Button

Figure 25

- The following fields are mandatory (required before invoice details can be uploaded against the claim in question) with a brief description of the entry expected. These fields need to be populated prior to the upload of the invoice details against the claim, save changes each time using the 'Save Changes' button.
 - **Original ECD** – This is the Estimated Completion Date for the repair of the customer's vehicle. In some cases this will appear on the '1st claim notification' upload and therefore an entry will not be required.
 - **Name of Repairer** – The name of the garage which is carrying out the repairs on the customer's vehicle.
 - **Repair Book In Date** – The date the customer's vehicle entered the garage for repair.
 - **Inspection Booked Date** – The date the Engineer's inspection was booked.
 - **Inspection Date** – The date the Engineer's inspection took place.
 - **Total Loss Check** – Check to see if the customer's vehicle is a total loss or not following the output from the Engineer's inspection.
- The following fields are optional with a brief description of the entry expected, save changes each time using the 'Save Changes' button.
 - **Total Loss Inspection Report** – Soft copy upload of the Engineer's inspection report.
 - **Repair Completion Date** – The date all repairs were completed on the customer's vehicle.
 - **Name of IME** – The name of the Independent Motor Engineer who conducted the inspection.
 - **ECD Update (dynamic)** – Requirement to log modifications to the original ECD, revised date of repair completion to be entered along with details regarding the reason for delay and supporting information around the delay.
- Once the required details have been entered on the 'Hire Monitoring' tab, click on the 'Proceed' button that is located on the 'Hire Monitoring - Action Required' window pane.

6.3 Incorrect Invoice Data Calculations

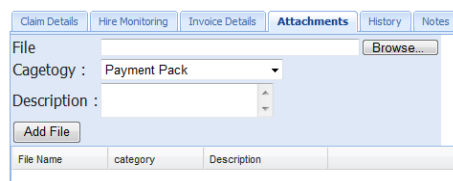

The 'Incorrect Invoice Data Calculation' work queue contains a list of all claims that have been rejected by the Business Rules Engine due to a fundamental error in the data calculations. An example error is an incorrect VAT calculation on one of the net fields. In order to rectify such an error, follow these steps:

- Select each claim in turn from the queue and view the claim details.
- Navigate to the 'History' tab and review the Business Rules Engine's error message(s) in order to investigate the reason behind why the invoice is being rejected.
- Navigate to the 'Invoice Details' tab and amend the invoice details in order to reflect the necessary changes based on the incorrect data calculations as communicated on the 'History' tab, save changes.
- Navigate to the 'Notes' tab and add any additional notes as required.
- Click on the 'Re-submit Claim/Invoice' button which is located on the 'Claim Data - Action Required' window pane in order to re-submit the claim into the Business Rules Engine.

6.4 Contested Invoices Referred To CHO

The 'Contested Invoices Referred to CHO' work queue contains a list of all claims that have been reviewed by the Insurer and a decision has been made to escalate the claim back to the Credit Hire Organisation. Follow the following actions in order to advance the status of the claim:

- Select each claim in turn from the queue and view the claim details.
- Navigate to the 'Notes' tab and review the Insurer's notes/comments for rejecting the claim.
- A decision needs to be made at this stage on whether to accept or contest the decision made by the Insurer to reject the claim.
- Acceptance of the decision made to reject the claim by the Insurer will require the following steps, please note that this will end the life of the claim in iDAS CHO:
- Navigate to the 'Notes' tab and add any additional notes as required.
- On the 'Contested Invoice - Action Required' window pane, click on the 'Accept rejection decision' radio button and then click on the 'Submit' button to accept the claim/invoice rejection.
- To contest the decision made by the Insurer to reject the claim will require the following actions:
 - The attachment of a payment pack at this stage will significantly enhance the chances of getting the claim approved. The hard copy payment pack will need to be scanned into a PDF format in order for the soft copy to be uploaded into iDAS CHO. To attach a payment pack to a claim please follow these steps:
 - Navigate to the 'Attachments' tab as shown in figure 26 below:

File Name	category	Description
-----------	----------	-------------

Figure 26

- Click on the 'Browse....' button.
- Navigate to the location of where the payment pack is stored and click 'Open'.
- Select the 'Payment Pack' from the drop down menu for the 'Category' field.
- Enter a description in the 'Description' field, offering a brief description of the file being uploaded
- Click on the 'Add File' button to attach the PDF file.
- If applicable and based on the notes provided by the Insurer, review the claim details, including invoicing details and make any necessary amendments and save changes.
- Navigate to the 'Notes' tab and add any additional notes as required, the reason you are contesting the claim/invoice rejection is useful in order for the Insurer to process and investigate efficiently.
- On the 'Contested Invoice - Action Required' window pane, click on the 'Reject rejection decision and resubmit claim' radio button and then click on the 'Submit' button in order to resubmit the claim into the Business Rules Engine.

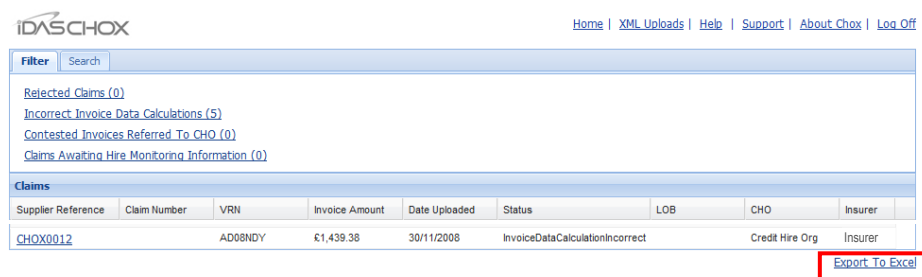

7 Report Extracts

There are a number of opportunities for information to be exported out of iDAS CHOX and into a Microsoft Excel spreadsheet.

7.1 Inbox Report Extracts

It is possible to export details of all the claims that appear in the 'Claims Overview Grid' for your inbox. To run this export, you must:

- Navigate to the work queue that you wish to run a Microsoft Excel report extract for.
- Click on the 'Export To Excel' button located at the bottom right hand corner of the 'Claims Overview Grid' as shown by the red box in figure 27 below.

The screenshot shows the iDAS CHOX interface. At the top, there's a navigation bar with links: Home, XML Uploads, Help, Support, About Chox, and Log Off. Below this is a 'Filter' section with a search bar. Under 'Filter', there are links for 'Rejected Claims (0)', 'Incorrect Invoice Data Calculations (5)', 'Contested Invoices Referred To CHO (0)', and 'Claims Awaiting Hire Monitoring Information (0)'. The main section is titled 'Claims' and contains a table with the following columns: Supplier Reference, Claim Number, VRN, Invoice Amount, Date Uploaded, Status, LOB, CHO, and Insurer. The table has one row of data: CHOX0012, AD08NDY, £1,439.38, 30/11/2008, InvoiceDataCalculationIncorrect, Credit Hire Org, and Insurer. At the bottom right of the table, there is a button labeled 'Export To Excel' which is highlighted with a red rectangular box.

Supplier Reference	Claim Number	VRN	Invoice Amount	Date Uploaded	Status	LOB	CHO	Insurer
CHOX0012		AD08NDY	£1,439.38	30/11/2008	InvoiceDataCalculationIncorrect	Credit Hire Org	Insurer	

Figure 27

- A pop-up screen will appear asking you whether you would like to save or open the file.
- To open the Microsoft Excel report click on the 'Open' button.
- To save the Microsoft Excel report follow these steps:
 - Click on the 'Save' button.
 - Choose a location of where to save the report and click on the 'Save' button.

7.2 Search Screen Extracts

If you need to export a more meaningful list of claims from the system, then the use of the 'Search' function is required:

- As discussed in section 3.2.4 perform the search criteria you desire.
- A list of claims that meet the search criteria will be displayed in the 'Claims Overview Grid'.
- The list of claims can then be exported by clicking on the 'Export To Excel' button located in the bottom right-hand corner of the 'Claims Overview Grid'.
- Perform the necessary steps to open or save the Microsoft Excel spreadsheet as detailed in section 7.1.

8 Raising Invoices

If the Credit Hire Organisation is participating in the Delegated Authority (DA) scheme regarding the Claims Handling fee then there is a need to raise two physical invoices to the Insurer.

If the Credit Hire Organisation is not participating in the DA scheme they will only need to follow instructions on how to raise the 'Hire Invoice' in section 8.2.

8.1 Claims Handling Invoice

This process only applies to the Credit Hire Organisation's that are on the DA scheme. When the Insurer has set the status of a claim to 'InvoicePaymentLogged' by clearing a claim/invoice for payment, the Credit Hire Organisation needs to raise a Claims Handling invoice and submit this to the Insurer.

In order to perform this task you must:

- Click on the 'Search' tab.
- Select 'InvoicePaymentLogged' from the drop down box for the 'Status' search field.
- Click on the 'Search' button.
- Export the search results to a Microsoft Excel spreadsheet as described in section 7.
- Using the exported spreadsheet, check against your internal invoicing system to ensure that you are not raising an invoice for the same payment twice.
- Enter the Claims Handling payment details into your internal payments system and raise the invoice.
- Send the physical invoice to the relevant Insurer.

Please note, you can display multiple Claims Handling invoices on a single invoice, which in turn can be submitted to the Insurer, a weekly/monthly Claims Handling invoice would be an efficient invoicing method in this instance.

8.2 Hire Invoice

In order to find out which claims require a hire invoice to be raised you will need to find all claims with the status of 'InvoicePaymentLogged'.

- Click on the 'Search' tab.
- Select 'InvoicePaymentLogged' from the drop down box for the 'Status' search field.
- Click on the 'Search' button.
- Export the search results to a Microsoft Excel spreadsheet as described in section 7.
- Using the exported spreadsheet, check against your internal invoicing system to ensure that you are not raising an invoice for the same payment twice.
- Using the details displayed on the spreadsheet ensure the payment details on your internal invoicing system are correct, make any changes if required.
- Send the physical invoice to the relevant Insurer.

9 Help and Support

- Your home page includes a link to this user guide in the top right-hand corner of the screen labelled 'Help' as shown in figure 28 below.

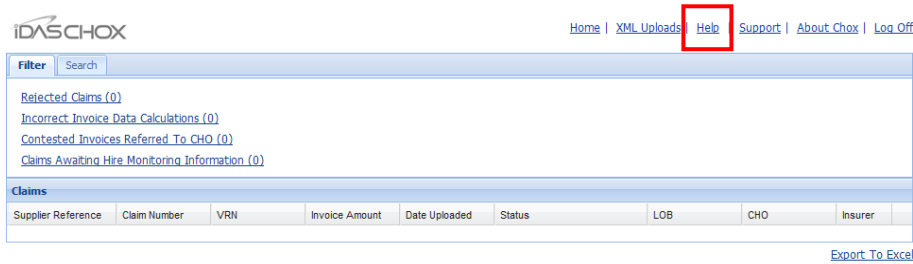

Figure 28

- Your home page includes a link to the iDAS CHOX support document, including hours of operation, contact details and the support protocol. The iDAS CHOX support document can be accessed via the 'Support' link as shown in figure 29 below.

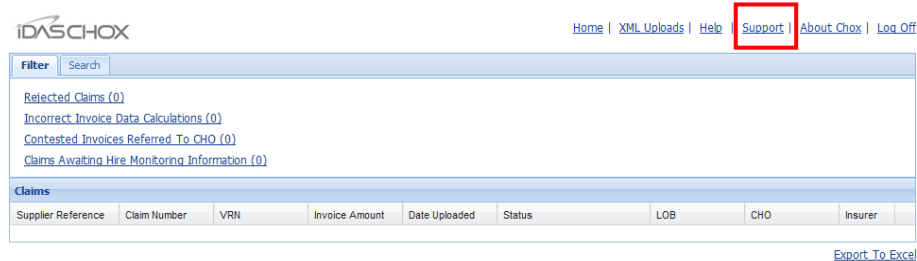

Figure 29

- For further support on the use of iDAS CHOX, please contact iDAS CHOX Support via the e-mail below:

choxsupport@sherwoodcompliance.co.uk
