1 iDAS CHOX Credit Hire Organisation and Insurer Responsibilities

This section details the roles and responsibilities for all parties regarding the use of iDAS CHOX regarding the credit hire and/or credit repair process.

1.1 Claim and Invoice Data

It is the Credit Hire Organisation's responsibility to upload claim and invoice data into iDAS CHOX. This will either be from a direct feed from internal systems or via an XML upload feed into the iDAS CHOX web browser front end.

It is the Credit Hire Organisation's responsibility to ensure that the data being uploaded into iDAS CHOX is of an accurate, complete and consistent nature.

1.2 Claim Acknowledgement

It is the Insurer's responsibility to review all incoming '1st claim notifications' and assess against details held on internal systems as to whether to acknowledge or reject a claim. A Credit Hire Organisation, cannot upload invoice details against a claim which has been rejected or yet to be acknowledged.

1.3 Claims Handling Payment (Delegated Authority (DA) Scheme)

Claims Handling fee payments only apply to Credit Hire Organisations that have subscribed to the Delegated Authority VAT savings scheme and thus a contract has been drawn and signed between Credit Hire Organisation and Insurer.

It is the responsibility of the Credit Hire Organisation to raise a separate invoice internally specifically for the Claims Handling fee. The Credit Hire Organisation is able to raise a Claims Handling invoice when and only when the claim has been accepted by the Insurer within iDAS CHOX.

It is the responsibility of the Insurer to make the required payments for the Claims Handling fee.

1.4 Monitoring of Hire

It is the Credit Hire Organisation's duty to monitor the progress of a hire/repair. Useful/vital information obtained from such a monitoring process is required to be entered onto iDAS CHOX against the claim in question.

1.5 Invoice/Claim Approval

It is the responsibility of the Insurer to review all claims that have either passed all business rules held in the 'Business Rules Engine' or claims that have failed fundamental business rules and therefore require review. The Insurer will be required to make a decision on whether to clear for payment or reject the claim in question given the information supplied.

1.6 Invoice/Claim Amendment

It is the Credit Hire Organisation's responsibility to make modifications to a claim/invoice given fundamental data errors. The Credit Hire Organisation is also required to supply additional information to a claim via the means of iDAS CHOX upon request by the Insurer.

1.7 Invoice Payment

It is the responsibility of the Insurer to monitor payments required for hire invoices using iDAS CHOX once a claim has been cleared for payment. The payment will be logged on the Insurer's internal payments system but a requirement to update iDAS CHOX of this payment is in order.

The Credit Hire Organisation is required to monitor iDAS CHOX for all claims where an Insurer has logged a payment for the invoice, all such claims will require a manual invoice to be raised on the Credit Hire Organisation's internal invoicing system and then sent to the Insurer.

2 Getting Started

2.1 System Requirements

iDAS CHOX can be accessed online and is supported by the following web browsers:

- Internet Explorer 7
- Mozilla Firefox
- Safari 3

2.2 Log on

- Before you can begin using iDAS CHOX, you will need to hand your registered username and password as supplied by iDAS CHOX support. You will have been sent an e-mail detailing your username and password.
- Using your preferred web browser from the list above, enter the following URL into your browser's address bar: **www.idaschox.com**
- Enter your case sensitive username and password into the relevant fields as shown in figure 1 below.

Figure 1

2.3 User Roles

There are five user roles for an Insurer within iDAS CHOX; each role is specific with appropriate read/write and access privileges. These roles are detailed below with a brief description of each role:

- **Claims Router** – Responsible for routing claims to their relevant business area in order for the appropriate claims handling teams to deal with the claims in an efficient and effective manner.
- **Claims Handler** – Responsible for reviewing '1st claim notifications' and making decisions on whether to accept or reject. Also required to monitor changes to the hire that will affect the amount billed.
- **Specialist Claims Reviewer** – (Motor Engineer). Responsible for reviewing invoices post Business Rules Engine processing and deciding whether to approve or reject invoices.
- **Payments Clerk** – Responsible for reviewing required payments for Claims Handling fees and Hire Invoices and logging on the internal payments system.
- **Insurer Admin** – Access to the same screens/functionality as the above four roles. In addition the Insurer Admin role will have access to the administrative function within iDAS CHOX, offering the ability to create users and assign users to roles and in the case of Claims Handlers, the assignment of business areas also. The Insurer admin role also offers access to iDAS CHOX's reporting functionality.

3 Basics

3.1 iDAS CHOX at a Glance

On logging into iDAS CHOX you will be presented with the screen as shown in figure 2 below (example view for a Claims Handler). The work queues displayed and which are explained later in this user guide will be relevant to your role upon logging in.

Figure 2

3.2 Navigation

iDAS CHOX can be navigated using a mouse to click on menu items and arrows.

3.2.1 Control Toolbar

The 'Control Toolbar' is located in the top right-hand side of the iDAS CHOX screen as shown by the red box displayed in figure 3 below.

Figure 3

The 'Control Toolbar' allows a user access to the following controls:

3.2.1.1 Home

When the 'Home' shortcut link is clicked the user will be taken to the home screen within iDAS CHOX as shown in figure 3 above.

3.2.1.2 Help

When the 'Help' shortcut link is clicked a pop-up window will appear which will contain the iDAS CHOX Insurer user guide.

3.2.1.3 Support

When the 'Support' shortcut link is clicked a pop-up window will appear which will contain iDAS CHOX support details.

3.2.1.4 About CHOX

When the 'About CHOX' shortcut link is clicked a pop-up window will appear which will contain details relating to the iDAS CHOX product including versioning and ownership.

3.2.1.5 Log Off

When the 'Log Off' shortcut link is clicked you will be logged off from your current activity and returned to the iDAS CHOX log on screen as shown in figure 1.

3.2.2 Inbox

The 'Inbox' tab which is the default view when you log into iDAS CHOX, allows a user to see work queues that are relevant to them. The work queues allow a user to see how many items are outstanding in a particular queue at any given moment and therefore require action.

As shown in figure 4 below the work queues are displayed as internet style hypertext links. In order to access a particular work queue, click on the name of the work queue you wish to view.

Figure 4

3.2.3 Claims Overview Grid

Located below the work queue items as shown in figure 4 above (indicated by the red box), is a small grid made up of a number of columns referred to as the 'Claims Overview Grid'. The 'Claims Overview Grid' displays all claims that relate to the work queue that is currently selected and therefore all items in the grid are of the same status. The 'Claims Overview Grid' displays a handpicked selection of columns that will allow you to uniquely identify a claim. In order to view the details of a particular claim click on the 'Supplier Reference' field (underlined with blue text, appearing as an internet style hypertext links) for the particular claim and the tab navigation screen as discussed below will appear.

On logging into iDAS CHOX the default 'Claims Overview Grid' view is blank and thus no claims are displayed in the 'Claims Overview Grid'.

3.2.4 Search

To access the search facility, click on the 'Search' tab which is located next to the 'Inbox' tab as shown by the red box in figure 5 below:

Inbox		Search	
Supplier Reference		Claim Number	
Invoice Number		VRN	
Status	--- ALL ---	Line of Business	--- ALL ---
Claim Upload Date From		Claim Upload Date To	
Invoice Upload Date From		Invoice Upload Date To	
Hire Date From		Hire Date To	
Supplier Name	--- ALL ---		
Search			

Figure 5

Figure 5 above represents the extensive search functionality that is available in iDAS CHOX. A search can range from a search on a single field to a search across multiple fields.

- To maximise search results, search using only one field.
- To narrow search results, search using multiple fields.

Detailed below is a list of the searchable fields with a brief explanation on the results that would be returned if a search was conducted on each:

- **Supplier Reference** - Unique reference for the Credit Hire Organisation (as stored on internal systems) in order to identify a claim. Will display only one result in the 'Claim Overview Grid'.
- **Supplier Name** – Search will return all claims (regardless of their status in the system) for a particular Credit Hire Organisation/Supplier.
- **Claim Number** - Unique reference for the Insurer (as stored on internal systems) in order to identify a claim. Will display only one result in the 'Claim Overview Grid'.
- **VRN** – Vehicle Registration Number. Search will return results of all claims that have been logged against the VRN entered. It is possible for more than one claim to exist against a single VRN.
- **Invoice Number** – This number refers to the Credit Hire Organisation's internal invoicing number. This search could return a specific claim relating to an invoice payment for a credit hire and/or credit repair or return a specific claim relating to a Claims Handling invoice in the case of Credit Hire Organisations under the Delegated Authority scheme.
- **Claim Upload Date From** – Date at which the claim was uploaded into iDAS CHOX via the XML upload for the '1st Claim Notification' stage of the claim lifecycle.
- **Claim Upload Date To** - Date at which the claim was uploaded into iDAS CHOX via the XML upload for the '1st Claim Notification' stage of the claim lifecycle.
- **Invoice Upload Date From** - Date at which the claim was uploaded into iDAS CHOX via the XML upload for the invoicing stage of the claim lifecycle.
- **Invoice Upload Date To** - Date at which the claim was uploaded into iDAS CHOX via the XML upload for the invoicing stage of the claim lifecycle.
- **Hire Date From** – Date at which the hire of the replacement vehicle commenced (hire start).
- **Hire Date To** - Date at which the hire of the replacement vehicle commenced (hire start).
- **Status** – Search will return results for all claims in iDAS CHOX of the specified status.
- **Line of Business** – The search will return results for all claims in iDAS CHOX for the specified 'Line of Business'.

To use the iDAS CHOX search facility select the relevant search criteria in the form of the supplied drop down menus, date calendar pop-ups or by typing search strings into the relevant field(s). For text entry searches, the inclusion of a '%' symbol anywhere in the entry will act as a wild card character (representing any group of characters or numbers), for example a search on the 'Claim Number' field with '%08%' would return all claims which have '08' in the 'Claim number' and any group of characters either side of the '08'. An example search entry is shown in figure 6 below:

Figure 6

Once the search criteria has been entered click on the 'Search' button. Results from the above search criteria are shown in figure 7 below:

Supplier Reference	Claim Number	VRN	Invoice Amount	Date Uploaded	Status	LOB	CHO	Insurer
CHOX1007	200864737371	X567XER		01/12/2008	AwaitingInvoiceData	Lob Test	Credit Hire Org	Insurer

[Export To Excel](#)

Figure 7

3.2.4.1 Expanding/Collapsing Tab Details

By default the information displayed within a tab is collapsed in that the tab section header is shown without the underlying detail as shown in figure 9 below. In order to view detail under each of the tab section headers you should click on the tab section header in question. The red box in figure 9 below represents the 'Customer Details' section header.

Figure 9

When you have clicked on a tab section header all underlying details will expand under the tab section header as shown by the red box in figure 10 below. Clicking on the tab section header section again will collapse the underlying details returning the user to view as shown in figure 9.

Figure 10

3.2.4.2 Data Read/Write Views and Saving Data

Depending on the status of the claim the details contained within a tab will either be in a read only format or in an editable format. Read only tab details will be displayed as shown in figure 11 below, with data for a particular field being displayed next to the field label with no option to modify.

Figure 11

Editable tab details on the other hand will have pre-populated fields in an editable field format as shown in figure 12 below.

Figure 12

The editing of fields will require you to make the changes permanent within the system by clicking on the relevant button that is displayed in and around the editable fields. This button will be either 'Save Changes' or 'Submit'. The 'Save Changes' button is shown in figure 13 below.

Figure 13

3.2.4.3 Tab Locking

iDAS CHOX offers access to tabs depending on the status of the claim and therefore what can and cannot be viewed. If a tab has blue writing as the tab name then the tab can be navigated to, however if the tab has grey writing as the tab name then the tab cannot be navigated. Based on figure 14 below, 'Claim Details' tab, 'Hire Monitoring' tab, 'Invoice Details' tab, 'History' tab and 'Notes' tab can all be navigated to, but the 'Payment Pack' tab cannot be navigated to.

Figure 14

3.2.4.4 Tabs Explained

An explanation on the content displayed on each tab is offered below.

3.2.4.4.1 Claim Details Tab

The 'Claim Details' tab contains information relating to the general claim details, non-fault party's details, at-fault party's details, witness details, vehicle damage details, incident details, injury details, injury solicitor details and engineer report details.

3.2.4.4.2 Hire Monitoring Tab

The 'Hire Monitoring' tab contains information relating to the monitoring of the hire/repair. During the length of time the customer has the vehicle on hire, it is the Credit Hire Organisation's duty to monitor the progress of the repair/hire, any update/modification that is deemed 'important' by the Insurer is noted on this tab as and when the update occurs.

3.2.4.4.3 Invoice Details Tab

The 'Invoice Details' tab contains a breakdown of the items that make up the total invoice cost including details regarding the vehicle on hire, the length of hire, extras added to the vehicle for the hire, repair costs and any other additional costs that have been incorporated as part of the hire.

3.2.4.4.4 Attachments Tab

The 'Attachments' tab allows you to attach files to a claim in various file formats such as PDF documents, Microsoft Word documents and common image file formats. Photos, associated documents and payment packs can be attached to a claim using the 'Attachments' tab.

To upload a file attachment, follow the below steps:

- Navigate to the 'Attachments' tab as shown in figure 15 below:

The screenshot shows the 'Attachments' tab selected in a software interface. At the top, there are several tabs: 'Claim Details', 'Hire Monitoring', 'Invoice Details', 'Attachments' (which is highlighted), 'History', and 'Notes'. Below the tabs, there is a form for adding a new attachment. It includes a 'File' input field with a 'Browse...' button to its right. Below this is a 'Category' dropdown menu currently set to 'Payment Pack'. Underneath is a 'Description' text area with a small upward arrow icon. At the bottom of the form is an 'Add File' button. Below the form is a table with three columns: 'File Name', 'category', and 'Description'. The table is currently empty.

Figure 15

- Click on the 'Browse....' button.
- Navigate to the location of where the file is stored and click 'Open'.
- Select the relevant category of file upload using the drop down menu for the 'Category' field.
- Enter a description in the 'Description' field, offering a brief description of the file being uploaded
- Click on the 'Add File' button to attach the PDF file.

3.2.4.4.5 History Tab

The 'History' tab contains details of all actions made by both Insurer and Credit Hire Organisation during the lifecycle of a claim; an example action is the upload of a claim and the information relating to that upload such as date, time and by whom. The 'History' tab also contains details regarding the results of the Business Rules Engine when an invoice has been uploaded into iDAS CHOX and any messages as a result of this process are stored. The items detailed on the 'History' tab are displayed in chronological order with the newest history items being displayed first as shown in figure 16 below:

Claim Details	Hire Monitoring	Invoice Details	Attachments	History	Notes
ID	Created On	Created By	Message Text		
369	03/12/2008	system	FAILED : Hire Gross calculation is incorrect.RuleFailed		
373	03/12/2008	system	FAILED : Hire VAT calculation is incorrect.RuleFailed		
376	03/12/2008	system	FAILED : Total Net calculation is incorrect.RuleFailed		
377	03/12/2008	system	FAILED : Total VAT calculation is incorrect.RuleFailed		
378	03/12/2008	system	FAILED : Total Gross calculation is incorrect.RuleFailed		
383	03/12/2008	system	FAILED : Total to Pay calculation is incorrect.RuleFailed		

Figure 16

3.2.4.4.6 Notes Tab

The 'Notes' tab is an empty data field which can be used to add queries and comments by both Insurers and Credit Hire Organisations. This opens up invaluable dialogue in resolving claims and disputes swiftly and efficiently. All notes can be viewed at any stage of the iDAS CHOX process by navigating to the 'Notes' tab within a claim. Follow the below steps in order to add a note to a claim:

- View the claim details of the claim in question and navigate to the 'Notes' tab, a screen shot of the 'Notes' tab is shown below in figure 17.

Figure 17

- To write a question or a note, click into the 'Add a new note' field and type the message.
- Click on the 'Add Note' button.
- All notes that have been entered against a claim by either the Credit Hire Organisation or Insurer will appear on the 'Notes' tab, all notes for each claim are archived by date and are not amendable.

3.2.5 Claim Summary Pane

When viewing the claim details of a particular claim, you will be presented with the 'Claim Summary' pane as shown in figure 18. The 'Claim Summary' pane contains information that is regarded as essential to a user and therefore is displayed at all times regardless of the tab you navigate to.

Claim Summary			
Insurer	Insurer	Credit-hire Organisation	Credit Hire Org
Supplier Reference	CHOX1005	Insurer Claim Number	1000000
Customer	Mr Steve Hutton	Current Status	InvoiceDataCalculationIncorrect
		Created By	
		Created On	03 Dec 2008 12:20

Figure 18

3.2.6 Action Pane

For certain statuses, an action window pane will be displayed which will require certain action in order to move the claim to the next status/lifecycle step. The action pane will be located beneath the 'Claim Summary' pane when viewing the claim detail as discussed above. The action pane in order to reject an invoice or clear an invoice for payment is shown below in figure 19 as an example.

BRE Approved Claim - Action Required

This claim and it's related invoice have been cleared by the CHOX approval system. Please review the invoice and claim information supplied, and choose whether to clear the invoice for payment or reject the invoice "Clear for payment" or "Reject Invoice"

Please specify how you wish to proceed ☐ Reject Invoice ☐ Clear for payment

Figure 19

4 Claim Statuses Explained

A claim will always have a specific status throughout its life in iDAS CHOX. The behaviour of the claim and thus the behaviour of the user experience are directly affected by the status of the claim.

There are two areas in the system that allows you to see the status of a claim at any given point in time. The first is on the 'Claims Overview Grid' as shown by the red box in figure 20 below.

Claims									
Supplier Reference	Claim Number	VRN	Invoice Amount	Date Uploaded	Status	LOB	CHO	Insurer	
CHOX0001		X567XER	£217.50	29/11/2008	AwaitingInvoiceData		Credit Hire Org	Insurer	
CHOX0002		Y675876	£289.75	30/11/2008	InvoiceDataCalculationIncorrect		Credit Hire Org	Insurer	

Figure 20

The second area where the claim status can be found is on the 'Claim Summary' pane on the claim details screen as shown by the red box in figure 21 below.

Claim Summary			
Insurer	Insurer	Credit-hire Organisation	Credit Hire Org
Supplier Reference	CHOX1005	Insurer Claim Number	1000000
Customer	Mr Steve Hutton	Current Status	InvoiceDataCalculationIncorrect
		Created By	
		Created On	03 Dec 2008 12:20

Figure 21

There are a number of statuses for a claim, below is a list of all possible statuses with a brief description of each.

- **ClaimUnacknowledgedUnrouted** – This status refers to all new claims that have been uploaded into iDAS CHOX at the '1st claim notification' stage and are yet to be routed to the relevant claims handling team within the Insurer.
- **ClaimUnacknowledgedRouted** – This status refers to claims that have been routed to the relevant claims handling team within the Insurer. The Insurer has an action at this stage to review the claim details against details registered on internal systems and make a decision on whether to acknowledge or reject the claim, adding any notes as required and/or details regarding the claim acceptance/rejection, specifically details regarding liability and indemnity.
- **ClaimRejected** – This status requires action by the Credit Hire Organisation as to the Insurer's decision to reject the claim in question. The Credit Hire Organisation will need to either accept the Insurer's decision to reject the claim or contest the Insurer's decision to reject the claim. Supporting notes should be added regardless of the decision reached. The Credit Hire Organisation has the ability to amend the details held on the 'Claim Details' tab before contesting the Insurer's decision, notes should be added to the claim to inform the Insurer of any changes made.
- **ClaimRejectionAccepted** – This status indicates the end of the life of the claim in question as the Credit Hire Organisation has accepted the Insurer's decision to reject the claim, no further action is required by either the Insurer or the Credit Hire Organisation, and relevant notes should be added by the Credit Hire Organisation.
- **ClaimRejectionContested** – This status indicates that the Credit Hire Organisation has contested the Insurer's decision to reject the claim. The Insurer will have an action to review the contested claim and any supporting notes that may have been added and make a decision again on whether to acknowledge or reject the claim providing supporting notes/comments where applicable.
- **AwaitingCarHireInfo** – This status indicates that the Insurer has acknowledged the claim. If the Credit Hire Organisation is participating in the Delegated Authority scheme regarding Claims Handling then the Insurer at this point will be required to make a payment for the Claims Handling

fee, once this payment has been made the Insurer is required to update iDAS CHOX. The Credit Hire Organisation is required to raise a physical invoice on their internal invoicing system and send to the Insurer. It is the Credit Hire Organisation's duty when the status is 'AwaitingCarHireInfo' to complete the required fields on the 'Hire Monitoring' tab throughout the duration of the hire. Invoice details cannot be uploaded against a claim until the required fields have entries against them.

- **AwaitingInvoiceData** – This status indicates that the Credit Hire Organisation has entered the required fields on the 'Hire Monitoring' tab and thus the Credit Hire Organisation can upload invoice details against the claim.
- **InvoiceDataCalculationIncorrect**- This status indicates that the Credit Hire Organisation has made fundamental calculation errors in the invoice data uploaded. The Credit Hire Organisation will be presented with details via the 'Further Information' column on the XML upload screen and on the 'History' tab. The Credit Hire Organisation will need to make the necessary amendments to the 'Invoice Details' tab and re-submit the claim into the Business Rules Engine.
- **InvoiceApprovedByBRE** – This indicates that all of the details regarding the invoice and the claim pass through the Business Rules Engine **and** there are no flags on the claim prompting the Insurer to manually review the claim. The Insurer will then be required to approve the invoice for payment.
- **InvoiceEscalated** – This status indicates that there are certain details within the submitted claim/invoice that the Insurer would like to review before making a decision on whether to approve or reject the claim/invoice for payment. The Credit Hire Organisation is not required and cannot make any changes to the claim during this status.
- **ContestedInvoiceReferredToCHO** – This status indicates that the Insurer has escalated the claim to the Credit Hire Organisation with supporting notes on why this decision has been made. The Credit Hire Organisation is required to review any Insurer notes, and make a decision on whether to accept the claim/invoice rejection or contest the claim/invoice rejection. If the Credit Hire Organisation makes the decision to accept the claim/invoice rejection then supporting notes should be made. If the Credit Hire Organisation makes the decision to contest the claim/invoice rejection then the Credit Hire Organisation needs to make any necessary changes to the claim/invoice details and/or attach a payment pack if required and/or add a note to the claim and then re-submit the claim into the Business Rules Engine.
- **ContestedInvoiceReferredToInsurer** – This status indicates that the Credit Hire Organisation has received a claim previously in the state of 'ContestedInvoiceReferredToCHO' made any necessary amendments and re-submitted the claim into the Business Rules Engine and now it is back with the Insurer for review. The Insurer will review any new notes from the Business Rules Engine as well as the historic notes from previous Business Rule Engine tests, and if applicable Credit Hire Organisation's notes and/or the attached payment pack will be reviewed. The Insurer is required to make a decision on whether to approve the invoice or escalate the claim/invoice back to the Credit Hire Organisation.
- **InvoiceRejectionAccepted** - This status indicates the end of the life of the claim in question as the Credit Hire Organisation has accepted the Insurer's decision to reject the claim/invoice, no further action is required by either the Insurer or the Credit Hire Organisation, and relevant notes should be added by the Credit Hire Organisation.
- **AwaitingInvoicePayment** – This status indicates that the Insurer has made the decision to approve the claim/invoice for payment. The Insurer has an action to make a payment against the claim using the Insurer's internal payment system; once this payment has been made the Insurer is required to update the status in iDAS CHOX. The Insurer should enter notes against the claim for the Credit Hire Organisation's benefit regarding any important payment information.
- **InvoicePaymentLogged** – This status indicates that the Insurer has made a payment against the claim on the Insurer's internal payments system. The Credit Hire Organisation should review any notes against the claim for any relevant payment information. The Credit Hire Organisation is required to raise physical invoices for claims of this status for the amounts held on iDAS CHOX. This status indicates the end of the life of the claim in question; no further action is required within iDAS CHOX by either the Insurer or the Credit Hire Organisation.

5 Inbox

As discussed previously, your inbox will display all work queues that are relevant to your role in the system. What follows is a list of the work queues as well as a description of which each contains as well as the action required to remove the claims from the queues by way of action. In brackets against each work queue is the role(s) that will have access to the relevant work queue.

5.1 New Claims to be routed (Claims Router, Insurer Admin)

The 'New Claims to be routed' work queue contains a list of new '1st claim notifications' that have been uploaded by the Credit Hire Organisation. The new claims need to be routed to the relevant business areas/claims handling teams within the Insurer.

- Select each claim in turn from the queue and view the claim details.
- Review the claim details held on iDAS CHOX against details stored on internal systems to work out which 'Line of Business' the claim needs to be routed to.
- Using the 'Line of Business' drop down menu located on the 'Claim Routing – Action Required' window pane, select a 'Line of Business' to route the claim to.
- Click on the button labelled 'Assign Line of Business' to route the claim.

5.2 Claims Awaiting Acknowledgement (Claims Handler, Insurer Admin)

The 'Claims Awaiting Acknowledgement' work queue contains a list of new claims that have been routed to your relevant 'Line of Business(es)'. Claims in this queue need to be reviewed and a decision made on whether to acknowledge or reject the new claims.

- Select each claim in turn from the queue and view the claim details.
- Review the claim details held on iDAS CHOX against details stored on internal systems.
- A decision needs to be made at this stage on whether to acknowledge or reject the new claim.
- Before making the appropriate decision enter any additional notes that are applicable and likely to benefit the Credit Hire Organisation by way of the 'Notes' tab.
- Using the 'Claim Acknowledgement – Action Required' window pane, enter the required details for the claim acknowledgement.
- If you are rejecting the claim, click on the 'Reject this claim' radio button and then click on the 'Save changes and register decision' button.
- If you are acknowledging the claim, click on the 'Acknowledge this claim' radio button and then click on the 'Save changes and register decision' button (this is not declaration that you are accepting the final hire amount submitted at the invoicing stage by the Credit Hire Organisation).

5.3 Re-Submitted Claims Awaiting Acknowledgement (Claims Handler, Insurer Admin)

The 'Re-Submitted Claims Awaiting Acknowledgement' work queue contains a list of claims that have previously been rejected back to the Credit Hire Organisation by the Insurer. The Credit Hire Organisation has reviewed the claim rejection and has made the decision to contest the claim rejection, with supporting notes accompanied.

- Select each claim in turn from the queue and view the claim details.
- Review the Credit Hire Organisation's notes as to why they are contesting the claim rejection, this may detail that amendments have been made to the claim detail.
- If applicable based on the Credit Hire Organisation's notes, review the claim details held on iDAS CHOX against details stored on internal systems.
- Once again, a decision needs to be made at this stage on whether to acknowledge or reject the claim.
- Before making the appropriate decision enter any additional notes that are applicable and likely to benefit the Credit Hire Organisation by way of the 'Notes' tab.
- Using the 'Claim Acknowledgement – Action Required' window pane, review the required fields for claim acknowledgement and make any modifications/updates if required.
- If you are rejecting the claim, click on the 'Reject this claim' radio button and then click on the 'Save changes and register decision' button.
- If you are acknowledging the claim, click on the 'Acknowledge this claim' radio button and then click on the 'Save changes and register decision' button.

5.4 Hire Update Anomalies (Claims Handler, Insurer Admin)

The 'Hire Update Anomalies' work queue contains a list of all claims that have had 'fundamental' changes regarding the hire period and estimated date of completion for the customer's vehicle repair. These claims filter through into a user's queue as soon as the update is made by the Credit Hire Organisation. No action is required on this queue within iDAS CHOX, acting merely as a notification for an Insurer to take possible action.

- Select each claim in turn from the queue and view the claim details.
- Navigate to the 'Hire Monitoring' tab and review the changes made and the reason for the changes.
- A decision needs to be made as to whether to follow the modification/update up with the Credit Hire Organisation or the repairer carrying out the work on the customer's vehicle. This action is conducted outside of the iDAS CHOX system but the Insurer should include any relevant notes to the claim in question using the 'Notes' tab for review purposes at the invoicing stage.
- The lifecycle of the claim continues as normal regardless of the Insurer's action, resulting action may result at the invoicing stage depending on the investigative outcome by the Insurer.
- In extreme cases the Credit Hire Organisation may be required to modify the updates made following discussions with the Insurer.

5.5 Escalated Invoices (Specialist Claims Reviewer, Insurer Admin)

The 'Escalated Invoices' work queue contains a list of claims and invoices that have been uploaded by the Credit Hire Organisation and have subsequently failed the tests applied in the Business Rules Engine.

- Select each claim in turn from the queue and view the claim details.
- Navigate to the 'History' tab and review which of the applied business rules have failed.
- Based on the reason(s) for the claim/invoice failure from the Business Rules Engine as detailed on the 'History' tab review the claim and invoice details and any supporting notes detailed on the 'Notes' tab. Review any relevant attachments that the Credit Hire Organisation may have supplied.
- A decision needs to be made to either reject the claim/invoice or to clear the invoice for payment.
- To reject the claim/invoice follow the below steps:
 - Navigate to the 'Notes' tab and add any additional notes as required. If you require sight of the payment pack then you should include this request on the notes tab.
 - On the 'Escalated Invoice - Action Required' window pane, click on the 'Reject Invoice' radio button and then click on the 'Submit' button to reject the claim.
- To accept the claim/invoice follow the below steps:
 - Navigate to the 'Notes' tab and add any notes for the Payments Clerk if appropriate.
 - On the 'Escalated Invoice - Action Required' window pane, click on the 'Clear for payment' radio button and then click on the 'Submit' button to clear the invoice for payment.

5.6 Contested Invoices Referred To Insurer (Specialist Claims Reviewer, Insurer Admin)

The 'Contested Invoices Referred To Insurer' work queue contains a list of claims that have previously been rejected back to the Credit Hire Organisation by the Insurer. The Credit Hire Organisation has contested the claim/invoice rejection, the claim/invoice may have been amended, a payments pack may have been attached or notes added to the claim.

- Select each claim in turn from the queue and view the claim details.
- Navigate to the 'History' tab and review which have the applied business rules have failed.
- Navigate to the 'Notes' tab and review notes as to why the Credit Hire Organisation is contesting the claim/invoice rejection.
- Based on the reason(s) for the claim/invoice failure from the Business Rules Engine as detailed on the 'History' tab and the notes supplied by the Credit Hire Organisation, review the claim and invoice details held in iDAS CHOX. Review any relevant attachments that the Credit Hire Organisation may have supplied.
- A decision needs to be made to either reject the claim/invoice or to clear the invoice for payment.
- To reject the claim/invoice follow the below steps:
 - Navigate to the 'Notes' tab and add any additional notes as required. If you require sight of the payment pack then you should include this request on the notes tab.
 - On the 'Contested Invoice - Action Required' window pane, click on the 'Reject Invoice' radio button and then click on the 'Submit' button to reject the claim.
- To accept the claim/invoice follow the below steps:
 - Navigate to the 'Notes' tab and add any notes for the Payments Clerk if appropriate.
 - On the 'Contested Invoice - Action Required' window pane, click on the 'Accept and proceed to payment' radio button and then click on the 'Submit' button to clear the invoice for payment.

5.7 Invoices Approved By BRE (Specialist Claims Reviewer, Insurer Admin)

The 'Invoices Approved By BRE' work queue contains a list of claims and invoices that have been uploaded by the Credit Hire Organisation and have subsequently passed all of the tests applied in the Business Rules Engine.

- Select each claim in turn from the queue and view the claim details.
- Navigate to the 'Notes' tab and review to see if there are any significant notes logged against the claim since its origin in iDAS CHOX.
- A decision needs to be made to either reject the claim/invoice or to clear the invoice for payment.
- To reject the claim/invoice follow the below steps:
 - Navigate to the 'Notes' tab and add any additional notes as required. If you require sight of the payment pack then you should include this request on the notes tab.
 - On the 'BRE Approved Claim - Action Required' window pane, click on the 'Reject Invoice' radio button and then click on the 'Submit' button to reject the claim.
- To accept the claim/invoice follow the below steps:
 - Navigate to the 'Notes' tab and add any notes for the Payments Clerk if appropriate.
 - On the 'BRE Approved Claim - Action Required' window pane, click on the 'Clear for payment' radio button and then click on the 'Submit' button to clear the invoice for payment.

5.8 Approved Invoices Awaiting Payment (Payments Clerk, Insurer Admin)

The 'Approved Invoices Awaiting Payment' work queue contains a list of claims/invoices that have been approved for payment by the Specialist Claims Reviewer and therefore require payment on the Insurer's internal payment system. The Insurer is required to update iDAS CHOX when the payment has been logged on the internal payment system.

- There are two ways to make payments for hire invoices using iDAS CHOX.
- Claim by claim method is as follows:
 - Select each claim in turn from the queue and view the claim details.
 - Navigate to the 'Notes' tab and review any relevant payment notes that may have been added during the life of the claim in the system. It is possible that the Specialist Claims Reviewer has added some specific payment information following their review of the claim/invoice.
 - Review the percentage of liability that has been stated and agreed. The percentage of Liability is located on the 'Claim Summary' window pane when entering the claim details for a particular claim. Ensure the 'Notes' tab does not have any additional information regarding liability and appropriate percentages.
 - Open your internal payments system and perform a search against the Claim Number in question.
 - Enter any supporting information required and enter the payment as detailed in iDAS CHOX (bearing in mind percentage of liability), include £100 on top of the amount detailed in iDAS CHOX as the 'total to pay'. The additional £100 is for the Claims Handling fee, the fee is VAT exempt so it must be added to the 'total to pay' or the 'total gross'.
 - Once the payment has been made on the internal payment system, switch back to iDAS CHOX and click on the 'Invoice Payment Logged' button that is located on the 'Invoice ready for payment - Action Required' window pane when viewing the claim detail for the claim in question.
 - Add any supporting notes regarding the payment using the 'Notes' tab.
- The bulk payment method is as follows:

- Click on the 'Approved Invoices Awaiting Payment' work queue.
- Produce a Microsoft Excel report for all of the claims/invoices with this status by following the report extract steps as detailed in section 7.
- Navigate to the 'Notes' tab on the Microsoft Excel report and review any relevant payment notes that may have been added during the life of the claim in the system. It is possible that the Specialist Claims Reviewer has added some specific payment information following their review of the claim/invoice. Ensure the 'Notes' tab does not have any additional information regarding liability and appropriate percentages.
- Review the percentage of liability that has been stated and agreed as indicated on the 'Claim Details' tab on the Microsoft Excel report.
- Open your internal payments system and perform a search against the Claim Number in question.
- Enter any supporting information required and enter the payment as detailed in iDAS CHOX (bearing in mind percentage of liability), include £100 on top of the amount detailed in iDAS CHOX as the 'total to pay'. The additional £100 is for the Claims Handling fee, the fee is VAT exempt so it must be added to the 'total to pay' or the 'total gross'.
- Repeat the above process for each claim that appears on the Microsoft Excel report.
- Once all the payments have been made on the internal payment system, switch back to iDAS CHOX. Ensuring that you are still in the 'Approved Invoices Awaiting Payment' queue, take each claim from the 'Claims Overview Grid' in turn that appears on the Microsoft Excel report and enter the claim details of the claim in question. Click on the 'Invoice Payment Logged' button that is located on the 'Invoice ready for payment - Action Required' window pane.
- Add any supporting notes regarding the payment using the 'Notes' tab.
- Repeat the above two process steps until all of the claims/invoices that are detailed on the Microsoft Excel report have been updated in iDAS CHOX.

6 Business Rules Engine Tests and Messages

As discussed throughout this user guide, iDAS CHOX has a purpose built 'Business Rules Engine' which performs a series of tests on the claim and invoice data that a Credit Hire Organisation submits. Each claim is processed through the 'Business Rules Engine' and the result can be one of three, with the result directly affecting the status of the claim and thus which work queue the claim is routed to.

The three results from the 'Business Rules Engine' are as follows:

Invoice Data Calculation Incorrect – When tests 16-23 fail. The Credit Hire Organisation has an action to amend the invoice detail at which the calculated error is occurring, when the modification has been made, the claim/invoice will be re-submitted into the 'Business Rules Engine' where all of the below tests will be evaluated again.

Invoice Escalated – When tests 1-15 fail. The Insurer has an action to review the reason for failure as displayed on the 'History' tab and the claim/invoice detail and make a decision to clear for payment or reject back to the Credit Hire Organisation.

Invoice Approved By BRE – When tests 1-23 pass. The Insurer is required to review the claim/invoice detail and make a decision on whether to clear for payment or reject back to the Credit Hire Organisation.

The following tests are performed on the submitted data, with a brief description on each:

Test Number: 1

Test: Check against the vehicle class of the customer's vehicle against the replacement vehicle class supplied to the customer by the Credit Hire organisation, check for a like for like match.

Test Failure Message: "Vehicle class allocated for hire is not a like for like match on the customer's vehicle class."

Test Failure Status: Invoice Escalated

Test Number: 2

Test: Check to ensure that the Credit Hire Organisation have billed the correct daily rate for the replacement vehicle class as per the suggested ABI rate.

Test Failure Message: "Daily rate billed for replacement vehicle class exceeds ABI rate."

Test Failure Status: Invoice Escalated

Test Number: 3

Test: Test against the 'Hire Net' billed by the Credit Hire Organisation against the 'Hire Net' ceiling value (maximum) held against the Credit Hire Organisation who submitted the invoice. Fail if 'Hire Net' billed exceeds the 'Hire Net' ceiling.

Test Failure Message: "Hire Net billed exceeds the CHO's Hire Net ceiling."

Test Failure Status: Invoice Escalated

Test Number: 4

Test: Test against the 'Number of Hire Days' billed by the Credit Hire Organisation against the 'Number of Hire Days' ceiling amount (maximum) held against the Credit Hire Organisation who submitted the invoice. Fail if 'Number of Hire Days' billed exceeds the 'Number of Hire Days' ceiling.

Test Failure Message: "Number of hire days billed exceeds the CHO's hire days ceiling."

Test Failure Status: Invoice Escalated

Test Number: 5

Test: Test looks at ECD's provided by the Credit Hire Organisation and takes into account the agreed set of constants e.g. weekend buffer to calculate an allowable threshold for number of days hire, dependent on whether the customer's vehicle is mobile or non-mobile. Compares the allowable threshold against the 'Number of Hire Days' billed by the Credit Hire Organisation based on mobile and non-mobile status. This test is not applied to Total Loss cases. If an ECD is not present, then an agreed constant is applied dependent on whether the customer's vehicle is mobile or non-mobile.

Test Failure Message: "Number of hire days billed exceeds the allowable threshold (for repair hires)."

Test Failure Status: Invoice Escalated

Test Number: 6

Test: Test looks at the estimated days under repair as indicated by the engineer, takes into account the agreed set of constants e.g. weekend buffer to calculate an allowable threshold for number of days hire, dependent on whether the customer's vehicle is mobile or non-mobile. Compares the allowable threshold against the 'Number of Hire Days' billed by the Credit Hire Organisation based on mobile and non-mobile status. This test is not applied to Total Loss cases. This test is only applied when the details of the engineer's inspection report are available, otherwise test 5 is executed.

Test Failure Message: "Number of hire days billed exceeds the allowable threshold (for repair hires) with the inclusion of the Engineer's Estimated Days Under Repair."

Test Failure Status: Invoice Escalated

Test Number: 7

Test: This test compares the 'Number of Hire Days' billed by the Credit Hire Organisation against the agreed set of variables that make up the allowable hire days threshold for a vehicle that is a Total Loss. This test only applies to Total Loss cases.

Test Failure Message: "Hire Days Does Not Exceed Total Loss Inspection Number of hire days billed exceeds the allowable threshold (for total loss hires)."

Test Failure Status: Invoice Escalated

Test Number: 8

Test: Test against the 'Repair Net' billed by the Credit Hire Organisation against the 'Repair Net' ceiling value (maximum) held against the Credit Hire Organisation who submitted the invoice. Fail if 'Repair Net' billed exceeds the 'Repair Net' ceiling. This test is only conducted if the Credit Hire Organisation is managing the repair and therefore is charging the Insurer for the repair.

Test Failure Message: "Repair Net Does Not Exceed Band Repair Net Ceiling Repair Net billed exceeds the CHO's Repair Net ceiling."

Test Failure Status: Invoice Escalated

Test Number: 9

Test: Test looks at the 'Estimated Total Repair Amount' as indicated by the engineer and compares it to the 'Repair Gross' billed by the Credit Hire Organisation. Test is failed if the 'Total Gross' amount is more than the 'Estimated Total Repair Amount'. This test is only executed when the details of the engineer's inspection report are available.

Test Failure Message: "Repair Gross is higher than the Estimated Total Repair Amount."

Test Failure Status: Invoice Escalated

Test Number: 10

Test: This test looks at multiple claims for one VRN. This scenario is valid and can be deemed un-fraudulent but a review is necessary.

Test Failure Message: "2 claims registered against one VRN."

Test Failure Status: Invoice Escalated

Test Number: 11

Test: This test is used to check that the amount paid by the Insurer upfront for the Claims Handling fee matches the amount discounted off the hire invoice. This ensures that the Insurer is not paying the Claims Handling fee twice or paying more than required.

Test Failure Message: "Entries against Claims Handling Invoice Amount and Less Claims Handling Fee do not equate to 0."

Test Failure Status: Invoice Escalated

Test Number: 12

Test: This test is used to check that Credit Hire Organisations that are participating in the Delegated Authority scheme are not offering a discount off the 'Total Gross' field.

Test Failure Message: "CHO is on DA scheme. Discount should be 0."

Test Failure Status: Invoice Escalated

Test Number: 13

Test: This test checks that the Credit Hire Organisation has applied the correct discount off the 'Total Gross' field. The discount should equate to the VAT rate of the Claims Handling amount i.e. £100.

Test Failure Message: "Discount calculation is incorrect."

Test Failure Status: Invoice Escalated

Test Number: 14

Test: This test checks that the Credit Hire Organisations that are not participating in the Delegated Authority scheme are not invoicing with entries against fields that relate to the Claims Handling invoice and therefore a possible deduction off the amount to be paid by the Insurer.

Test Failure Message: "Entries against Claims Handling Invoice Amount and Less Claims Handling Fee are not 0."

Test Failure Status: Invoice Escalated

Test Number: 15

Test: This test is used to ensure that the Credit Hire Organisation has calculated the 'Hire Gross' field correctly and simple mathematics has been applied appropriately.

Test Failure Message: "Hire Gross calculation is incorrect."

Test Failure Status: Invoice Data Calculation Incorrect

Test Number: 16

Test: This test is used to ensure that the Credit Hire Organisation has calculated the 'Hire VAT' field correctly and simple mathematics has been applied appropriately.

Test Failure Message: "Hire VAT calculation is incorrect."

Test Failure Status: Invoice Data Calculation Incorrect

Test Number: 17

Test: This test is used to ensure that the Credit Hire Organisation has calculated the 'Repair VAT' field correctly and simple mathematics has been applied appropriately. This test is only applied when the Credit Hire Organisation has invoiced for a repair.

Test Failure Message: "Repair VAT calculation is incorrect."

Test Failure Status: Invoice Data Calculation Incorrect

Test Number: 18

Test: This test is used to ensure that the Credit Hire Organisation has calculated the 'Repair Gross' field correctly and simple mathematics has been applied appropriately. This test is only applied when the Credit Hire Organisation has invoiced for a repair.

Test Failure Message: "Repair Gross calculation is incorrect."

Test Failure Status: Invoice Data Calculation Incorrect

Test Number: 19

Test: This test is used to ensure that the Credit Hire Organisation has calculated the 'Total Net' field correctly and simple mathematics has been applied appropriately.

Test Failure Message: "Total Net calculation is incorrect."

Test Failure Status: Invoice Data Calculation Incorrect

Test Number: 20

Test: This test is used to ensure that the Credit Hire Organisation has calculated the 'Total VAT' field correctly and simple mathematics has been applied appropriately.

Test Failure Message: "Total VAT calculation is incorrect."

Test Failure Status: Invoice Data Calculation Incorrect

Test Number: 21

Test: This test is used to ensure that the Credit Hire Organisation has calculated the 'Total Gross' field correctly and simple mathematics has been applied appropriately.

Test Failure Message: "Total Gross calculation is incorrect."

Test Failure Status: Invoice Data Calculation Incorrect

Test Number: 22

Test: This test is used to ensure that the Credit Hire Organisation has calculated the 'Total to Pay' field correctly and simple mathematics has been applied appropriately.

Test Failure Message: "Total to Pay calculation is incorrect."

Test Failure Status: Invoice Data Calculation Incorrect

Test Number: 23

Test: This test is used to ensure that dates around the hire period are logical and the accuracy of data submitted by the Credit Hire Organisation is to a high standard.

Test Failure Message: "The Hire End date is before the Hire Start date."

Test Failure Status: Invoice Data Calculation Incorrect

7 Report Extracts

There are a number of opportunities for information to be exported out of iDAS CHOX and into a Microsoft Excel spreadsheet.

7.1 Inbox Report Extracts

It is possible to export details of all the claims that appear in the 'Claims Overview Grid' for your inbox. To run this export, you must:

- Navigate to the work queue that you wish to run a Microsoft Excel report extract for.
- Click on the 'Export To Excel' button located at the bottom right hand corner of the 'Claims Overview Grid' as shown by the red box in figure 22 below.

The screenshot shows the iDAS CHOX web application. At the top, there is a navigation bar with links: Home, XML Uploads, Help, Support, About Chox, and Log Off. Below this is a header section with 'Inbox' and 'Search' tabs. Under the 'Inbox' tab, there are three links: 'Claims Awaiting Acknowledgement (0)', 'Re-Submitted Claims Awaiting Acknowledgement (0)', and 'Hire Update Anomalies (0)'. Below these links is a table titled 'Claims'. The table has columns: Supplier Reference, Claim Number, VRN, Invoice Amount, Date Uploaded, Status, LOB, CHO, and Insurer. The first row of data shows 'CHOX1007', '200864737371', 'X567XER', an empty cell for Invoice Amount, '01/12/2008', 'AwaitingInvoiceData', 'LoB Test', 'Credit Hire Org', and 'Insurer'. At the bottom right of the table, there is a red-bordered button labeled 'Export To Excel'.

Supplier Reference	Claim Number	VRN	Invoice Amount	Date Uploaded	Status	LOB	CHO	Insurer
CHOX1007	200864737371	X567XER		01/12/2008	AwaitingInvoiceData	LoB Test	Credit Hire Org	Insurer

Figure 22

- A pop-up screen will appear asking you whether you would like to save or open the file.
- To open the Microsoft Excel report click on the 'Open' button.
- To save the Microsoft Excel report follow these steps:
 - Click on the 'Save' button.
 - Choose a location of where to save the report and click on the 'Save' button.

7.2 Search Screen Extracts

If you need to export a more meaningful list of claims from the system, then the use of the 'Search' function is required:

- As discussed in section 3.2.4 perform the search criteria you desire.
- A list of claims that meet the search criteria will be displayed in the 'Claims Overview Grid'.
- The list of claims can then be exported by clicking on the 'Export To Excel' button located in the bottom right-hand corner of the 'Claims Overview Grid'.
- Perform the necessary steps to open or save the Microsoft Excel report as detailed in section 7.1.

8 Help and Support

- Your home page includes a link to this user guide in the top right-hand corner of the screen labelled 'Help' as shown in figure 23 below.

Figure 23

- Your home page includes a link to the iDAS CHOX support document, including hours of operation, contact details and the support protocol. The iDAS CHOX support document can be accessed via the 'Support' link as shown in figure 24 below.

Figure 24

- For further support on the use of iDAS CHOX, please contact iDAS CHOX Support via the e-mail below:

choxsupport@sherwoodcompliance.co.uk
